Qualifying Option Number Two - Component Path

Louisiana's HELP program is linked to the U.S. EPA/DOE Energy Star program. The following household appliances that meet the requirements of the Energy Star program are automatically eligible for financing under HELP. Information on Energy Star and lists of qualifying appliances are available at the Energy Star world wide web site, <www.energystar.gov>.

Eligible Items	Qualifying Models	Purchased	Required Documentation
Clothes Washers	Minimum Energy Star…A list of Energy Star Clothes Washers can be found at <www.energystar.gov>	Brand _____ Model _____	Receipt with brand and model number.
Clothes Dryers	Minimum Energy Star…A list of Energy Star Clothes Dryers can be found at <www.energystar.gov>	Brand _____ Model _____	Receipt with brand and model number.
Refrigerators	Minimum Energy Star…A list of Energy Star Refrigerators can be found at <www.energystar.gov>	Brand _____ Model _____	Receipt with brand and model number.
Dishwashers	Minimum Energy Star…A list of Energy Star Dishwashers can be found at <www.energystar.gov>	Brand _____ Model _____	Receipt with brand and model number.
Room Air Conditioners	Minimum Energy Star…A list of Energy Star Room Air Conditioners can be found at <www.energystar.gov>	Brand _____ Model _____	Receipt with brand and model number.
Windows	Minimum Energy Star…To meet Energy Star in the South, windows must have a National Fenestration Rating Council (NFRC) rating label with a U-factor rating of 0.50 or below and a Solar Heat Gain Coefficient (SHGC) of 0.35 or below.	Brand _____ R-Value _____ SHGC _____	Receipt with brand, R-Value, SHGC, and NFRC Ratings.
Attic Insulation	Up to a maximum R-30	R-Value _____	Receipt
Wall Insulation	Up to a maximum R-13	R-Value _____	Receipt
Radiant Barrier	Attic Installations only.	Material Type_____ Thickness _____	Receipt
Instantanious Water Heaters	Minimum Energy Star…A list of Energy Star Instantanious Water Heaters can be found at <www.energystar.gov>	Brand _____ Model _____	Receipt with brand and model number.
Gas Water Heaters	Minimum Energy Star…A list of Energy Star Gas Water Heaters can be found at <www.energystar.gov>	Brand _____ Model _____	Receipt with brand and model number.
Solar Water Heaters	Minimum Energy Star…A list of Energy Star Residential solar hot water systems can be found at <www.energystar.gov> Solar Energy Factor >= 1.2 w/Gas Back-up, or 1.8 w/Electric Back-up, & OG-300 Certification from the SRCC	Brand _____ Model _____ SEF _____ Back-up Heat Type _____ SRCC Rating _____	Contractor receipt. Must be installed by contractor, and receipt must show brand, model. SEF, back-up heat type, & SRCC Rating
Central Air Conditioning and Heating Systems: Systems in column one MUST meet the minimum efficiency requirements in column two			
Air Source Heat Pump	Minimum Energy Star…8.2 HSPF (Heating) & 14.5 SEER (Cooling) A list of Energy Star Air Source Heat Pumps can be found at <www.energystar.gov>	Brand _____ Model _____ HSPF _____ SEER _____	Receipt with brand, model number, and efficiencies.
Geothermal Heat Pump	Minimum Energy Star…3.3 COP (Heating) & 14.1 EER (Cooling)	Brand _____ Model _____ COP _____ EER _____	Receipt with brand, model number, and efficiencies.
Gas Fired Heat Pump	Minimum Energy Star…1.2 COP (Heating) & 1.25 COP (Cooling)	Brand _____ Model _____ COP (Htg.) _____ COP (Clg.) _____	Receipt with brand, model number, and efficiencies.
Central Air Conditioners	Minimum Energy Star…14.5 SEER (Cooling) A list of Energy Star Air Conditioners can be found at<www.energystar.gov>	Brand _____ Model _____ SEER _____	Receipt with brand, model number, and efficiencies.
Gas Furnace	Minimum Energy Star…A list of Energy Star Gas Furnaces can be found at <www.energystar.gov>	Brand _____ Model _____ AFUE _____	Receipt with brand, model number, and efficiencies.
