Activities

Operational Period Report Date	10/04/12 06:00 – 10/05/12 06:00
Current Status of Operation or Activity	<ul style="list-style-type: none"> - Continuing Normal Operations - Normal operations include operating 4 permitted flares. Flows to these flares are dependent on the equipment in operation at the time. Starting and stopping some equipment including pumps and compressors have an effect on flare flows. - MIT complete next step is to vent off the nitrogen. This will generate noise. Venting continues on days only. - Sandblasting and painting equipment south of the control room. - Sandblasting at Dow 8 north of hwy 70. - Water to Chevron for re-watering.
Current Activities and Objectives	<ul style="list-style-type: none"> - Responding to requests from the Public Agencies. - Seismic monitor setup at Dow 18 well site. - Responding to request by Public Agencies.
Proposed Activities and Objectives	<ul style="list-style-type: none"> - Continue Normal Operation including operation of flares associated with normal operations. - Continue visual inspection of property and equipment for signs of subsidence or anything out of the ordinary. - Will be venting nitrogen from Dow 17 and Dow 22 for 4-5

	<p>days. This venting will be noisy.</p> <ul style="list-style-type: none"> - At some point this week and possibly through the weekend Dow Pipeline will begin IMP work at UCAR. This work will include flaring. Additional contractors will be on site to perform this activity. - Work will begin soon on Dow 8/8A north of hwy 70 associated with a scheduled MIT. This well is MIT'd every 5 years and is due this year. Permit has been approved. Prior to beginning we will be logging the well to see where the product interface is. Baker Hughes will most likely be doing this logging. - Respond to Public Agency Request
