

**Part XIX. Office of
Conservation—General Operations**

Subpart 1. Statewide Order No. 29-B

**Chapter 5. Off-Site Storage,
Treatment and/or Disposal of
Exploration and Production Waste
Generated from Drilling and
Production of Oil and Gas Wells**

NOTE: Onsite disposal requirements are listed in LAC 43:XIX, Chapter 3.

Editor's Note: Statewide Order 29-B was originally codified in LAC 43:XIX as §129. In December 2000, §129 was restructured into Chapters 3, 4 and 5. Chapter 3 contains the oilfield pit regulations. Chapter 4 contains the injection/disposal well regulations. Chapter 5 contains the commercial facility regulations. A cross-reference chart in the December 2000 *Louisiana Register*, page 2798, indicates the locations for the rules in each existing Section.

Editor's Note: Chapter 5 was amended in November 2001. A chart showing the restructuring of Chapter 5 is found on page 1898 of the *Louisiana Register*, November 2001.

§501. Definitions

Application Phase—an identifiable period of time during which E and P Waste receipts are applied to a land treatment cell.

Cell—an earthen area constructed with an underdrain system within a land treatment facility used for the placement, land treatment and degradation of E and P Waste at a commercial facility. (A *cell* as defined in this Section is not considered a pit.)

Closed System—a system in which E and P Waste is stored and treated in an enclosed sump, tank, barge, or other vessel/container or equipment prior to treatment and/or disposal. A closed system does not include an open top sump or earthen pit.

Commercial Facility—a legally permitted E and P Waste storage, treatment and/or disposal facility which receives, treats, reclaims, stores, and/or disposes of E and P Waste for a fee or other consideration. For purposes of this definition, Department of Environmental Quality (DEQ) permitted facilities, as defined by LAC 33:V and VII, which are authorized to receive E and P Waste, are not covered by this definition. However, such facilities must comply with the reporting requirements of §545.K herein if E and P Waste is accepted.

Commissioner—the Commissioner of Conservation of the State of Louisiana.

Community Saltwater Disposal Well or System—a saltwater disposal well within an oil or gas field which is operated by one operator of record for disposal of E and P Waste fluids and used by other operators of record in the same field or adjacent fields for noncommercial disposal of

their produced water. Such operators share in the costs of operating the well/system. For purposes of this definition, *adjacent fields* means oil or gas fields or portions thereof which are located within or partially encroach upon the same township as a community saltwater disposal well or one or more townships all of which are directly contiguous to the township in which the community saltwater disposal well is located.

Container—a sump, storage tank, process vessel, truck, barge, or other receptacle used to store or transport E and P Waste.

Drilling Waste—oil-base and water-base drilling mud or other drilling fluids and cuttings generated during the drilling of wells. These wastes are a subset of E and P Waste.

Exploration and Production Waste (E and P Waste)—drilling wastes, salt water, and other wastes associated with the exploration, development, or production of crude oil or natural gas wells and which is not regulated by the provisions of, and, therefore, exempt from the Louisiana Hazardous Waste Regulations and the Federal Resource Conservation and Recovery Act, as amended. E and P Wastes include, but are not limited to the following.

Waste Type	E and P Waste Description
01	Salt water (produced brine or produced water), except for salt water whose intended and actual use is in drilling, workover or completion fluids or in enhanced mineral recovery operations, process fluids generated by approved salvage oil operators who only receive oil (BS&W) from oil and gas leases, and nonhazardous natural gas plant processing waste fluid which is or may be commingled with produced formation water.
02	Oil-base drilling wastes (mud, fluids and cuttings).
03	Water-base drilling wastes (mud, fluids and cuttings).
04	Completion workover and stimulation fluids.
05	Production pit sludges.
06	Storage tank sludge from production operations, onsite and commercial saltwater disposal facilities, DNR permitted salvage oil facilities (that only receive waste oil [B,S, & W] from oil and gas leases), and sludges generated by service company and commercial facility or transfer station wash water systems.
07	Produced oily sands and solids.
08	Produced formation fresh water.
09	Rainwater from firewalls, ring levees and pits at drilling and production facilities.
10	Washout water and residual solids generated from the cleaning of containers that transport E and P Waste and are not contaminated by hazardous waste or material; washout water and solids (E and P Waste Type 10) is or may be generated at a commercial facility or transfer station by the cleaning of a container holding a residual amount of E and P Waste.
11	Washout pit water and residual solids from oilfield related carriers and service companies that are not permitted to haul hazardous waste or material.
12	Nonhazardous Natural gas plant processing waste solids.
13	(Reserved).
14	Pipeline test water which does not meet discharge limitations established by the appropriate state agency, or pipeline pigging waste, i.e. waste fluids/solids generated from the cleaning of a pipeline.

NATURAL RESOURCES

Waste Type	E and P Waste Description
15	E and P Wastes that are transported from permitted commercial facilities and transfer stations to permitted commercial treatment and disposal facilities, except those E and P Wastes defined as Waste Types 01 and 06.
16	Crude oil spill clean-up waste.
50	Salvageable hydrocarbons bound for permitted salvage oil operators.
99	Other E and P Waste not described above (shipment to a commercial facility or transfer station must be pre-approved prior to transport).

Fracture Stimulation Reclamation Fluid (FSR fluid)—a material that would otherwise be classified as E and P Waste, but which has been reclaimed for the sole use as media for Office of Conservation permitted hydraulic fracture stimulation operations

Generator—any person or entity who generates or causes to be generated any E and P Waste.

Groundwater Aquifer—as defined in §301.

Inactive Cell—a land treatment cell which is not used for E and P Waste receipts or has been taken out of service by a land treatment facility. Such cell may be considered inactive only if it is a new cell which has not yet received E and P Waste or an existing cell which is in compliance with the applicable testing criteria of this Chapter.

Land Treatment—a dynamic process involving the controlled application of E and P Waste onto or into the aerobic surface soil horizon in open cells by a commercial land treatment facility, accompanied by continued monitoring and management, to alter the physical, chemical, and biological state of the E and P Waste. Site, soil, climate, and biological activity interact as a system to degrade and immobilize E and P Waste constituents thereby rendering the area suitable for the support of vegetative growth and providing for beneficial future land use or to meet the reuse criteria of §565.

MPC—maximum permissible concentration.

Offsite—for purposes of this Section, outside the confines of a drilling unit for a specific well or group of wells, or in the absence of such a unit, outside the boundaries of a lease or contiguous property owned by the lessor upon which a well is drilled.

Oil-Based Drilling Muds—any oil-based drilling fluid composed of a water in oil (hydrocarbon or synthetic) emulsion, organophilic clays, drilled solids and additives for down-hole rheology and stability such as fluid loss control materials, thinners, weighting agents, etc.

Pit—an earthen surface impoundment constructed to retain E and P Waste, often referred to as a pond or lagoon. The term does not include lined sumps less than 660 gallons.

Residual—the de-minimis quantity of E and P Waste (solids or liquids) remaining in a container after offloading, using the practices commonly employed to remove materials from that type of container (e.g., pouring, pumping, and aspirating) and amounting to no more than one inch of residue remaining on the bottom, or no more than three

percent by weight of the total capacity of the container if the container is less than or equal to 110 gallons in size, or no more than 0.3 percent by weight of the total capacity of the container if the container is greater than 110 gallons in size.

Reusable Material—a material that would otherwise be classified as E and P Waste, but which is capable of resource conservation and recovery and has been processed in whole or in part for reuse. To meet this definition, the material must have been treated physically, chemically, or biologically or otherwise processed so that the material is significantly changed (i.e., the new material is physically, chemically, or biologically distinct from the original material), and meets the criteria §565.F. This term does not include FSR Fluid

Salt Cavern Waste Disposal Facility—any public, private, or commercial property, including surface and subsurface lands and appurtenances thereto, used for receiving, storing, and/or processing oil and gas exploration and production waste for disposal into a solution-mined salt cavern.

Salt Water—water with a chloride content greater than 500 ppm generated from a producing oil or gas well.

Sump—a container constructed of steel, fiberglass, sealed concrete, or some other impermeable material utilized for temporary storage of E and P Waste, including, but not limited to, wash water and solids (sludge) generated by the removal/cleaning of residual amounts of E and P Waste from storage containers.

Transfer Station—an E and P Waste receiving and storage facility, located offsite, but operated at an approved location in conjunction with a permitted commercial facility, which is used for temporary storage of manifested E and P Waste for a period of 30 days or less.

Transporter—a legally permitted carrier of E and P Waste contained in trucks, barges, boats, or other transportation vessels.

Treatment—as applied to Type A Facilities (defined herein), excluding Transfer Stations, treatment shall be defined as any method, technique, or process capable of changing the physical and/or chemical characterization or composition of E and P Waste so as to reclaim salvageable hydrocarbons, process reusable material, reduce waste volume (volume reduction), neutralize waste, reduce §549 criteria concentration(s) or otherwise render the waste more suitable for handling, storage, transportation, and/or disposal.

Treatment Phase—the period of time during which E and P Waste in a land treatment cell is physically manipulated and/or chemically altered (through the addition of chemical amendments, etc.) to bring the cell into compliance with the testing criteria or reuse criteria of LAC 43:XIX.549 and 565.

Treatment Zone—the soil profile in a land treatment cell that is located wholly above the saturated zone and within which degradation, transformation, or immobilization of E and P Waste constituents occurs. The treatment zone is subdivided as follows.

1. *Waste Treatment Zone (WTZ)*—the active E and P Waste treatment area consisting solely of the E and P Waste

solids applied to a land treatment cell during the application phase, exists entirely above grade (original cell bottom), and whose actual depth depends on the solids content of the E and P Waste applied. For monitoring purposes the WTZ represents the 0-24" depth increment.

2. *Upper Treatment Zone (UTZ)*—the E and P Waste/native soil (original cell bottom) interface in a land treatment cell where some disturbance occurs as a result of E and P Waste treatment/manipulation. For monitoring purposes, the UTZ represents the 24-36" depth increment.

3. *Lower Treatment Zone (LTZ)*—the zone beneath the UTZ in a land treatment cell from approximately 36-54" (or to the top of the subsurface drainage system) which remains undisturbed throughout the life of a land treatment cell.

Type A Facility—a commercial E and P Waste disposal facility within the state that utilizes technologies appropriate for the receipt, storage, treatment, reclamation, or disposal of E and P Waste solids and fluids (liquids) for a fee or other consideration.

Type B Facility—a commercial E and P Waste disposal facility within the state that utilizes underground injection technology for the receipt, storage, treatment, and disposal of only saltwater or other E and P Waste fluids (liquids) for a fee or other consideration.

Waste Management and Operations Plan—a plan as identified and required in §515.

Water-Based Drilling Muds—any water-based fluid composed of fresh water, naturally occurring clays, drilled solids and additives for fluid loss control, viscosity, thinning, pH control, weight control, etc., for down-hole rheology and stability.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 26:2811 (December 2000), amended LR 27:1898 (November 2001), LR 29:937 (June 2003), LR 34:1421 (July 2008), LR 36:2570 (November 2010).

§503. General Requirements for Generators of E and P Waste

A. E and P Waste Characterization

1. Generators of E and P Waste must be familiar with the components of the E and P Waste they generate.

2. If not previously characterized, E and P Waste characterization procedures should be undertaken to determine the constituents of E and P Waste prior to disposal.

3. At a minimum, E and P Waste should be tested for the following constituents: pH, TPH, EC, TCLP benzene, SAR, ESP and the following metals: As, Ba, Cd, Cr, Cu, Pb, Hg, Mo, Ni, Se, Ag and Zn.

4. E and P Waste should be re-characterized if the waste generation process changes significantly (e.g., process change, chemical additives, etc.).

5. E and P Waste which is to be taken offsite or has been taken offsite for storage, treatment, or disposal may be required to be sampled and analyzed in accordance with EPA protocols or Office of Conservation (OC) approved procedures.

B. The unpermitted or unauthorized onsite or offsite storage, treatment, disposal or discharge of E and P Waste is prohibited and is a violation of these rules.

C. Subsurface disposal of salt water is required and regulated by LAC 43:XIX.401 et seq. The requirements of this Chapter do not apply to either lease saltwater disposal wells or to community saltwater disposal wells.

D. The generator is responsible for the proper handling and transportation of E and P Waste taken offsite for storage, treatment, or disposal to assure its proper delivery to an approved commercial facility or transfer station or other approved storage, treatment or disposal facility. Failure to properly transport and dispose of E and P Waste shall subject the generator to penalties provided for in R.S. 30:18. Each shipment must be documented as required by §545.

