Mostly Sunny 93°F 73°F	Partly Cloudy 93°F 73°F	Partly Cloudy 91°F 73°F	Isolated Thunderstorms 90°F 73°F

Detailed Forecast

Today:

Partly cloudy skies. A stray afternoon thunderstorm is possible. High 91F. Winds ENE at 5 to 10 mph.

Tonight:

A stray thunderstorm is possible through the evening. Partly cloudy skies. Low 72F. Winds light and variable.

Tomorrow:

Mostly sunny. Highs in the low 90s and lows in the low 70s.

Site Safety for Sinkhole and Surrounding Area

In an effort to provide for a safe work environment in and around the Sink Hole, this procedure has been put in place to inform workers of their allowed Work Areas. This procedure is only guidance and should not exclude any other observation or safety precautions in place that may cause any danger to anyone. All workers entering the Texas Brine facility should be informed of the risks that are posed by this ongoing event.

This system has been developed using a Code System and is defined as follows:

Code 1:

Is an all clear, with restriction to OXY pad 3 and the North pad area as indicated in the map below due to the concerns raised by Itaska.

Code 2:

Restrict all activity from inside the Berm, but not the Berm itself or outside; recommend that all operations in the immediate vicinity of the sinkhole be halted immediately. The Inside Berm is defined as indicated on the map below in red.

Code 3:

Restrict activity from inside and on the Berm, no work activity shall occur until Code level has been changed to allow. Continued monitoring of the berm for cracks and venting wells located adjacent to the berm. At this code level immediate notification shall be made of any changes that occur on sinkhole, swamp around sinkhole, or any changes to berm area. The Berm is defined as indicated in yellow on the map below.

Communication:

All workers working in conjunction with this ongoing event shall be informed of these codes and communication protocol developed to inform everyone when codes may change at any time.
