Commissioner James H. Welsh
P.O. Box 94275
Baton Rouge, LA 70804

RE: In response to State of Louisiana Department of Natural Resources Office of Conservation's Second Amendment to Declaration of Emergency and Directive

Commissioner Welsh,

In response to the Second Amendment and Declaration of Emergency and Directive order issued by the Louisiana Department of Natural Resources (LDNR), Office of Conservation on September 25, 2012, Texas Brine Company, LLC (TPC) understands the seven items listed in the document.

In the above mentioned, TBC was specifically directed and ordered to perform certain tasks outlined in the above mentioned document. Below are the required responses, as directed.

1. TBC's counsel provided LDNR legal counsel with a response to Directives 1-3 on September 28, 2012.
2. TBC understands Directive 4, which is to provide all daily logs and field notes from all contractors conducting investigation into subsidence and natural gas bubbling. The Daily Action Summary and results for current information can be found in the Attachment section of this report.
3. TBC understands Directive 5, which directs TBC to immediately allow for split or share any sample taken on site related to Well 3A (Serial Number 974265), the cavern, other wells facilities or other site locations. The Daily Action Summary of today's collection can be found in Attachment section of this report.
4. TBC understands Directive 6, which directs TBC to immediately report the results (final and preliminary) of any tests, logs samples or data collection performed on Well 3A, the cavern, other wells, facilities or site locations that indicate a change in any previously known conditions related to the investigation of the subsidence or natural gas bubbling

events, and continue to report any such results. The Daily Action Summary and the Results related to this Directive can be found in Attachment section of this report.

5. TBC understands the Directive 7, which states that TBC will provide a daily summary of all tests, or logs performed or samples taken from Well 3A and the cavern as well as any results of those tests or logs, including preliminary as of September 25, 2012 and going forward. The Daily Summary and Results related to this Directive can be found in Attachment section of this report.

Please note that the drilling rig used for the Observation Well 3A has been removed and the site is being rigged down and returned to pre-drilling condition. As such, daily drilling reports for this well have ceased. Plans are being made for longer term potential gas venting/flaring requirements and possible hydrocarbon material recover from Well 3A.

In addition, previous daily summary reports issued to LDNR have included significant duplicate information as there is a fair amount of overlap in the information requested in each of the Directives included in the September 25, 2012 order. All requested information associated with the Directives issued in the September 25, 2012 order are included in the Attachment section of this report.

TBC believes that the submittal of this report satisfies the requirements of the Declaration of Emergency and Directive issued on September 25, 2012. As directed this report is submitted by email to conservationorder@la.gov, ref. "Emergency Declaration-Texas Brine Company LLC-9/25/2012.

Daily Action Summary

August 29, 2013

Stationary Air Monitoring

- Eric Rucinski onsite from 07:35 to 09:15. Changed out the monitors between 07:53 and 08:48. Collected data from the monitoring database and forwarded to Jill Martin in the Baton Rouge office for processing.
- Darlene McManus of Code Red (monitor sub-contractor) onsite from 07:00 to 17:00. Assisted in battery change outs and maintenance of the monitoring equipment.

Residential Air Monitoring

- Sage has been requested to suspend bimonthly residential air monitoring. Therefore, Sage will discontinue these activities. The last event was conducted on March 26, 2013.

Gas Seep Sampling

- Not Scheduled

Well Gas Sampling

- Well gas samples were collected from Geophone-1. Steve Shaughnessy conducted the scheduled well gas sampling from 07:19 to 07:23. Two samples were collected and were shipped to Isotech Laboratories in Illinois for isotopic analysis via SPL.

Under Slab Gas Sampling

- Not Scheduled

Air Indoor Monitoring

- Not Scheduled

RESPEC Consulting & Services

Texas Brine, L.L.C.

Assumption Parish, Louisiana

Daily Field Report

Report By: Pete Smith

Date: 8/29/13

Company: RESPEC

Job #: 02241

Personnel	Company	Job Title
Peter Smith, CPG	RESPEC	Staff Geologist
Nick Marnach	RESPEC	Staff Engineer

Time On Site:

Start Time: 07:00

End Time: 19:00

DAILY ACTIVITY

MiHPT: MiHPT 36 and 37 were completed. Logs forwarded to Hecox and added to the Box.

DPVE Pilot Test: Downloaded DPVE monitoring well data and performed cursory analysis. Assisted Walker Hill Environmental in flare startup activities. We were unsuccessful in lighting the flare. Methane readings from the air effluent discharge stack remained at approximately 40,000 to 47,000 ppm. Ferrell Brunet, CBI, has collected gas samples from each well at startup and at 24 hours into the test. Duplicate samples were collected by RESPEC and can be submitted for analysis, if requested.

The system produced a total of approximately 7,000 gallons overnight. By the end of day Thursday, August 29th, the system had recovered 12,000 gallons of water. A truck came by and pumped out the holding tank to make room for Friday, August 30th recovery.

We continued to run DPVE-26-3A as it was configured at start up with the submersible pneumatic pump. It remained dewatered and was flowing approximately 50 cfm from the extraction system. After one more attempt to make the pneumatic pump operate we switched well DPVE-26-1 to an airlift setup where we use small amounts of compressed air to assist with the lift of water up the extraction tube. This allowed for a lower differential in vacuum pressure between the extraction tube and well with more vacuum on the well head. With this setup the well was dewatered and full vacuum was applied to the well head. The system was left to run with this configuration overnight.

The bubble has been significantly reduced. There were four bubbles in the lagoon when we began, but it was reduced to only one by the morning of August 29th and much smaller than originally observed. The start-up phase is coming to close and it looks as though the monitoring stage will go rather smoothly to gather the necessary data to determine the viability of long term gas recovery.

Instrumentation: Removed data collection network repeater site 1111. Spoke with Stella Williams regarding the necessity of PAD 3 equipment removal .

PROPOSED SCHEDULE

MiHPT: MiHPT 38 will be drilled Friday. MiHPT will continue after the break on Wednesday.

DPVE Pilot Test: Continue to operate the vacuum system in dual phase mode over the holiday weekend.

Initials: PHS

ME&A Daily Action Summary

August 29, 2013

Subsidence Survey:

- No Work Done

Sinkhole Perimeter/Hydrographic Survey:

- No Work Done

Support Sinkhole Cleanup

- No Work Done

Misc. Survey Work

- No Work Done

Daily Field Report

Report By: Patrick Ritchie
 Company: MP&A

Date: 8/29/2013
 Work Order # 80-05

Health and Safety Meeting YES NO

Weather: 92 F Partly cloudy

Personnel	Company	Job Title
Charles Trahan	MP&A	Geologist

Site Activities: Start Time 6:55 End Time 17:00

Equipment On-site:
 Sonic rig
 Truck with poly water tank
 Skid steer

Daily Activity:
 Grouted MRAA-4M.
 Set well at MRAA-4S, screened 145-155' bgs. Native collapse then 20/40 sand and bentonite pellets set above screen.

Estimated time of completion:
 On-going

Proposed schedule:
 Conduct in-situ monitoring of industrial water wells
 Measure water level for the industrial water wells and MRAA wells
 Measure pressure and water level at TBC Geoprobe locations
 Collect laboratory samples from the industrial water wells
 Observe, video, measure bubble sites

Estimated time of completion:
 On-going

Initials: PMR