E. At the option of the generator, E and P Waste may be treated and/or disposed at Department of Natural Resources (DNR) permitted commercial facilities and transfer stations under the provisions of this Chapter or Department of Environmental Quality (DEQ) permitted facilities as defined by LAC 33:V and VII which are permitted to receive E and P Waste which are subject to relevant DEQ regulations. If received, stored, treated and/or disposed at a DEQ regulated facility, E and P Waste would become the sole regulatory responsibility of DEQ upon receipt.

F. Requirements for E and P Waste Type 06 (Storage Tank Sludge) and E and P Waste Type 12 (Gas Plant Waste Solids)

1. Generators of Waste Type 06 are hereby made aware that commercial land treatment facilities must manage such waste in compliance with the location criteria of §507.A.3 and the maximum permissible concentration (MPC) requirements of §549.C.7.c and d for total benzene.

2. Waste Types 12 is not required to be tested for benzene if disposed at commercial facilities that utilize treatment options other than land treatment (see §547).

3. Prior to shipment and disposal at commercial land treatment facilities, natural gas plant processing waste solids (gas plant waste—Waste Type 12) must be analyzed for the chemical compound benzene (C₆H₆). Testing must be performed by a DEQ certified laboratory in accordance with procedures presented in the *Laboratory Manual for the Analysis of E and P Waste* (Department of Natural Resources, August 9, 1988, or latest revision).

4. Subject to the requirements of §507.A.3 and §549.C.7.a, Waste Type 12 may be disposed at any commercial land treatment facility if test data indicates the waste is less than or equal to the MPC of 3198 mg/kg total benzene.

NATURAL RESOURCES

5. If test data indicates the concentration of total benzene in Waste Type 12 is above 3198 mg/kg (MPC criteria), the following disposal options are available:

a. dispose of the waste at a permitted commercial facility that utilizes an E and P Waste treatment or disposal option other than land treatment;

b. treat the waste (on-site) to a concentration of total benzene equal to or below 3198 mg/kg prior to off-site shipment to any commercial land treatment facility;

c. dispose of the E and P Waste at a commercial land treatment facility that has been approved for the receipt, storage, treatment and disposal of E and P Waste that exceeds a total benzene concentration of 3198 mg/kg; or

d. dispose of the E and P Waste at Department of Environmental Quality (DEQ) permitted facilities as defined by LAC 33:V and VII, pursuant to the provisions of §503.E above.

6. If a generator chooses to dispose of Waste Type 12 at a commercial land treatment facility, the generator must attach a copy of the laboratory report to the manifest which accompanies each shipment of the E and P Waste.

7. Commercial land treatment facilities may not receive, store, treat or dispose of E and P Waste Type 12, gas plant waste solids, unless the requirements of §505.B have been met.

G. Prohibition of Waste Mixing

1. A mixture of E and P Wastes containing amounts greater than residual quantities of Waste Type 06 (and associated wash water) shall be designated as Waste Type 06, and if land treated, must meet the distance requirements for Waste Type 06 in §507.A.3 below.

2. Mixing Waste Type 12 with any other E and P Waste type prior to sampling and shipment to a commercial land treatment facility or transfer station is strictly prohibited.

3. Any inadvertent or unavoidable mixture of E and P Wastes containing any quantity of Waste Type 12 (and associated wash water) must meet the MPC testing criteria of §549.C.7.a for total benzene and must meet the distance requirements for Waste Type 12 in §507.A.3.

H. General Reporting Requirements

1. Any spills which occur during the offsite transportation of E and P Waste shall be reported by phone to the Office of Conservation, within 24 hours of the spill and the appropriate state and federal agencies.

2. Operators (generators) are required to report the discovery of any unauthorized disposal of E and P Waste by transporters, or any other oilfield contracting company.

3. Within six months of the completion of the drilling or workover of any well permitted by the Office of Conservation, the operator (generator) shall comply with the reporting requirements of LAC 43:XIX.303 or successor regulations regarding the disposition of any E and P Wastes.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 26:2813 (December 2000), amended LR 27:1900 (November 2001), LR 29:937 (June 2003).

§505. General Requirements for Commercial Facilities and Transfer Stations

A. The offsite storage, treatment, and/or disposal of E and P Waste by a commercial facility or transfer station must be approved by the commissioner as provided in this Chapter.

B. Commercial land treatment facilities may not receive, store, treat or dispose of natural gas plant processing waste solids (Waste Type 12) that exceed the MPC criteria of §549.C.7.a for total benzene (3198 mg/kg) unless the company has demonstrated to the commissioner that Waste Type 12 can be pretreated to below the applicable MPC prior to land treatment. Such demonstration shall be considered a major modification of any existing permit and will require compliance with the permitting procedures of §§519, 527, and 529, including the submission of an application and public participation. The E and P waste management and operations plan required in §515 shall clearly indicate how the E and P Waste storage and treatment system will minimize the release of benzene (e.g., enclosed tanks, enclosed treatment equipment, vapor recovery systems, etc.). Such demonstration shall also include proof of solicitation from DEQ regarding applicable required air permitting for the existing and amended land treatment system.

C. Land treatment facilities that accept Waste Type 06 must meet the location criteria of §507.A.3 and the E and P Waste pretreatment and treatment criteria of §549.C.7.c and d.

D. Approval of Transfer Station Required: The construction and operation of a transfer station must be approved by the commissioner upon submission of a permit application according to the requirements of §521.

E. The commissioner will consider and encourages the electronic submission of applications, data or reports required under this Chapter.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 26:2813 (December 2000), amended LR 27:1901 (November 2001), LR 29:937 (June 2003).

§507. Location Criteria

A. Commercial facilities and transfer stations may not be located in any area:

1. within 1/4 mile of a public water supply water well or within 1,000 feet of a private water supply well for facilities permitted after January 1, 2002;

2. where type A and B facilities and transfer stations, class II disposal wells, storage containers and E and P waste treatment systems and related equipment are located within

500 feet of a residential, commercial, or public building, church, school or hospital or for any proposed new commercial facility or transfer station where publication of the notice of intent or date of the permit application filed with the Office of Conservation is dated after the promulgation date of this rule, where type A and B facilities and transfer stations, class II disposal wells, storage containers and E and P waste treatment systems and related equipment are located within 1,250 feet of a school, hospital, or public park;

3. where the perimeter of any Type A land treatment cell is located within restricted distances from a residential or public building, church, school, or hospital for treatment of Waste Types 06 and 12 as listed below:

Special Conditions	Restricted Distance
Land treatment of Waste Type 06:	
≤ 113 mg/kg total benzene (MPC)	1,000'
Not tested or > 113 mg/kg total benzene (MPC)	2,000'
Land treatment of Waste Type 12	
≤ 3198 mg/kg total benzene (MPC)	2,000'
> 3198 mg/kg total benzene (MPC)	(banned)
Land treatment of all other E and P Waste types	1,000'

4. where the subsurface geology of any proposed injection zone (reservoir) does not exhibit the following characteristics:

- a. adequate thickness and areal extent of the proposed injection zone; and
- b. adequate clay confining beds separating the top of the proposed injection zone and the base of the lowermost underground source of drinking water;

5. where permanent E and P Waste storage containers, land treatment cells, and storm water retention (sediment) ponds are located in a "V" or "A" zone as determined by flood hazard boundary or rate maps and other information published by the Federal Emergency Management Agency (FEMA) unless adequate levees are constructed to at least 1 foot above the 100-year flood elevation as certified by a professional engineer or surveyor and able to withstand the velocity of the 100-year flood. Existing facilities located in a "V" or "A" zone will be required to build facility levees above the 100-year flood elevation as certified by a professional engineer or land surveyor. As conditions change and new data is made available by FEMA, owners of existing commercial facilities and transfer stations will be required to update their facilities accordingly;

6. where such area, or any portion thereof, has been designated as wetlands by the U.S. Corps of Engineers during, or prior to, initial facility application review, unless the applicable wetland and DNR Coastal Management Division coastal use permits are obtained;

7. where other surface or subsurface conditions exist which in the determination of the Commissioner of Conservation would cause the location to pose a threat of substantial, adverse effects on public health or safety or the environment at or near the location.

B. If the owner of the residence or commercial building or the administrative body responsible for the public building, hospital, church or public park waives the distance requirements of §507.A.2 above, such waiver must be in writing, shall contain language acceptable to the commissioner, and shall be included in the permit application.

C. Transfer stations are exempt from the location requirement of 500 feet from a commercial building.

D. Any encroachment upon applicable location criteria after the date the notice of intent is published or the application is filed, whichever is earlier, shall not be considered a violation of this Section.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 26:2817 (December 2000), amended LR 27:1901 (November 2001), LR 29:938 (June 2003), LR 41:951 (May 2015).

§509. Design Criteria

A. Commercial facilities, transfer stations and commercial Class II saltwater disposal wells shall be designed and constructed in such a manner as to prevent the movement of E and P Waste into soil, groundwater aquifers or underground sources of drinking water (USDWs) and to prevent the discharge of E and P Waste materials or E and P Waste byproducts into man-made or natural drainage or directly into state waters unless a discharge permit has been received from the appropriate state or federal agency.

B. Commercial facilities and transfer stations shall be designed and constructed in a manner which is protective of public health, safety and welfare or the environment, surface waters, groundwater aquifers and underground sources of drinking water in accordance with, but not limited to, the following requirements:

- 1. all applicable construction and operational standards of this Chapter, as well as Chapter 2, Chapter 3, and Chapter 4 of LAC 43:XIX, Subpart 1, Statewide Order No. 29-B;
- 2. facility design shall provide for the segregation, separation, and containment of free oil, where appropriate;
- 3. retaining walls (levees) shall be built around all above-ground storage tanks to a level that will provide sufficient capacity to retain the contents of each tank and prevent the release of stored E and P Wastes due to tank leakage, or some other cause;
- 4. spill containment systems shall be built around unloading areas to prevent the escape of any E and P Wastes spilled during off-loading; and
- 5. limited access to E and P Waste transported on land shall be provided by a lockable gate system. The need for a 6-foot chain-link fence around an entire facility or any portion of a facility will be determined after a site investigation by the commissioner or his designated

representative. Gates shall be locked except during the hours a facility is permitted to receive E and P Waste.

C. Land treatment cells shall not exceed 5 acres in size.

D. Except for storm water retention (sediment) ponds at land treatment facilities (§549.C.12) and sumps as defined in §501, earthen or artificially lined pits shall not be constructed or used for storage of E and P Waste at any commercial facility or transfer station.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 26:2817 (December 2000), amended LR 27:1902 (November 2001).

§511. Financial Responsibility

A. Each permitted commercial facility and transfer station must maintain evidence of financial responsibility for any liability for damages which may be caused to any party by the escape or discharge of any material or E and P Waste offsite from the commercial facility or transfer station. Such evidence must be provided by the applicant prior to issuance of a permit. Failure to maintain such evidence shall lead to initiation of procedures for permit suspension. If suspended, the permit shall remain suspended until financial responsibility has been confirmed.

B. Financial responsibility may be evidenced by filing a letter of credit, bond, certificates of deposit issued by and drawn on Louisiana banks, or any other evidence of equivalent financial responsibility acceptable to the commissioner.

C. In no event shall the amount and extent of such financial responsibility be less than the face amounts per occurrence and/or aggregate occurrences as set by the commissioner below:

1. \$500,000 minimum financial responsibility for any commercial facility (excluding transfer stations) which stores, treats or disposes of E and P Waste solids (i.e. oil- or water-base drilling fluids, etc.); or

2. \$250,000 minimum financial responsibility for a commercial salt water disposal facility which utilizes underground injection and a closed storage system; and

3. \$100,000 minimum financial responsibility for each transfer station operated in conjunction with a legally permitted commercial facility subject to the guidelines of this Section.

NOTE: The commissioner retains the right to increase the face amounts set forth above as needed in order to prevent waste and to protect public health, safety, and welfare or the environment.

D. If insurance coverage is proposed and accepted to meet the financial responsibility requirement, it must be provided by an insurer that is licensed to transact the business of insurance, or eligible to provide insurance as an excess of surplus lines insurer, in one or more states, and is authorized to conduct insurance business in the state of Louisiana.

1. For a commercial facility which operates land treatment cells, such insurance must provide sudden and accidental pollution liability coverage as well as environmental impairment liability coverage.

2. For any commercial facility or transfer station which does not operate land treatment cells, such insurance must provide sudden and accidental pollution liability coverage.

E. Proof of insurance must be provided by a certificate of liability insurance which must be worded as follows, except that the instructions in brackets are to be replaced with the relevant information and the brackets deleted.

