Bayou Corne Inspection

Met with John Boudreaux at the command post. Left by boat went to the 7 water sites just to check areas out.

I went to the 4" csg site no change with the bubbles. The company University of Memphis placed a seismic meter on 7-30-2012 in this area .

The Parish hauled limestone to the 4" csg. Stub, to make a right of way. They stopped the material about 20' from the stub.

Today the Seismic crew is installing a meter in the area of a Crosstex Storage well. s/n 971565

John Boudreaux, Jerry Knight with DEQ and myself made the afternoon boat ride to the 7 bubbling sites .

Jerry used the Multi Rae Pluse meter and the MSA meter to check the bubble sites for gasses. None was detected.

Selma Oubre
