#### Belle Rose, Louisiana, United States

Today's Forecast: Wednesday, 25 Jun 2014

### 88°F

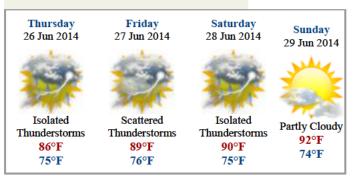

75°F

Sky Conditions: Scattered Thunderstorms Sunrise: 6:05 AM Sunset: 8:09 PM Wind: WSW (245°) @ 8Mph Precipitation Probability: 60%

View your complete Local Weather »

### Extended Forecast Full 10-Day Forecast »

#### **Detailed Forecast**

Today:

Partly to mostly cloudy with a chance of thunderstorms. High 88F. Winds WSW at 5 to 10 mph. Chance of rain 60%. Tonight: Overcast with a slight chance of showers and thunderstorms, mainly during the evening. Low around 75F. Winds SSW at 5 to 10 mph. Chance of rain 30%.

Tomorrow:

Isolated thunderstorms. Highs in the mid 80s and lows in the mid 70s.

| Seismic<br>Code | Seismic Activity  | Sinkhole Access   | Berm Road Access  | Work Allowed  |
|-----------------|---|---|---|---|
| 1               | Minimal to no seismic activity<br>around/below sinkhole; 10 or fewer<br>of the sharp seismic signals<br>associated with rock movement,<br>called mini-earthquakes (MEQs) or<br>the longer signals associated with<br>gas or liquid movement, called Very<br>Long Periods (VLPs) within 24-hour<br>period; allows work on sinkhole and<br>inside berm area to continue | <ul> <li>Approved<sup>1</sup> work allowed only in designated areas of sinkhole. Some areas may be restricted due to unsafe conditions (e.g., leaning trees). Sinkhole grid system shown in Figure 1 will be used to define restricted areas for individual work activities.</li> <li>All vessels must have at least 2 persons. Workers must wear approved PFDs. No work allowed after sunset. Safety boat on standby.</li> </ul> | Access allowed on all berms and<br>roads unless an area is physically<br>barricaded.  | Approved work allowed in<br>unrestricted areas. Work area<br>must be cleared of hazards and a<br>Work Permit issued before start.   |
| 2               | Indicates some increased seismic<br>activity around/below sinkhole but<br>not at a level that indicates<br>imminent threat of sloughing or<br>movement below sinkhole (10 to 50<br>MEQs or VLPs in 24 hours)  | <ul> <li>Code 1 requirements plus:</li> <li>Each vessel inside designated sinkhole area (see Figure 2) must have a designated shoreline watch who is in constant radio communication with vessel.</li> </ul>  | Access allowed on all berms and roads unless an area is physically barricaded.  | <ul> <li>Code 1 requirements plus:</li> <li>Each work activity must<br/>have a designated person<br/>with means to warn all<br/>workers of unusual activity<br/>on sinkhole.</li> </ul> |
| 3               | Indicates seismic activity has<br>elevated to a point similar to what<br>has been seen in past monitoring<br>prior to a sloughing on the shore or<br>movement beneath sinkhole (More<br>than 50 MEQs or VLPs in 24 hours)   | <ul> <li>Code 1 requirements plus:</li> <li>Each vessel inside the defined containment berm (see Figure 2) must have a designated shoreline watch who is in constant radio communication with vessel.</li> </ul>  | All berm roads are closed except the<br>north berm from the TBC Access road<br>to Rig Road (unless restricted for non-<br>seismic reasons). All other berms<br>open only to UTVs for personnel<br>doing approved work. Anyone on a<br>UTV must have a radio, air horn, and<br>approved PFD. | <ul> <li>Code 1 and 2 requirements plus:</li> <li>Work is allowed on a case by case basis as determined by TBC Operations:</li> </ul>   |

1. All site work must be approved by TBC Response Operations.

2. The Texas Brine access road from Highway 70 to Pad 10 is not considered part of the designated containment berm for purposes of this document.

3. Codes are set by Assumption Parish Office of Emergency Management

Page 14-A, Texas Brine Company, LLC, Health and Safety Plan, Bayou Corne, Belle Rose, Louisiana, Sept 2013

### Site Safety for Sinkhole and Surrounding Area

In an effort to provide for a safe work environment in and around the Sink Hole, this procedure has been put in place to inform workers of their allowed Work Areas. This procedure is only guidance and should not exclude any other observation or safety precautions in place that may cause any danger to anyone. All workers entering the Texas Brine facility should be informed of the risks that are posed by this ongoing event.

This system has been developed using a Code System and is defined as follows:

## Code 1:

Is an all clear, with restriction to OXY pad 3 and the North pad area as indicated in the map below due to the concerns raised by Itaska.

# Code 2:

Restrict all activity from inside the Berm, but not the Berm itself or outside; recommend that all operations in the immediate vicinity of the sinkhole be halted immediately. The Inside Berm is defined as indicated on the map below in red.

# Code 3:

Restrict activity from inside and on the Berm, no work activity shall occur until Code level has been changed to allow. Continued monitoring of the berm for cracks and venting wells located adjacent to the berm. At this code level immediate notification shall be made of any changes that occur on sinkhole, swamp around sinkhole, or any changes to berm area. The Berm is defined as indicated in yellow on the map below.

## **Communication:**

All workers working in conjunction with this ongoing event shall be informed of these codes and communication protocol developed to inform everyone when codes may change at any time.