**Commercial Facility
Certificate of Liability Insurance**

1. [Name of Insurer], (the "Insurer") of [address of Insurer] hereby certifies that it has issued liability insurance covering bodily injury and property damage to [name of insured], (the "insured"), of [address of insured] in connection with the insured's obligation to demonstrate financial responsibility under LAC 43:XIX.511. The coverage applies at [site code or address for each facility] for [insert "sudden and accidental pollution liability" or "environmental impairment"]. The limits of liability are [insert the dollar amount of "each occurrence" and "annual aggregate" limits of the Insurer's liability], exclusive of legal defense costs. The coverage is provided under policy number _____, issued on [date]. The effective date of said policy is [date].

2. The insurer further certifies the following with respect to the insurance described in LAC 43:XIX.511.E.1.

a. Bankruptcy or insolvency of the insured shall not relieve the insurer of its obligation under the policy.

b. The insurer is liable for the payment of amounts within any deductible applicable to the policy, with a right of reimbursement by the insured for any such payment made by the insurer. This provision does not apply with respect to that amount of any deductible for which coverage is demonstrated.

c. Whenever requested by the Commissioner of Conservation, the insurer agrees to furnish to the commissioner a signed duplicate original of the policy and all endorsements.

d. Cancellation of the insurance, whether by the insurer, the insured, a parent corporation providing insurance coverage for its subsidiary, or by a firm having an insurable interest in and obtaining liability insurance on behalf of the owner or operator of the commercial facility or transfer station, will be effective only upon written notice and only after the expiration of 60 days after a copy of such written notice is received by the Commissioner of Conservation.

e. Any other termination of the insurance will be effective only upon written notice and only after the expiration of 30 days after a copy of such written notice is received by the Commissioner of Conservation.

I hereby certify that the wording of this instrument is identical to the wording specified in LAC 43:XIX.511.E as such regulation was constituted on the date this certificate was issued, as indicated below, and that the insurer is licensed to transact the business of insurance, or eligible to provide insurance as an excess of surplus lines insurer, in one or more states, and is authorized to conduct insurance business in the state of Louisiana.

[Signature of authorized representative of Insurer]
[Type name]
[Title], Authorized Representative of [Name of Insurer]
[Address of Representative]
DATE OF ISSUANCE: _____.

F. A commercial facility or transfer station application shall contain documentation of the method by which proof of financial responsibility will be provided by the applicant. Where applicable, the application must include copies of a draft letter of credit, bond, or any other evidence of financial responsibility acceptable to the commissioner.

G. Documentation of financial responsibility must be submitted to and approved by the commissioner prior to beginning construction.

H. Financial responsibility must be renewable on April 1 of each year. Documentation that the required financial responsibility has been renewed must be received by March 15 of each year or procedures to initiate permit suspension will be initiated. If suspended, the permit shall remain suspended until insurance coverage has been confirmed.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 26:2819 (December 2000), amended LR 27:1902 (November 2001), LR 29:938 (June 2003), LR 34:1421 (July 2008).

§513. Provisions for Adequate Closure

A. All offsite commercial facilities and transfer stations under the jurisdiction of the Office of Conservation shall be closed in a manner approved by the commissioner to insure protection of the public, the environment, groundwater aquifers and underground sources of drinking water. A plan for closure must be developed in accordance with the requirements of the commissioner.

B. Each permitted commercial facility and transfer station shall maintain a bond or irrevocable letter of credit on file with the Office of Conservation to provide for adequate closure of the facility. The bond or letter of credit must be renewable on October 1 of each year.

C. Closure bond or letter of credit amounts will be reviewed each year prior to the renewal date according to the following process.

1. A detailed cost estimate for adequate closure of each permitted commercial facility or transfer station shall be prepared by an independent professional consultant and submitted to the commissioner on or before February 1 of each year.

2. The closure plan and cost estimate must include provisions or closure acceptable to the commissioner and must be designed to reflect the costs to the Office of Conservation to complete the approved closure of the facility.

3. Upon review of the cost estimate, the commissioner may increase, decrease or allow the amount of the bond or letter of credit to remain the same.

4. Documentation that the required closure bond or letter of credit has been renewed must be received by September 15 of each year or the commissioner shall initiate procedures to take possession of the funds guaranteed by the bond or letter of credit and suspend or revoke the permit

under which the facility is operated. Any permit suspension shall remain in effect until renewal is documented.

D. The commissioner may consider the submission of other financial documents on a case-by-case basis to comply with the requirements of this Section.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 26:2819 (December 2000), amended LR 27:1903 (November 2001).

§515. E and P Waste Management and Operations Plan

A. All existing commercial facilities and transfer stations must maintain an E and P Waste management and operations plan (WMOP, Plan) on file with the Office of Conservation.

B. The plan must be updated as necessary or at the request of the commissioner to take into consideration any changes or modifications made at the facility.

C. The plan must describe the methods by which activities at the facility are monitored to insure compliance with the applicable requirements of this Chapter and Chapters 1, 3 and 4 of LAC 43:XIX, Subpart 1, Statewide Order No. 29-B.

D. For existing commercial facilities and transfer stations, a WMOP shall be submitted to the Office of Conservation within 180 days of promulgation of this requirement.

E. For new commercial facilities and transfer stations, a WMOP must be submitted with the application.

F. At a minimum, a WMOP shall contain the following information:

1. volume, rate of application/treatment and types of E and P Wastes to be received, stored, treated and/or disposed at each commercial facility or transfer station; a complete explanation of procedures for witnessing the receipt, sampling, and testing of E and P Wastes (E and P Waste acceptance policy) to assure that only permitted E and P Wastes are accepted, in compliance with the requirements of §545; and a detailed explanation of the storage, treatment and disposal system and related equipment to be utilized;

2. a contingency plan for reporting, responding to and cleaning up spills, leaks, and releases of E and P Wastes or treatment byproducts, including provisions for notifying applicable local, state and federal emergency response authorities and for taking operator-initiated emergency response actions;

3. a plan for routine inspection and maintenance of monitoring equipment (e.g., gauges, monitor wells, etc.) to ensure and demonstrate compliance with permit and regulatory requirements;

4. commercial land treatment facilities must provide the following information:

NATURAL RESOURCES

a. a groundwater and facility monitoring plan to comply with the applicable requirements of this Chapter;

b. specific plans for preventing or minimizing air emissions from sources such as the volatilization of organic materials (e.g., benzene) and/or hydrogen sulfide in E and P Waste, particulate matter (dust) carried by the wind, periodic removal and subsequent handling of free oil, and chemical reactions (e.g., production of hydrogen sulfide from sulfur-bearing E and P Wastes);

c. the plan shall address short-term and long-term distribution of Waste Type 06 on land treatment cells to prevent excessive 'same cell' loading of this E and P Waste Type;

d. a reuse stockpile management plan (see §565.G);

e. plans to comply with the location criteria of §507.A.3 for land treatment of E and P Waste;

5. a security plan for the facility;

6. a community relations or public information plan; and

7. an environmental, health, and safety plan which describes site sampling methods and procedures to determine the potential risks to public health, safety and welfare or the environment posed by the site. Such plan shall indicate how the facility will comply with the applicable environmental monitoring requirements of this Chapter.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 26:2822 (December 2000), amended LR 27:1904 (November 2001).

§517. Permit Compliance Review

A. Commercial facility and transfer station permits shall be reviewed at least once every five years to determine compliance with applicable permit requirements and conditions. Commencement of the permit review process for each commercial facility and transfer station shall proceed as authorized by the Commissioner of Conservation.

B. At the commissioner's discretion, any commercial facility or transfer station operator may be required to sample and test facility property and/or equipment for NORM and/or parameters established for "soils" in §549.E.2 to assure compliance with closure requirements of §567.A. The commercial facility or transfer station operator must submit a report detailing the results of all onsite sampling and testing in a manner acceptable to the Commissioner of Conservation. Sampling and testing must be performed by an independent professional consultant and third-party laboratory. Testing must be performed by a DEQ certified laboratory in accordance with procedures presented in the Laboratory Manual for the Analysis of E and P Waste (Department of Natural Resources, August 9, 1998, or latest revision).

C. Upon review of the data and as deemed appropriate, administrative steps will be taken to revise or revoke permits.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 26:2823 (December 2000), amended LR 27:1904 (November 2001).

§519. Permit Application Requirements for Commercial Facilities

A. Application and Permit Required

1. Every person who intends to construct and operate a new offsite commercial facility or transfer station, or make a major modification to an existing commercial facility or transfer station, shall file a permit application with the Office of Conservation.

2. A major modification to an existing commercial facility or transfer station permit is one in which the facility requests approval to include FSR fluid operations or make significant technological changes to an existing E and P Waste treatment and/or disposal system, including the construction and operation of additional equipment or systems to treat and/or dispose of E and P Waste streams other than those previously accepted by the facility. A major modification request may include a request to expand an existing commercial facility or transfer station onto adjacent property not previously permitted for E and P Waste disposal activities

3. Examples of minor permit modifications include, but are not limited to, requests to add additional Class II disposal wells to an existing facility, to add treatment equipment to supplement existing equipment, or to add land treatment cells within previously permitted facility boundaries. Minor permit modifications shall be approved administratively.

B. Notice of Intent

1. At least 30 days prior to filing such application, the applicant shall publish a notice of intent to apply. Such notice shall contain sufficient information to identify the following:

a. name and address of the applicant;

b. the location of the proposed facility;

c. the nature and content of the proposed E and P waste stream(s);

d. the method(s) of storage, treatment, and/or disposal to be used.

2. The notice of intent shall be published in the official state journal, the official journal of the parish in which the proposed facility will be located, and in the journal of general circulation in the area where the proposed facility is to be located, if different from the official parish journal.

3. Such notice shall be in bold-face type and not less than one-quarter page in size and shall be published on three separate days in each journal.

C. General Information. Except for the filing and hearing fees, the following general information must be provided in duplicate in each application for approval to operate a commercial facility or transfer station:

1. for a commercial Class II injection/disposal well application, the appropriate nonrefundable application fee(s), in the amount(s) required by Statewide Order No. 29-R-00/01, LAC 43:XIX.701 et seq., or successor regulations. New operators must submit Form OR-1 (Organization Report) to receive a permanent Operator Code number (no fee required);

2. a nonrefundable hearing fee in the amount required by Statewide Order No. 29-R-00/01, LAC 43:XIX.701 et seq., or successor regulations;

3. a list of names, addresses, and telephone numbers of the principal officers of the company or corporation and the names and addresses of local governing authorities;

4. to document compliance with the location criteria of §507.A.2, provide a list of the names and addresses of all property owners, residents, off-set operators and industrial facilities within one quarter-mile of the proposed facility or disposal well. Include copies of waivers required by §507.B, where applicable. Include a map drawn to scale showing the following information:

a. property boundaries of the commercial facility or transfer station;

b. the boundaries and ownership of all land adjacent to the commercial facility or transfer station;

c. the location and identification of all residential, commercial, or public buildings or hospitals within 1/4 mile of the facility property boundaries; and

d. all public water supply wells and private water supply wells within 1 mile of the proposed facility;

5. a detailed schematic diagram of the proposed facility of sufficient scale to show the placement of access roads, buildings, and unloading areas, and the location and identification of all storage tanks, barges, and other containers (including design capacities), treatment system/equipment, levees, flowlines, filters, the Class II disposal well(s), and all other equipment and operational features of the storage, treatment and/or disposal system;

6. for operators proposing the construction and operation of a Class II disposal well, complete the appropriate application form, including all required attachments. To document compliance with the location criteria of §507.A.3, the application must provide strike and dip geologic cross sections intersecting at the location of the disposal well for which a permit is sought. These cross sections must include, at a minimum, available log control, geologic units, and lithology from the surface to the lower confining bed below the injection zone. The sections shall be on a scale sufficient to show the local geology in at least a two-mile radius from the proposed disposal well. The

following information must be included on these cross-sections:

a. the base of underground sources of drinking water (USDWs);

b. the vertical and lateral limits of the proposed injection zone (reservoir);

c. the vertical and lateral limits of the upper and lower confining beds; and

d. the location of faults or other geologic structures;

7. documentation of compliance with the applicable location criteria of §507.A.5 and 6, with regard to flood zones and wetland areas;

8. a copy of the title to the property upon which the facility will be located. If a lease, option to lease or other agreement is in effect on the property, a copy of this instrument shall be included in the application;

9. a parish map of sufficient scale to identify the location of the proposed facility;

10. a topographic map showing the location of the proposed site and any highways or roads that abut or traverse the site, all water courses, flood plains, water wells, and pipelines within one mile of the site boundary;

