Activities

Operational Period Report Date	9/17/14 06:00 – 9/18/14 06:00
Current Status of Operation or Activity	<ul style="list-style-type: none">- Continuing Normal Operations- Normal operations include operating 4 permitted flares. Flows to these flares are dependent on the equipment in operation at the time. Starting and stopping some equipment including pumps and compressors have an effect on flare flow.- D-1A – Maintenance pulling inlet and outlet spools, removing instruments and setting up air conditioner for entry tomorrow. Pulling the pilots on FS-1 to clean and perform preventative maintenance.- Blasting and Painting Dow 21, north field, and Pad 11- Grace 1/Promix 2 MIT's – Brine is at MIT target pressure, nitrogen truck to add nitrogen tomorrow.- Pulling the strainer on the fire water pump at UCAR to clean.- Gulf South 1 Workover – Well is secured waiting on tubing to be re-threaded. May be up to 6 weeks.
	<ul style="list-style-type: none">- Waiting on Nation Wide to do pipeline inspections in wetlands.- Continue Normal Operation including operation of flares

	<p>associated with normal operations.</p> <ul style="list-style-type: none"> - Continue visual inspection of property and equipment for signs of subsidence or anything out of the ordinary. - Respond to Public Agency Request
--	---

Activities Associated with Declaration of Emergency and Directive

Activity For Period Described Above	<ul style="list-style-type: none"> - Reporting Water flows
Completed Activities	<ul style="list-style-type: none"> - 8/27/14 Layne drove Sentinel down to 165’ at the site of future water well 10 to confirm no gas pockets. They opened a 2’ screen and pulled piping up to surface. No gas was detected at any depth. - LEL monitoring of well bores, anchors, water wells penetrations, and T-20 mining water tanks including visual inspections. No LEL detected on any checks. - Met with Dome Operators on Wednesday - Water well samples have been pulled and sent to Lab for analysis. - Met with DNR and Shaw to discuss action plans. - Sample results from water wells received and sent to DNR - Ran PDK Log on Dow 14 brine well and Water Well 1 9/24/12. As per experts no gas detected in either location. - Met with Dome Operators 9/26/12 - Sent Storage well data to DNR - Gathered Water well information for Dr. Ratigan. - The Dow water wells were sampled today 10/3/12. - Met with DNR to review progress by Dome Operators and Dr. Ratigan. - LEL monitoring on the well bores, anchors, water wells, and T-20 mining water tank including visual inspections. Complete 10/6/12 zero LEL at all test sites. - Update meeting with Dome Operators and Dr. Ratigan. 10/8/12 - Results from water well samples to DNR 10/15/12. - 10/31/12 water well samples pulled. - LEL monitoring of well bores, anchors, water wells penetrations, and T-20 mining water tanks including visual inspections on 10/6/12. No LEL detected on any checks. - Reporting Daily Water Well flows to DNR.
