Flowing or Locked-Out?  _____ Locked-out _____			Cumulative Vegetation Hauled Off: _____ loads of 25-yd roll off boxes	
			Cumulative Oil Hauled Off: _____ bbls	
Notes:				Notes:
<u>Additional Remarks</u>				<u>P&amp;A'd Wells</u>
Rained the evening before. Sinkhole was calm and clear as of 10am. Increased neighborhood activity due to anniversary date. Gates locked and secured as I passed in and out. CPT rig setup between ORW 9 and 16. Muddy in the morning but starting to dry as of this afternoon. Soft area by ORW 9 has been laid over with limestone. Berms were secure. Typical bubbling that has become expected but nothing out of the ordinary. Some extra work being done on various wells over time to install solid pressure transducers.				OGRW #2