11. as required in §515, provide a detailed E and P Waste management and operations plan that includes, but is not limited to the proposed method of operation of the facility—and procedures for the receipt, storage, treatment and/or disposal of E and P Wastes;

12. documentation that the facility and/or disposal well will comply with the applicable design criteria of §509;

13. evidence of financial responsibility for any liability for damages which may be caused to any party by the escape or discharge of any material or E and P Waste from the commercial facility or transfer station, in compliance with the requirements of §511. The application shall contain documentation of the method by which proof of financial responsibility will be provided by the applicant. Where applicable, include a copy of a draft letter of credit, bond, or any other evidence of financial responsibility acceptable to the commissioner. Prior to beginning construction, final (official) documentation of financial responsibility must be submitted to and approved by the commissioner;

14. documentation that a bond or irrevocable letter of credit will be provided for adequate closure of the facility, in compliance with the requirements of §513. The application must include the following:

a. a detailed cost estimate for adequate closure of the proposed facility. The cost estimate must include a detailed description of proposed future closure procedures including, but not limited to plugging and abandonment of the disposal well(s) (if applicable), plugging of any monitor wells according to applicable state regulations, closing out any sumps, storm water retention (sediment) ponds, or land treatment cells, removing all surface equipment, and

returning the environment (site) as close as possible to its original state. The closure plan and cost estimate must be prepared by an independent professional consultant, must include provisions for closure acceptable to the commissioner, and must be designed to reflect the costs to the commissioner to complete the approved closure of the facility;

b. a draft irrevocable letter of credit or bond in favor of the state of Louisiana and in a form which includes wording acceptable to the commissioner. Upon completion of the application review process, the commissioner will set the amount of the required bond or irrevocable letter of credit. The bond or letter of credit must be renewable on October 1 of each year and must be submitted to and approved by the commissioner prior to beginning construction;

15. verification that a discharge permit has been obtained from the appropriate state or federal agencies or copies of any applications submitted to such agencies. If a facility does not intend to discharge treated E and P Waste water or other water, a completed and notarized Affidavit of No Discharge, which includes wording acceptable to the commissioner, must be provided;

16. a list of all other licenses and permits needed by the applicant to conduct the proposed commercial activities. Include identification number of applications for those permits or licenses or, if issued, the identification numbers of the permits or licenses;

17. provide the names of all companies currently or formerly owned and/or operated by the applicant (company requesting a permit) and/or the principal officers of the applicant for the receipt, storage, treatment, recycling and/or disposal of E and P Waste or hazardous or nonhazardous industrial or municipal solid waste;

18. provide a list of local, state and/or federal permits currently or formerly held by the applicant and/or any of the principal officers of the applicant for the storage, treatment, recycling and/or disposal of E and P Waste or hazardous or nonhazardous industrial or municipal solid waste;

19. for each permit included on the list required in §519.C.18 above, provide a list of all environmental regulatory violations, if any, cited by applicable local, state or federal regulatory agencies, including all resulting notices of violation, compliance orders, penalty assessments, or other enforcement actions and the current compliance status of each violation. Such list shall include all violations cited within the five years immediately preceding the date of application for a commercial facility or transfer station permit;

20. the names and addresses of the official journal of the parish in which the proposed facility will be located and the journal of general circulation in the area where the proposed facility is to be located, if different from the official parish journal;

21. certification by an authorized representative of the applicant that information submitted in the application is

true, accurate and complete to the best of the applicant's knowledge.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 26:2823 (December 2000), amended LR 27:1905 (November 2001), LR 29:938 (June 2003), LR 36:2570 (November 2010).

§521. Permit Application Requirements for a Transfer Station

A. The application for construction and operation of a transfer station by an existing Louisiana commercial facility permitted by the Office of Conservation shall include, but may not be limited to, the information required in §519.C.

B. The application for construction and operation of a transfer station by the operator of an out-of-state, legally permitted commercial facility shall consist of the following:

1. compliance with the notice of intent requirements of §519.B; and

2. submission of the information required in §519.C.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 26:2823 (December 2000), amended LR 27:1906 (November 2001).

§523. Permit Application Requirements for Land Treatment Systems

A. In addition to the information requested in §519.C above, the information required in this Section must be provided in duplicate in each application for approval of a commercial facility incorporating the use of land treatment cells.

B. A detailed description of the site considered for land treatment with relation to the following:

1. past and present land use;
2. geology/soil properties/hydrogeology;
3. drainage and flood control;
4. hydrologic balance; and
5. highest seasonal groundwater level.

C. A detailed description of the facility design including maps and drawings and a discussion of the following:

1. site layout;
2. proposed waste application technique;
3. drainage control;
4. proposed waste loading rate; and
5. expected facility life.

D. An explanation of the proposed E and P Waste management and operations plan with reference to the following topics:

1. sampling and testing of incoming waste (waste acceptance procedures);
2. method of receiving waste;
3. waste segregation;
4. application scheduling;
5. waste-soil mixing;
6. proposed land treatment cell and groundwater monitoring plan;
7. reuse stockpile management plan (see §565.G); and
8. an air emissions (odor) reduction and monitoring plan that addresses such sources as:
 - a. the volatilization of organic materials and/or hydrogen sulfide in the E and P Waste;
 - b. particulate matter (dust) carried by the wind;
 - c. periodic removal and subsequent handling of free oil; and
 - d. chemical reactions (e.g., production of hydrogen sulfide from sulfur-bearing E and P Wastes).

E. Detailed information concerning closure and post-closure activities and monitoring as follows:

1. proposed closure procedures;
2. post-closure maintenance; and
3. closure and post-closure monitoring.

F. Documentation of compliance with the location criteria of §507.A.4 and 5.

G. Documentation that the land treatment facility operation requirements of §549 can be met.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 26:2823 (December 2000), amended LR 27:1906 (November 2001), LR 29:938 (June 2003).

§525. Permit Application Requirements for Other Treatment and Disposal Options

A. In addition to the information requested in §519.C, the following information required in this Section must be provided in duplicate in each application for approval of a commercial facility incorporating the use of treatment and/or disposal options other than land treatment and as defined in §547.

B. A detailed description of the site with relation to the following:

1. past and present land use;
2. geology/soil properties/hydrogeology;
3. drainage and flood control;
4. hydrologic balance; and

5. highest seasonal groundwater level.

C. A detailed description of the facility design including maps and drawings and a discussion of the following:

1. site layout;
2. proposed waste application technique;
3. drainage control;
4. proposed waste treatment rates; and
5. expected facility life.

D. An explanation of the proposed E and P Waste management and operations plan with reference to the following topics:

1. sampling and testing of incoming waste (waste acceptance procedures);
2. method of receiving waste;
3. waste segregation;
4. proposed waste treatment monitoring plan;
5. reuse stockpile management plan (see §565.G); and
6. air emissions (odor) reduction and monitoring plan that addresses such sources as:

- a. the volatilization of organic materials and/or hydrogen sulfide in the E and P Waste;
- b. particulate matter (dust) carried by the wind;
- c. periodic removal and subsequent handling of free oil; and
- d. chemical reactions (e.g., production of hydrogen sulfide from sulfur-bearing E and P Wastes).

E. Detailed information concerning closure and post-closure activities and monitoring as follows:

1. proposed closure procedures;
2. post-closure maintenance; and
3. closure and post-closure monitoring.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 27:1907 (November 2001), amended LR 29:938 (June 2003).

§527. Permitting Procedures

A. The Office of Conservation will review a new commercial facility or transfer station application within 90 days of receipt and inform the applicant of its completeness.

B. If the application is not complete, the applicant shall be advised of additional information to be submitted for approval or the application shall be returned and the applicant will be required to resubmit the application.

C. Upon acceptance of the application as complete, the Office of Conservation shall set a time and date and secure a location for the required public hearing to be held in the affected parish.

D. The public hearing shall be fact finding in nature and not subject to the procedural requirements of the Administrative Procedure Act. All interested persons shall be allowed the opportunity to present testimony, facts, or evidence related to the application or to ask questions.

E. At least 30 days prior to the hearing, the applicant is required to file six copies of the complete application with the local governing authority of the parish in which the proposed facility is to be located to be made available for public review. Two additional copies of the complete application shall be filed in the parish library closest to the proposed facility.

F. Permit Issuance

1. The commissioner shall issue a final permit decision within 120 days of the close of the public comment period.

2. A final permit decision shall become effective on the date of issuance.

3. A permit to construct a commercial facility or transfer station (and any associated disposal well) will not be granted until a certified copy of a lease or proof of ownership of the property where the proposed facility is to be located is submitted to the Office of Conservation.

4. Approval or the granting of a permit to construct a commercial facility or transfer station (and any associated disposal well) shall be valid for a period of one year and if construction is not completed in that time, the permit shall be null and void. Requests for an extension of this one year requirement may be approved by the commissioner for extenuating circumstances only.

G. The application for construction and operation of a new or additional transfer station by an existing commercial E and P Waste treatment and/or disposal facility permitted by the Office of Conservation to operate within the state of Louisiana shall be administratively approved or denied.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 26:2817 (December 2000), amended LR 27:1907 (November 2001).

§529. Public Notice Requirements

A. Permit Application Public Hearing Notice

1. Upon acceptance of the application as complete, the Office of Conservation shall publish in the next available issue of the *Louisiana Register*, a notice of the filing and the location, date and time of the public hearing to be held in the affected parish. Such public hearing shall not be less than 30 days from the date of notice in the *Louisiana Register*.

2. At least 30 days prior to the scheduled public hearing, the Office of Conservation shall publish a notice of the filing of the application and the location, date and time of the hearing in the official state journal.

3. The applicant shall publish a substantially similar notice in the official journal of the affected parish and in the journal of general circulation in the area where the proposed facility is to be located, if different from the official parish

journal, on three separate days at least 15 days prior to the date of the hearing. Such notice shall not be less than 1/4 page in size and printed in boldface type.

B. Applications submitted on Form UIC-2 SWD (or latest revision) for a new commercial saltwater disposal well or Form UIC-32 (or latest revision) to recomplete a Class II commercial disposal well into a new disposal zone shall be advertised once in the legal ad section of the official state journal, in the official parish journal where the facility is located and in the journal of general circulation in the area where the facility is located, if different from the official parish journal. Such notice shall contain language acceptable to the commissioner and shall allow a 15 day comment period. At their own risk, companies may initiate workover activities prior to the end of the comment period. However, the well may not be utilized for injection until the public comment period has ended, the completion report has been submitted and approved and the well has been successfully tested for mechanical integrity.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 27:1908 (November 2001).

§531. Permitting Conditions

A. The Office of Conservation may refuse to issue, reissue, or reinstate a commercial facility or transfer station permit or authorization to the following:

1. any individual, partnership or other entity which has been found to have violated any provision of LAC 43:XIX.Subpart 1 (Statewide Order No. 29-B) or has other violations which include, but is not limited to, failure to provide for proper closure of an oil, gas or injection well, commercial facility, transfer station and/or other oilfield site, failure to pay all fees, or failure to pay all civil penalties;

2. any individual, partnership, corporation or other entity for which a general partner, an owner of more than 25 percent ownership interest, a trustee, or other individual having direct or indirect control of the entity has held a position of ownership and/or control in another partnership, corporation or other entity which has been found to have violated any provision of LAC 43:XIX.Subpart 1 (Statewide Order No. 29-B) or has other violations which include, but is not limited to, failure to provide for proper closure of an oil, gas or injection well, commercial facility, transfer station and/or other oilfield site, failure to pay all fees, or failure to pay all civil penalties;

3. any individual, partnership, corporation or other entity for which a general partner, an owner of more than 25 percent ownership interest, a trustee, or other individual having direct or indirect control of the entity has held a position of ownership and/or control in another partnership, corporation or other entity which has been found, either contemporaneously with or discovered later, to have submitted false or intentionally misleading reports or responses to the orders of the Office of Conservation.

B. The Office of Conservation may refuse to issue, reissue, or reinstate a commercial facility or transfer station permit or authorization to an individual or entity that has committed a violation of any provision of LAC 43:XIX.Subpart 1 (Statewide Order No. 29-B) or other violations which may subject it to the penalty set forth herein if any one of the following has occurred.

1. An order finding the violation has been entered against the individual or entity and all appeals have been exhausted or the individual or entity has failed to timely and appropriately request a hearing and the individual or entity is not in compliance or on a schedule for compliance with an order.

2. The Commissioner of Conservation and the individual or entity have entered into an agreed order relating to the alleged violation and the individual or entity is not in compliance or on a schedule of compliance with an order.

C. The commissioner may deny an application for a commercial facility or transfer station based upon the regulatory compliance history of the applicant required in §519.C.17, 18 and 19.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation LR 27:1908 (November 2001).

