Activities

| | |
|---|---|
| Operational Period Report Date | 02/10/13 06:00 – 02/11/13 06:00 |
| Current Status of Operation or Activity | <ul style="list-style-type: none">- Continuing Normal Operations- Normal operations include operating 4 permitted flares. Flows to these flares are dependent on the equipment in operation at the time. Starting and stopping some equipment including pumps and compressors have an effect on flare flows.- Work to replace the south field flare continues. No work on this Friday through Sunday.- Dow 8/8A wellheads to replace wellhead bolts and to recoat wellhead ground to air interface. Waiting on an excavation permit (internal). No work on this Friday through Sunday.- V-20 new top is in place and being welded. No work on this Friday through Sunday.- De-pressuring UCAR 2 well. During this operation brine will be de-pressured from this inactive well into tank trucks and trucked to the tank. This is done approximately every 2 months to maintain a target pressure in the well.- Water to Chevron for re-watering continues.- Responding to requests from the Public Agencies. |

| | |
|------------------------------------|---|
| | <ul style="list-style-type: none"> - Responding to request by Public Agencies. |
| Proposed Activities and Objectives | <ul style="list-style-type: none"> - Continue Normal Operation including operation of flares associated with normal operations. - Continue visual inspection of property and equipment for signs of subsidence or anything out of the ordinary. - Respond to Public Agency Request |
