Activities

Operational Period Report Date	03/20/13 06:00 – 03/21/13 06:00
Current Status of Operation or Activity	<ul style="list-style-type: none">- Continuing Normal Operations- Normal operations include operating 4 permitted flares. Flows to these flares are dependent on the equipment in operation at the time. Starting and stopping some equipment including pumps and compressors have an effect on flare flows.- Coastal Contractor will begin underground piping inspection process. This entails walking out underground piping testing for coating breakdown using non-intrusive testing equipment (ECDA).- The portable flare is setup in the south field to be used to re-commission a hydrocarbon line there may be some flaring this week.- Cain's will be moving to the South Field to repair pipe supports between Gate 3 and Dow 13.- Sandblasting and painting at Dow 16 and Dow 7.- Water to Chevron for re-watering continues.
Proposed Activities and Objectives	<ul style="list-style-type: none">- Continue Normal Operation including operation of flares associated with normal operations.- Continue visual inspection of property and equipment for

	signs of subsidence or anything out of the ordinary. - Respond to Public Agency Request
--	--