§533. General Operational Requirements for Commercial Facilities and Transfer Stations

A. Commercial facilities and transfer stations shall be operated in compliance with, but not limited to, the following.

1. The area within the confines of tank retaining walls (levees) shall be kept free of debris, trash, and accumulations of oil or other materials which may constitute a fire hazard. Portable gasoline powered engines and pumps must be supervised at all times of operation and stored at least 50' from tank battery firewalls when not in use. Vent lines must be installed on all E and P Waste storage tanks and must extend outside of tank battery firewalls.

2. The area within the confines of tank retaining walls (levees) must be kept free of accumulations of E and P Waste fluids and water. Such fluids shall be properly disposed of by injection into a Class II well or discharged in accordance with the conditions of a discharge permit granted by the appropriate state agency.

3. Tank retaining walls and land treatment cell levees shall be kept free of debris, trash, or overgrowth which would constitute a fire hazard or hamper or prevent adequate inspection.

4. Land treatment cell and associated surface drainage system surfaces shall at no time have an accumulation of oil of more than 1 inch at any surface location.

5. Land treatment cell levels shall be maintained with at least 2 feet of freeboard at all times.

6. Tank retaining walls (levees) must be constructed of soils which are placed and compacted in such a manner as to produce a barrier to horizontal movement of fluids. The levees must be properly tied into the barrier along the bottom and sides of the levees. All levees must be provided with a means to prevent erosion and other degradation.

B. All facilities and systems for treatment, control, and monitoring (and related appurtenances) which are installed or used to achieve compliance with the conditions of a permit shall be properly operated and maintained at all times.

C. Inspection and entry by Office of Conservation personnel shall be allowed as prescribed in R.S. 30:4.

D. Discharges from land treatment cells, tanks, tank retaining walls and/or barges into man-made or natural drainage or directly into state waters will be allowed only after the necessary discharge permit has been obtained from the appropriate state and/or federal agencies and in accordance with the conditions of such permit.

E. A sign shall be prepared, displayed and maintained at the entry of each permitted commercial facility or transfer station. Such sign shall utilize a minimum of 1-inch lettering to state the facility name, address, phone number, and site code shall be made applicable to the activities of each facility according to the following example.

"This E and P Waste (storage, treatment and/or disposal) facility has been approved for (temporary storage, treatment and/or disposal) of exploration and production waste only and is regulated by the Office of Conservation. Violations shall be reported to the Office of Conservation at (225) 342-5515."

F. A vertical aerial color photograph (or series of photographs) with stereoscopic coverage of each Type A land treatment facility must be obtained during the month of October every two years and provided to the Office of Conservation by November 30 of the year the photo is taken. Such photograph(s) must be taken at an original photo scale of 1" = 1000' to 1" = 500' depending on the size of the facility. Photo(s) are to be provided as prints in either 8" x 10" or 9" x 9" formats. The commissioner may require more frequent aerial photos as deemed necessary.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 27:1909 (November 2001).

§535. Notification Requirements

A. Any change in the principal officers, management, or ownership of an approved commercial facility or transfer station must be reported to the commissioner in writing within 10 days of the change.

B. Transfer of Ownership

1. A commercial facility or transfer station permit may be transferred to a new owner or operator only upon approval by the commissioner. The new owner or operator must apply for and receive an operator code by submitting a

NATURAL RESOURCES

completed Form OR-1 (or latest revision) to the Office of Conservation.

2. The current permittee shall submit an application for transfer at least 30 days before the proposed transfer date. The application shall contain the following:

- a. name and address of the proposed new owner (permittee);
- b. date of proposed transfer; and
- c. a written agreement between the existing and new permittees containing a specific date for transfer of permit responsibility, financial responsibility, and liability between them.

3. If no agreement described in §535.B.2.c above is provided, responsibility for compliance with the terms and conditions of the permit and liability for any violation will shift from the existing permittee to the new permittee on the date the transfer is approved.

C. Commercial facility and transfer station operators shall give written notice to the commissioner of any planned physical or operational alterations or additions to a permitted facility or proposed changes in the E and P Waste management plan. Requests to make such changes must be submitted to and approved by the commissioner prior to beginning construction or accomplishing the change by other means.

D. The operator of a newly approved commercial facility, transfer station, and/or disposal well must notify the commissioner when construction is complete. The operator shall not commence receiving E and P Waste or injecting E and P Waste fluids until the facility has been inspected for compliance with the conditions of the permit and the disposal well has been tested for mechanical integrity.

E. An operator of a commercial facility or transfer station shall report to the commissioner any noncompliance, including but not limited to those which may endanger public health, safety or welfare or the environment, including, but not limited to, impacts to surface waters, groundwater aquifers and underground sources of drinking water, whether onsite or offsite. Such notice shall be made orally within 24 hours of the noncompliance and followed by written notification within five days explaining details and proposed methods of corrective action.

F. When a commercial facility or transfer station operator refuses to accept a load of unauthorized waste (not meeting the definition of E and P Waste), the Office of Conservation shall be notified immediately by electronic submission (facsimile) of a completed Form UIC-26 and the manifest which accompanied the shipment of unauthorized waste or otherwise provide the names of the generator and transporter of the unauthorized waste.

G. The operator of a commercial salt cavern E and P Waste storage well and facility shall provide a corrective action plan to address any unauthorized escape, discharge or release of any material, fluids, or E and P Waste from the well or facility, or part thereof. The plan shall address the cause, delineate the extent, and determine the overall effects

on the environment resulting from the escape, discharge or release. The Office of Conservation shall require the operator to formulate a plan to remediate the escaped, discharged or released material, fluids or E and P Waste if the material, fluids, or E and P Waste is thought to have entered or has the possibility of entering an underground source of drinking water.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 27:1909 (November 2001), amended LR 29:938 (June 2003).

§537. Hours of Receiving

A. Commercial facilities and transfer stations shall be adequately manned during hours of receiving and shall receive E and P Waste by truck only between the hours of 6 a.m. and 9 p.m., Central Time, except as provided in §537.B. below.

B. The commissioner may grant approval for after hours (nighttime) receipt of E and P Waste by a commercial facility or transfer station (by truck) when an emergency condition exists which may endanger public health or safety or the environment and to minimize the potential for same. Generators shall be responsible for obtaining prior approval for nighttime disposal by calling the Office of Conservation at (225) 342-5515. When such approval has been granted, the Office of Conservation shall notify the commercial facility or transfer station which will receive the E and P Waste and may notice the state police.

C. Commercial facilities and transfer stations with barge terminals may receive E and P Waste transported by barge on a 24-hour a day basis.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 27:1910 (November 2001), amended LR 31:2262 (September 2005).

§539. Monitoring Requirements for Commercial Class II Injection Wells

A. Except during approved workover operations, a positive pressure of no less than 100 psi shall be maintained on the well annulus at all times. An injection volume recorder (tamper proof meter) must be installed and properly maintained on the injection line of each disposal well system. Injected volumes must be recorded monthly and the readings reported monthly on the Commercial Class II Daily Monitoring Log (Form UIC-21, or latest revision) and annually on the annual injection well report.

B. Except during approved workover operations, wells shall be equipped with pressure gauges located on the wellhead, and situated so as to monitor the pressure of the injection stream and the pressure of the annular space between the casing and the injection string.

C. The pressure gauges shall have half-inch fittings, be scaled in increments of not more than 10 psi, and be maintained in good working order at all times.

D. A daily pressure monitoring log shall be maintained by the operator of the facility and shall contain, as a minimum, the following information:

1. the date;
2. the operator's name and address;
3. the well name, number and serial number;
4. the monitored injection pressure;
5. the monitored annulus pressure;
6. whether or not the well was injecting at the time the pressures were recorded; and
7. the name or initials of the person logging the information.

E. The pressure gauges shall be read and pressures recorded in the daily log.

F. The daily log information shall be recorded on the appropriate form and submitted to the Office of Conservation within 15 days of the end of each month.

G. Any discrepancies in the monitored pressures, which would indicate a lack of mechanical integrity and constitute noncompliance with applicable Sections of this Chapter, shall be reported orally to the Office of Conservation within 24 hours.

H. The commissioner may require, on a case-by-case basis, the installation of a 24-hour chart recorder to monitor injection pressures, injection rates, annulus pressure and injected volumes.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 27:1910 (November 2001).

§541. Sampling and Testing Requirements for Commercial Facilities with Monitor Wells

A. At the discretion of or as determined by the commissioner, monitor wells may be required to be installed at any commercial facility or transfer station.

B. Water samples from monitor wells shall be sampled by an independent professional consultant and analyzed by an independent testing laboratory. Samples shall be analyzed for pH, electrical conductivity (EC), chloride (Cl), sodium (Na), total dissolved solids (TDS), total suspended solids (TSS), total petroleum hydrocarbons (TPH-ppm), total benzene, As, Ba, Cd, Cr, Cu, Pb, Hg, Mo, Ni, Se, Ag, and Zn.

C. Water from newly constructed monitor wells on new commercial facilities shall be sampled and analyzed prior to receipt of E and P Waste by the facility to provide baseline data for the monitoring system. This data shall be submitted to the Office of Conservation to be made part of the facility's permanent file.

D. Water from monitor wells on existing facilities shall be sampled and analyzed on a quarterly basis, with a copy of the analysis submitted to the Office of Conservation within 15 days of the end of each quarter.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 27:1910 (November 2001).

§543. Receipt, Sampling and Testing of Exploration and Production Waste

A. Only E and P Waste (as defined in §501) from approved generators of record may be received at commercial facilities and transfer stations. Other generators of E and P Waste must receive written approval of the Office of Conservation in order to dispose of approved E and P Waste at a commercial facility or transfer station.

B. For screening purposes and before offloading at a commercial facility or transfer station, each load of E and P Waste shall be sampled and analyzed (by facility personnel) for the following parameters:

1. pH, electrical conductivity, chloride (Cl) content;
2. NORM, as required by applicable DEQ regulations and requirements.

C. The commercial facility or transfer station operator shall enter the pH, electrical conductivity, and chloride (Cl) content on the manifest (Form UIC-28, or latest revision) which accompanies each load of E and P Waste.

D. An 8-ounce sample (minimum) of each load must be collected and labeled with the date, operator and manifest number. Each sample shall be retained for a period of 30 days.

E. Records of these tests performed pursuant to the requirements of this Section shall be kept on file at each facility for a period of three years and be available for review by the commissioner or his designated representative.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation LR 27:1911 (November 2001).

§545. Manifest System

A. In order to adequately monitor the movement and disposal of E and P Waste, every shipment of E and P Waste transported to a commercial facility or transfer station shall be accompanied by a manifest entitled "E and P Waste Shipping Control Ticket." It is expressly forbidden to transport or accept E and P Waste without a properly completed manifest form, with the following exception: commercial facilities and transfer stations shall be allowed to accept E and P Waste when the Public Service Commission Permit Code Box found in Part II of the E and P Waste Shipping Control Ticket is either empty or improperly completed, so long as the remainder of the manifest, including the remainder of Part II, is properly completed.

B. For companies who do not possess an Office of Conservation operator code number, Form UIC-23 (or latest revision) must be approved prior to transporting E and P

Waste (including Waste Type 99) to a commercial facility or transfer station.

C. For those generators who do possess an operator code number, authorization must be obtained prior to transporting Waste Type 99 to a commercial facility or transfer station.

D. At the time of transport, the generator shall initiate the manifest by completing and signing Part I. After the transporter completes and signs Part II, the generator shall retain Generator Copy No. 1 (green) for his files. All other copies shall accompany the E and P Waste shipment.

E. Upon delivery of the E and P Waste, the commercial facility or transfer station shall complete and sign Part III of the manifest. The transporter shall then retain the transporter's copy (pink) for his files.

F. Upon completion of the manifest, the commercial facility or transfer station operator shall mail Generator Copy No. 2 to the generator.

G. The original manifest for each load of E and P Waste received must be retained by the commercial facility or transfer station operator and stored in a secure and accurate filing system. In order to be available for review during site inspections, the manifests for the current months E and P Waste receipts and the prior months E and P Waste receipts must be maintained at the waste disposal facility (commercial facility or transfer station site) where the E and P Waste (and the manifest) was received (destination of the waste).

H. Original manifests must be retained for a period of not less than three years in a manner acceptable to the Commissioner of Conservation and made available for review or submitted to the Office of Conservation upon request.

I. The generator and transporter operator shall maintain file copies of completed manifests for a period of not less than three years.

J. Oil and gas, commercial facility, and transfer station operators who transport E and P Waste out-of-state to a permitted disposal facility or receive E and P Waste from out-of-state must comply with the manifest system requirements of this Section.

K. A monthly report of E and P Waste receipts shall be completed by each commercial facility, transfer station or DEQ permitted facility as defined by LAC 33:V and VII (that receives E and P Waste) on Form UIC-19, or latest revision, and submitted to the Office of Conservation within 15 days of the end of each month.

L. A commercial facility or transfer station shall forward, by facsimile, a copy of any manifest accepted with an empty or improperly completed Public Service Permit Code Box to the Office of Conservation within 24 hours of its receipt. The commercial facility or transfer station shall mail the manifest to the Office of Conservation, immediately following its delivery via facsimile.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 27:1911 (November 2001), amended LR 36:1017 (May 2010).

§547. Commercial Exploration and Production Waste Treatment and Disposal Options

A. Commercial facilities and transfer stations may be permitted to conduct one or more of the following acceptable commercial E and P Waste treatment and disposal options.

1. Class II Injection Well. Produced salt water is required to be disposed by injection into a Class II well pursuant to the requirements of Chapter 4 of LAC 43:XIX. Other E and P Waste fluids may be injected into a Class II well upon approval of the Office of Conservation. Class II wells may be operated in conjunction with other treatment and disposal options. The requirements for permitting a Class II well are found in Chapter 4 of these regulations (LAC 43:XIX.401 et seq.).

2. Class II Well Slurry Fracture Injection. The process of mixing E and P Waste solids with fluids for subsurface injection. The solids/fluids mixture (slurry) is then pumped at or above fracture gradients into a suitably characterized subsurface reservoir. A series of fractures are created forming a sphere around the perforated interval. These fractures grow at different orientations around the wellbore and constitute the disposal domain. Slurry fracture injection can only be approved when appropriate regulations are adopted/promulgated.

3. Land Treatment. A dynamic process involving the controlled application of E and P Waste onto or into the aerobic surface soil horizon by a commercial facility, accompanied by continued monitoring and management, to alter the physical, chemical, and biological state of the E and P Waste. Site, soil, climate, and biological activity interact as a system to degrade and immobilize E and P Waste constituents thereby rendering the area suitable for the support of vegetative growth and providing for beneficial future land use or to meet the reuse criteria of §565. The requirements for permitting a land treatment system are found in §519.C and §523.

4. Phase Separation. The process of treating or pretreating oil and gas E and P Waste by physical and/or chemical methods which separate the fluid (water), solid, and oily fractions. Such process can be accomplished by any number of methods, including, but not limited to the use of a centrifuge, belt-press, flocculation, or other methods. The fractions are then further treated or disposed by other acceptable methods. Fluids generally are required to be disposed of into a Class II disposal well. Solids may be further treated or disposed of by one of the options listed herewith. Oil may be sent to a salvage oil reclaimer or sold to a refiner. The equipment and processes utilized in phase separation of E and P Waste must be described in detail in the permit application.

5. Thermal Desorption. The process of heating E and P Waste in an enclosed chamber under either oxidizing or non-oxidizing atmospheres at sufficient temperature and

residence time to vaporize organic contaminants from contaminated surfaces and surface pores and to remove the contaminants from the heating chamber in a gaseous exhaust system. The equipment and processes utilized in thermal desorption of E and P Waste must be described in detail in the permit application. The criteria for treatment of E and P Waste by thermal desorption will be set on a case-by-case basis.

6. Cavern Disposal. The utilization of a solution-mined salt cavern for the disposal of E and P waste fluids and solids. Applicants for permits and operators of commercial E and P waste salt cavern disposal wells must comply with the requirements of this Chapter (LAC 43:XIX.501 et seq.) and the applicable requirements of Statewide Order No. 29-M-2, LAC 43:XVII, 3101 et seq. (see §555).

7. Incineration. The burning of organic E and P Waste materials. This treatment/disposal technique is used to destroy organic compounds with the reduction of the material to its mineral constituents. The equipment and processes utilized to incinerate E and P Waste must be described in detail in the permit application. The criteria for treatment of E and P Waste by incineration will be set on a case-by-case basis.

8. Solidification (Chemical Fixation). The addition of agents to convert liquid or semi-liquid E and P Waste to a solid before burial to reduce leaching of E and P Waste material and the possible migration of the E and P Waste or its constituents from the facility. The equipment and processes utilized to solidify E and P Waste must be described in detail in the permit application. The criteria for treatment of E and P Waste by solidification will be set on a case-by-case basis.

9. Stabilization (Chemical Fixation). An E and P Waste treatment process that decreases the mobility or solubility of E and P Waste constituents by means other than solidification. Examples of stabilization techniques include chemical precipitation or pH alteration to limit solubility and mixing of E and P Waste with sorbents such as fly ash to remove free liquids. The equipment and processes utilized to stabilize E and P Waste must be described in detail in the permit application. The criteria for treatment of E and P Waste by stabilization will be set on a case-by-case basis.

B. The Office of Conservation will consider new and innovative treatment and/or disposal options on a case-by-case basis. The equipment and processes utilized by technologies other than those listed above to treat or dispose of E and P Waste must be described in detail in the permit application. The criteria for treatment of E and P Waste by other technologies will be set on a case-by-case basis.

C. Produced water (Waste Type 01—saltwater) is subject to the disposal restrictions of §503.C.

D. Waste Types 02, 03, 04, 05, 06, 07, 08, 09, 10, 11, 14, 15, 16, and 99 (and associated washwater) may be treated and disposed by land treatment methods in accordance with the buffer (location) requirements of §507.A.3.

E. Waste Type 12 and wash water (Waste Type 10) generated in the cleaning of vessels containing Waste Type 12 may not be land treated unless the MPC requirements of §503.F and G and §549.C.7.a are met.

F. All E and P Waste types may be treated or disposed by Class II slurry fracture injection, phase separation, thermal desorption, cavern disposal, incineration, solidification or stabilization methods.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 27:1911 (November 2001), amended LR 29:938 (June 2003), LR 34:1421 (July 2008).

§549. Land Treatment Facility Requirements

A. Land treatment facilities shall be isolated from contact with public, private, or livestock water supplies, both surface and underground.

B. The siting, design, construction, operation, testing and closure of land treatment facilities shall be approved only after an application is submitted to and approved by the commissioner pursuant to the requirements of §519, §527, and §531.

C. General Requirements

1. The soil shall contain a slowly permeable horizon no less than 12 inches thick containing enough fine grained material within 3 feet of the surface to classify it as CL, OL, MH, CH, or OH under the Unified Soil Classification System.

2. The seasonal high water table shall be maintained throughout the facility's operational life at least 36" below the soil surface, either as a result of natural or artificial drainage.

3. Throughout the operational life of a land treatment cell, in order to end the treatment phase and re-enter the application phase, a cell must be shown to comply with the following criteria.

Parameter	Limitation
PH	6.5 - 9
EC	10 mmhos/cm
SAR	12
ESP	15 percent
TPH	3 percent (by weight)
Metals (ppm)	
Arsenic	40
Cadmium	10
Chromium	1,000
Copper	1,500
Lead	300
Molybdenum	18
Nickel	420
Mercury	10
Selenium	10
Silver	200
Zinc	2,300
Leachate Testing*	
Barium	10.0 mg/l

*The Leachate testing method for Barium is included in the *Laboratory Manual for the Analysis of E and P Waste*

NATURAL RESOURCES

(Department of Natural Resources, August 9, 1988, or latest version).

4. The concentration of measured constituents in any groundwater aquifer shall at no time significantly exceed background water quality data.

5. Fluids collected in a land treatment cell underdrain system shall be monitored to provide early warning of possible migration of mobile E and P Waste constituents. The monitoring program shall be defined in the permit application or the facility E and P Waste management and operations plan.

6. An independent professional consultant and laboratory shall perform the necessary monitoring to assure adherence to the requirements of this Section.

7. E and P Waste Pretreatment and Treatment

a. Waste Type 12 which contains a concentration of total benzene equal to or less than 3198 mg/kg total benzene (MPC) may be placed on land treatment cells without pretreatment. However, in treating such E and P Waste, the commercial land treatment facility must meet the location criteria of §507.A.3.

b. Land treatment facilities which have been approved to receive Waste Type 12 which contain more than 3198 mg/kg total benzene must pretreat the E and P Waste to a concentration less than or equal to 3198 mg/kg total benzene (MPC) before placing the E and P Waste on a land treatment cell (see §505.B).

c. Waste Type 06 which has been tested and found to contain a total benzene concentration less than or equal to 113 mg/kg (MPC) may be land treated no closer than 1,000' from a residential or public building, church, school, or hospital.

d. Waste Type 06 which has not been tested or tested and found to contain a total benzene concentration greater than 113 mg/kg (MPC) must be land treated no closer than 2,000' from a residential or public building, church, school, or hospital.

e. Free/visible oil must be removed from all E and P Waste prior to loading on a land treatment cell.

f. Produced saltwater and gas plant waste fluids, must not be disposed of by land treatment. If pretreated prior to disposal (e.g., filtered or otherwise phase separated) fluids must be injected into a Class II well.

8. Application Phase

a. E and P Waste may be applied to active land treatment cells during the application phase only. An application phase begins only under the following conditions:

i. a new constructed and approved cell begins receipt of E and P Waste;

ii. a cell containing treated E and P Waste has been shown to meet the testing criteria of §549.C and is utilized for the application of new E and P Waste receipts;

iii. a cell from which treated E and P Waste has been removed (after meeting the reuse testing criteria of §565) is utilized for the application of new E and P Waste receipts.

b. An application phase ends when either one of the following occurs:

i. three months have elapsed since the date application first began, unless an exception is granted upon proof of good cause under the provisions of §569; or

ii. 15,000 bbls/acre of E and P Waste has been applied to a cell.

c. In order to document the amount of E and P Waste applied to each land treatment cell, commercial facilities are required to:

i. indicate on each manifest (E and P Waste shipping control ticket) the number of the cell onto which each load of E and P Waste is applied;

ii. maintain a daily or weekly log of type and volume of E and P Wastes applied to each land treatment cell and the activities undertaken to bring each cell into compliance; and

iii. include in the quarterly report the amount of each type of E and P Waste applied to each cell and the activities undertaken to bring each cell into compliance during the quarter.

9. Treatment Phase. Upon completion of the application phase, land treatment cells enter the treatment phase. Remedial action (treatment) must be actively performed in order to bring a cell into compliance with this Section. Cells must reach compliance status within 24 months of the end of the application phase.

10. Land treatment cell levees must be constructed of soils which are placed and compacted in such a manner as to produce a barrier to horizontal movement of fluids. Levee construction material shall be compacted in a maximum of 8" lifts to > 90 percent standard proctor test. The levees must be properly tied into the barrier along the bottom and sides of the cells. Actual construction of the levees must be monitored and documented by professional engineering or geotechnical soil testing company. All levees must be provided with a means to prevent erosion and other degradation.

11. Rainwater and other E and P Waste fluids are not to be stored on land treatment cells. Such fluids are to be removed from cells in a timely manner and stored in appropriate facilities. Such fluids may only be used for removal of salts during the treatment phase. Otherwise, cells must remain free of excessive fluids.

12. Storm water retention (sediment) ponds constructed after January 1, 2002 must be constructed in compliance with the liner requirements for produced water pits in LAC 43:XIX.307.A and the land treatment levee requirements of §549.C.10 above. Such ponds must not have an accumulation of oil at any surface location.

D. Monitoring Requirements

NOTE: References for the parameters required in this Section are listed as follows.

EC—electrical conductivity (millimhos/cm for soil, micromhos/cm for water)
 SAR—sodium adsorption ratio
 ESP—exchangeable sodium percentage (percent)
 CEC—cation exchange capacity (milliequivalents/100 gm soil)
 TPH—total petroleum hydrocarbons (ppm)
 Total benzene (ppm)
 TCLP benzene (Toxicity Characteristic Leaching Procedure—ppm)
 Total metals as follows:
 As—arsenic
 Ba—barium
 Cd—cadmium
 Cr—chromium
 Cu—copper
 Pb—lead
 Hg—mercury
 Mo—molybdenum
 Ni—nickel
 Se—selenium
 Ag—silver
 Zn—zinc
 TDS—total dissolved solids
 TSS—total suspended solids
 Soluble cations:
 Na—sodium
 Ca—calcium
 Mg—magnesium
 Soluble anions:
 CO₃—carbonate
 HCO₃—bicarbonate
 Cl—chloride
 SO₄—sulfate

1. Prior to the receipt of E and P Waste in a newly permitted and constructed land treatment system or cell, baseline data must be provided by the following sampling and testing program.

a. Soil in the treatment zone (0-24") of each cell must be sampled for the following parameters: pH, EC, SAR, ESP, CEC, TPH, As, barium leachate, Cd, Cr, Cu, Pb, Hg, Mo, Ni, Se, Ag, and Zn.

b. Groundwater must be sampled and tested for the following parameters: pH, EC, TDS, TSS, TPH, Cl, Total Benzene, Na, As, Ba, Cd, Cr, Cu, Pb, Hg, Mo, Ni, Se, Ag, and Zn.

c. Water from land treatment cell underdrain systems must be sampled and tested for the following parameters: TDS, pH, Na, Cl, EC, TPH, total benzene, Ba, Pb, Zn, and reactive sulfides.

2. The following monitoring program must be conducted during the active life of a permitted E and P Waste land treatment system.

a. Soil in the treatment zone (waste treatment zone—WTZ and upper treatment zone—UTZ) must be sampled and tested quarterly to determine E and P Waste degradation and accumulation of metals and hydrocarbons. Samples must be analyzed for the following: As, barium leachate, Cd, Cr, Cu, Pb, Hg, Mo, Ni, Se, Ag, Zn, and TPH.

b. Soil in the treatment zone (waste treatment zone—WTZ and upper treatment zone—UTZ) must be sampled and tested quarterly to determine the accumulation of salts and to provide data for determining necessary soil amendments. Samples must be analyzed for the following: pH, EC, SAR, ESP, CEC, soluble cations (Na, Ca, Mg), and soluble anions (CO₃, HCO₃, Cl, SO₄).

c. Discharge Water. A copy of each discharge monitoring report made in conformance with any applicable state and/or federal regulatory program shall be furnished to the Office of Conservation on a timely basis.

d. Land treatment cell underdrain systems must be sampled and tested quarterly to determine the presence of mobile constituents. Sampling and testing shall be performed on a quarterly basis. A composite of at least three samples per management unit (or cell if applicable) are to be analyzed for the following: TDS, pH, Na, Cl, EC, TPH, total benzene, Ba, Pb, Zn and reactive sulfides. If total benzene exceeds an action level of 0.5 ppm, the commissioner may require further assessment and testing as deemed appropriate.

e. Groundwater levels in monitor wells shall be measured monthly for a period of two years to determine seasonal fluctuation in water table. Water level shall be measured quarterly each year thereafter.

f. Groundwater from monitor wells shall be sampled quarterly to determine the impact of facility operation on groundwater. Prior to obtaining discreet representative samples, each well must be purged in accordance with EPA guidance. A composite of at least two samples per well shall be tested for the following parameters: TDS, TSS, pH, Cl, Na, EC, TPH, total benzene, As, Ba, Cr, Pb, and Zn.

g. Quarterly monitoring reports must be submitted to the Office of Conservation according to the following schedule: 1st Quarter—due March 31; 2nd Quarter—due June 30; 3rd Quarter—due September 30; 4th Quarter—due December 31. Each quarterly report must contain the following information:

i. the status of each cell at the time of the sampling event (application phase, treatment phase, inactive, etc.), the date(s) sampling took place, and a diagram indicating sample locations for each cell;

ii. the amounts and types of E and P Waste applied to each cell during the application phase, including the beginning and ending dates of application;

iii. a brief description of treatment activities undertaken to bring each cell into compliance with the criteria of this Section, including the status of fluids (salts) removal from each cell;

iv. a compilation (chart) of test results for the present and past three quarterly sampling events;

v. copies of current laboratory test data;

vi. the size of each land treatment cell (in acres);

NATURAL RESOURCES

vii. a compilation (chart) of water depth measurements of monitor well water levels calculated from the top of casing;

viii. a potentiometric surface map contoured with water level elevations from mean sea level.

h. The Office of Conservation may approve an alternative monitoring program upon receipt of evidence that such procedure shall provide adequate monitoring during the active life of a facility.

3. Sampling and Testing Requirements

a. A stratified random sampling system shall be used to determine soil sampling locations in land treatment cells. All cells and monitor wells are to be sampled and tested for all parameters unless otherwise approved by the commissioner. Facilities are required to notify the Office of Conservation at least one week in advance of each quarterly sampling event in order for a representative of this office to be present.

b. Soil samples in land treatment cells shall be taken in the waste treatment zone (WTZ) and the upper treatment zone (UTZ). Over time, the depth of the treatment zone sampled may need to be increased due to solids buildup on land treatment cells. The degree of E and P Waste incorporation shall be noted at the time of sampling.

c. At least two samples must be taken from WTZ and UTZ for each acre of cell area.

d. Soil samples are to be analyzed using standard soil testing procedures as presented in the Laboratory Manual for the Analysis of E and P Waste (Department of Natural Resources, August 9, 1988, or latest revision).

e. Water samples are to be analyzed for required parameters according to acceptable EPA guidelines and/or the laboratory procedures as presented in the Laboratory Manual for the Analysis of E and P Waste (Department of Natural Resources, August 9, 1988, or latest revision).

f. The soil in an inactive cell may not be required to be tested for certain quarterly monitoring parameters only after two consecutive quarterly tests indicate compliance and upon receipt of written approval of this office.

E. Closure and Post-Closure Monitoring

1. Operators of land treatment systems shall submit closure and post-closure maintenance and monitoring programs to the Office of Conservation for approval. The monitoring program shall address sampling and testing schedules for soil in the treatment zone, water collected from the unsaturated zone monitoring system, surface runoff water, and groundwater.

2. Sampling and testing must be performed during the entire closure and post-closure periods. To certify closure of a land treatment system, water collected from the unsaturated zone monitoring system and groundwater must meet background water quality values; in addition, soils in the treatment zone and surface runoff water must meet the following criteria.

Parameter	Criteria	No. of Consecutive Samples
Soils in the Treatment Zone		
PH	6.5 - 9	2
TPH	≤ 3.0 percent	2
EC	≤ 10 mmhos/cm	2
TCLP Benzene	≤ 0.5 ppm	2
SAR	≤ 12	2
ESP	≤ 15 percent	2
Metals (ppm)		
As	≤ 10	2
Cd	≤ 10	2
Cr	≤ 1000	2
Cu	≤ 1,500	2
Pb	≤ 1000	2
Hg	≤ 10	2
Mo	≤ 18	2
Ni	≤ 420	2
Se	≤ 10	2
Ag	≤ 200	2
Zn	≤ 2,300	2
Leachate Testing*		
Ba	10.0 mg/l	2
Runoff Water		
PH	6.5 - 9.0	4
TPH	≤ 15 ppm	4
TCLP Benzene	≤ 0.5 ppm	4
EC	≤ 2.0 mmhos/cm	4
SAR	≤ 10	4
TSS	≤ 60 ppm	4
Chloride	500 ppm	4

*The Leachate testing method for Barium is included in the *Laboratory Manual for the Analysis of E and P Waste* (Department of Natural Resources, August 9, 1988, or latest version).

3. Post-closure monitoring shall be performed on intervals of six months, one, two and five years following certification that closure is complete.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation LR 27:1912 (November 2001), amended LR 34:1421 (July 2008).

§551. Requirements for Phase Separation (Reserved)

§553. Requirements for Thermal Desorption (Reserved)

§555. Requirements for Cavern Disposal

A. Applicants for new commercial solution-mined salt cavern facilities to receive and dispose of E and P Waste and operators of such existing facilities must comply with the administrative and technical criteria of LAC 43:XIX, Subpart 1, Chapter 5 (§501 et seq.) as well as the applicable

definitions, administrative criteria and technical criteria of LAC 43:XVII, Subpart 4, Chapter 31 (§3101 et seq., Disposal of Exploration and Production Waste in Solution-Mined Salt Caverns).

B. The application for a new commercial salt cavern for the disposal of E and P Waste shall include, but may not be limited to the following information:

1. the general provisions of LAC 43:XVII.3103;
2. an application shall contain the information required in LAC 43:XVII.3107, as follows:
 - a. §3107.B—Administrative Information;
 - b. §3107.C—Maps and Related Information;
 - c. §3107.D—Area of Review;
 - d. §3107.E—Technical Information;
3. the legal permit conditions required in LAC 43:XVII.3109, as follows:
 - a. §3109.A—Signatories;
 - b. §3109.C—Duty to Comply;
 - c. §3109.D—Duty to Halt or Reduce Activity;
 - d. §3109.E—Duty to Mitigate;
 - e. §3109.F—Proper Operation and Maintenance;
 - f. §3109.G—Inspection and Entry;
 - g. §3109.H. 3, 4, 7b, 8, 9 and 10—Notification Requirements;
 - h. §3109.I—Duration of Permits;
 - i. §3109.J—Compliance Review;
 - j. §3109.K—Additional Conditions;
4. the location criteria of Statewide Order No. 29-M-2, LAC 43:XVII.3113;
5. the site assessment requirements of Statewide Order No. 29-M-2, LAC 43:XVII.3115;
6. the cavern and surface facility design requirements of Statewide Order No. 29-M-2, LAC 43:XVII.3117;
7. the well construction and completion requirements of Statewide Order No. 29-M-2, LAC 43:XVII.3119;
8. the operating requirements of Statewide Order No. 29-M-2, LAC 43:XVII.3121;
9. the safety requirements of Statewide Order No. 29-M-2, LAC 43:XVII.3123;
10. the monitoring requirements of Statewide Order No. 29-M-2, LAC 43:XVII.3125;
11. the pre-operating and completion report requirements of Statewide Order No. 29-M-2, LAC 43:XVII.3127;
12. the well and salt cavern mechanical integrity pressure and leak test requirements of Statewide Order No. 29-M-2, LAC 43:XVII.3129;

13. the requirements for determining cavern configuration and measuring cavern capacity in Statewide Order No. 29-M-2, LAC 43:XVII.3131;

14. the limits on cavern capacity in Statewide Order No. 29-M-2, LAC 43:XVII.3133;

15. the requirements for inactive caverns in Statewide Order No. 29-M-2, LAC 43:XVII.3135;

16. the monthly reporting requirements of Statewide Order No. 29-M-2, LAC 43:XVII.3137;

17. the record retention requirements of Statewide Order No. 29-M-2, LAC 43:XVII.3139;

18. the applicable closure and post-closure requirements of Statewide Order No. 29-M-2, LAC 43:XVII.3141.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 29:938 (June 2003).

§557. Requirements for Incineration (Reserved)

§559. Requirements for Solidification/Stabilization (Reserved)

§565. Resource Conservation and Recovery of Exploration and Production Waste

A. In order to encourage the conservation and recovery of resources in the oilfield industry, the processing of E and P Waste into reusable materials or FSR fluid, in addition to or beyond extraction and separation methods which reclaim raw materials such as crude oil, diesel oil, etc., is recognized as a viable alternative to other methods of disposal.

B. Commercial facilities may function for the purpose of generating reusable material or FSR fluid only, or they may generate reusable material or FSR fluid in conjunction with other storage, treatment or disposal operations.

C. Commercial facilities that generate reusable material or FSR fluid are subject to all of the permitting requirements imposed on other commercial facilities. They are also subject to the same operational requirements without regard to the distinction between E and P Waste and reusable material or FSR fluid. Existing permits may be amended to allow re-use or FSR fluid operations at commercial facilities which acquire the capability to engage in processing for re-use or FSR fluid operations. Commercial facilities which utilize extraction or separation methods to reclaim raw materials such as crude oil, diesel oil, etc. may do so without amendment of existing permits.

D. The onsite generation of reusable material by oil and gas operators, pit treating companies or other companies which do not hold a legal commercial facility permit is prohibited unless the company desiring to perform such activities complies with the requirements of this Subparagraph and submits the following information to the commissioner for approval:

1. the names, addresses, and telephone numbers of the principal officers of the company;

NATURAL RESOURCES

2. a detailed description of the process by which the company will treat pit fluids and/or solids (E and P Waste), including the types of chemicals and equipment used in the process, diagrams, test data, or other information;

3. a description of the geographical area in which the company expects to do business (i.e., statewide, north Louisiana, southwest Louisiana, etc.).

E. In addition to other applicable requirements, companies seeking to be permitted for the production of reusable materials from E and P Waste shall have the following obligations.

1. Prior to permit approval or permit amendment approval, applicants must submit the following information:

- a. a detailed description of the process to be employed for generation of reusable material;
- b. type of treatment system and/or equipment to be constructed (or added);
- c. identification of the proposed uses for the reusable material; and
- d. a description of the proposed monitoring plan to be utilized.

2. All proposed uses of reusable material must be approved by the commissioner in writing.

3. The production of reusable material must be conducted in accordance with a monitoring plan approved by the commissioner with issue of the permit for each facility or process.

4. For purposes of regulatory authority only by the Office of Conservation and the establishment of reusable material, compliance with the testing criteria of §565.F below allows permitted companies to offer the material for the following uses:

- a. daily cover in sanitary landfills which are properly permitted by state and/or local authorities. The use of reusable material in a sanitary landfill will require written approval of the Department of Environmental Quality; and
- b. various types of construction material (fill) on a case-by-case basis. The commissioner may approve such use only after submission and review of an application for the intended use. Approval will be dependent upon the composition of the material and the proposed location of use. Reusable material may not be used as fill for construction purposes unless the specific use has been approved in writing by the Commissioner of Conservation.

F. Testing Criteria for Reusable Material

Parameter	Limitation
Moisture Content	< 50% (by weight) or zero free moisture
pH*	6.5 - 9.0
Electrical Conductivity (EC)	8 mmhos/cm
Sodium Adsorption Ratio (SAR)	12
Exchangeable Sodium Percentage (ESP)	15%

Parameter	Limitation
Total Barium: Reuse at Location other than Commercial facility	40,000 ppm
Leachate Testing** for: TPH	10.0 mg/l
Chlorides	500.0 mg/l
TCLP Benzene	0.5 mg/l
Leachate Testing**: Arsenic	0.5 mg/l
Barium	10.0 mg/l
Cadmium	0.1 mg/l
Chromium	0.5 mg/l
Copper	0.5 mg/l
Lead	0.5 mg/l
Mercury	0.02 mg/l
Molybdenum	0.5 mg/l
Nickel	0.5 mg/l
Selenium	0.1 mg/l
Silver	0.5 mg/l
Zinc	5.0 mg/l
NORM	Not to exceed Applicable DEQ Criteria/Limits

*E and P Waste when chemically treated (fixated) shall, in addition to the criteria set forth be acceptable as reusable material with a pH range of 6.5 to 12 and an electrical conductivity of up to 50 mmhos/cm, provided such reusable material passes leachate testing requirements for chlorides in §565.F above and leachate tests for metals in §565.F above.

**The leachate testing method for TPH, chlorides and metals is included in the Laboratory Manual for the Analysis of E and P Waste (Department of Natural Resources, August 9, 1988, or latest version).

G. A reuse stockpile management plan shall be included in the E and P Waste management and operations plan and as a minimum, shall include the following:

- 1. dust emissions controls for loading, transporting and offloading operations;
- 2. erosion control techniques; and
- 3. optimum pile height and slope.

H. The Commissioner of Conservation, the Secretary of the Department of Natural Resources, and the State of Louisiana upon issuance of a permit to a company or commercial facility under this Section shall be held harmless from and indemnified for any and all liabilities arising from the operation of such facilities and use of their products, and the company shall execute such agreements as the commissioner requires for this purpose.

I. Reporting. Each company which generates reusable material must furnish the commissioner a monthly report showing the disposition of all such material.

J. Onsite temporary use of E and P Waste for hydraulic fracture stimulation operations is permissible only as authorized by the Office of Conservation and in accordance with the requirements of LAC 43:XIX.313.J.

K. Existing commercial facilities who desire to commence FSR fluid operations must comply with the notification, application and permitting requirements of LAC 43:XIX.519.

L. The Commissioner of Conservation, the Secretary of the Department of Natural Resources, and the State of

Louisiana upon issuance of a permit to a commercial facility operator for FSR fluid operations shall be held harmless from and indemnified for any and all liabilities arising from such operations and use of FSR fluid, and the commercial facility operator shall execute such agreements as the commissioner requires for this purpose.

M. Reporting. Each commercial facility which generates FSR fluid must furnish the commissioner a monthly report showing the disposition of all such material.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 27:1916 (November 2001), amended LR 29:939 (June 2003), LR 34:1422 (July 2008), LR 36:2571 (November 2010).

§567. Closure

A. All offsite commercial facilities and transfer stations under the jurisdiction of the Office of Conservation shall be closed in a manner approved by the commissioner to insure protection of the public health, safety and welfare or the environment, surface waters, groundwater aquifers and underground sources of drinking water. A plan for closure must be developed in accordance with the requirements of the commissioner. The provisions of any amendment of this rule shall not apply to closure plans which have been previously approved by the commissioner for inactive or abandoned sites which have not been closed.

B. Closure bond or letter of credit amounts will be reviewed each year prior to the renewal date according to the following process.

1. A detailed cost estimate for adequate closure of each permitted commercial facility and transfer station shall be prepared by a independent professional consultant and submitted to the commissioner on or before February 1 of each year.

2. The closure plan and cost estimate must include provisions or closure acceptable to the commissioner and must be designed to reflect the costs to the Office of conservation to complete the approved closure of the facility.

3. Upon review of the cost estimate, the commissioner may increase, decrease or allow the amount of the bond or letter of credit to remain the same.

4. Documentation that the required closure bond or letter of credit has been renewed must be received by September 15 of each year or the commissioner shall initiate procedures to take possession of the funds guaranteed by the bond or letter of credit and suspend or revoke the permit under which the facility is operated. In addition, procedures to initiate permit suspension will be initiated. Any such permit suspension will remain in effect until renewal is documented.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 27:1917 (November 2001).

§569. Exceptions

A. The commissioner may grant an exception to any provision of this amendment upon proof of good cause. The operator must show proof that such an exception will not endanger USDWs.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 27:1917 (November 2001).

Chapter 6. Procedures for Hearings and the Submission and Approval of Plans for the Remediation of E and P Sites in Accordance with R.S. 30:29

§601. Authority

A. These rules and regulations are promulgated by the commissioner of conservation pursuant to the Administrative Procedure Act as contemplated in R.S. 30:4 and 30:29.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 33:660 (April 2007).

§603. Definitions

A. The words defined herein shall have the following meanings when used in these rules. All other words so used and not herein defined shall have their usual meanings unless specially defined in Title 30 of Louisiana Revised Statutes of 1950.

Affected Tract—any real property known or reasonably believed to have suffered environmental damage as defined in R.S. 30:29.

Date—the postmarked date of a letter or the transmittal date of a telegraphic or wireless communication.

Environmental Damage—any actual or potential impact, damage, or injury to environmental media caused by contamination resulting from activities associated with oilfield sites or exploration and production sites.

Environmental Media—includes, but is not limited to, soil, surface water, ground water, or sediment, or as defined in R.S. 30:29.

Evaluation or Remediation—includes, but is not limited to, investigation, testing, monitoring, containment, prevention, or abatement.

Feasible Plan—the most reasonable plan which addresses environmental damage in conformity with the requirement of Louisiana Constitution Article IX, Section 1 to protect the environment, public health, safety and welfare, and is in compliance with the specific relevant and applicable standards and regulations promulgated by a state agency in accordance with the Administrative Procedure Act in effect at the time of clean-up to remediate contamination

resulting from oilfield or exploration and production operations or waste.

Final Submission—the last day on which any litigation party may submit a plan, comment, or response to a plan as provided by the orders of the court.

Litigation Party—any party to a judicial proceeding subject to R.S. 30:29 and who is not a responsible party as defined herein.

Oilfield Site or Exploration and Production (E and P) Site—any tract of land or any portion thereof on which oil or gas exploration, development, or production activities have occurred, including wells, equipment, tanks, flow lines or impoundments used for the purposes of the drilling, workover, production, primary separation, disposal, transportation or storage of E and P wastes, crude oil and natural gas processing, transportation or storage of a common production stream of crude oil, natural gas, coal seam natural gas, or geothermal energy prior to a custody transfer or a sales point. In general, this definition would apply to all exploration and production operations located on the same lease, unit or field.

Party—responsible parties and litigation parties as defined herein.

Plan—any submittal made in accordance with R.S. 30:29 and these rules for the evaluation or remediation of an affected tract as defined herein.

Responsible Party—the party or parties admitting responsibility for environmental damage or determined by the court to be legally responsible for environmental damage pursuant to R.S. 30:29.

Represented Party—any responsible party or litigation party who is represented by an attorney in the court matter that has been referred pursuant to R.S. 30:29 or before the Office of Conservation.

Technical Data—all basic factual information available that may be used to determine the levels of contamination and the vertical and horizontal extent of the contamination.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 33:660 (April 2007).

§605. Applicability

A. These rules of procedure shall be applied to Office of Conservation hearings and the submission and approval of plans pursuant to R.S. 30:29 (Act 312 of 2006). The posting and publication of a copy of the notice of hearing shall be accomplished as soon as practicable after such notice has been issued by the commissioner.

B. These rules of procedure shall in no way alter or change the right of any interested person, as provided in Paragraph F, Section 6 of Chapter 1 of Title 30 of the Louisiana Revised Statutes of 1950, to have the Commissioner of Conservation call a hearing for the purpose of taking action in respect to a matter within the jurisdiction of the commissioner, nor the requirement that the

commissioner, upon receiving the request, promptly call a hearing. In addition, these rules shall in no way alter any other rights or claims, contractual or otherwise, which any person has or may have except as provided in R.S. 30:29 (Act 312 of 2006).

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 33:661 (April 2007).

§607. Commissioner's Conference

A. The general purpose of the Commissioner's Conference shall be to set a hearing date and to set deadlines for the release of technical data, hearing notices, filing of all plans, witness and exhibit lists, and any other preliminary matters necessary and appropriate to the hearing not otherwise addressed by these rules.

B. As soon as practicable after the final submission, the commissioner shall schedule a Commissioner's Conference and notify each party of the date and time of the conference.

C. Notice of the Commissioner's Conference shall be mailed to each responsible party and litigation party or their representatives stating the time and place of the conference.

D. Each responsible party or their representative is required to participate in the Commissioner's Conference.

E. Any litigation party may participate in the Commissioner's Conference.

F. The commissioner, or hearing officer appointed by the commissioner, shall have the right to call any other pre-hearing conferences at any time prior to the hearing, if in his opinion such a conference would resolve or narrow the issues in controversy or would assist in the conduct of the hearing.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 33:661 (April 2007).

§609. General Requirements of Plans

A. Plans shall be filed within the time limit set by the court and shall be filed with the commissioner. A copy shall be mailed or delivered to each party. Any party submitting a plan shall submit at least one hard copy of the technical data and plan, as well as an acceptable electronic copy to the commissioner. In addition to outlining the purpose thereof, plans shall include the information required by §615 and shall include or be accompanied by the following:

1. a statement that a reasonable effort has been made to obtain a complete list of parties;
2. a statement that a commissioner's conference has or has not been held, and if held, a list of the parties in attendance;
3. a plat prepared in accordance with all applicable memoranda, with any technical data labeled thereon and the other items required by statute or by the commissioner;

4. a statement that the plan is to evaluate or remediate the environmental damage in accordance with the requirements of the applicable rules and regulations of the Office of Conservation or, if the plan seeks to apply rules and regulations of another Louisiana state agency, a citation to the specific rules and regulations of that state agency.

B. If a proposed plan is revised by any party, the revised plan shall be submitted as amended to the commissioner of conservation and forwarded to the parties in the same manner as the original plan with a revised plat.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 33:661 (April 2007), amended LR 39:3309 (December 2013).

§611. Specific Requirements of Plans

A. The commissioner of conservation shall consider only those plans filed in a timely manner and in accordance with these rules and orders of the court.

B. Except as provided in §611.F, each plan or submittal of any responsible party or any litigation party shall be evaluated in accordance with Statewide Order 29-B. Sampling and testing shall be performed in accordance with Statewide Order 29-B. Each plan shall fully delineate the vertical and horizontal extent of the environmental damage.

C. All Statewide Order 29-B sampling shall be in accordance with applicable guidelines as provided in the latest revision of the Department of Natural Resources laboratory procedures manual titled "Laboratory Procedures for Analysis of Exploration and Production Waste" and shall contain a plat showing the physical location from which such samples were obtained, provided that any sampling performed prior to the adoption of this Chapter may be considered by the commissioner in approving or structuring a plan if the commissioner determines that such sampling was conducted in accordance with a scientifically reliable methodology.

1. In addition, information as to the identity of the person or company taking the samples, a copy of the certification of such person or company taking such samples (if applicable), and documentation showing the method of sampling, the chain of custody and all other such relevant information shall be included.

D. All Statewide Order 29-B sample analyses shall be in accordance with applicable regulatory requirements and the latest revision of the Department of Natural Resources laboratory procedures manual titled "Laboratory Procedures for Analysis of Exploration and Production Waste" and shall be performed by a DEQ LELAP-accredited laboratory holding current accreditation for each parameter and corresponding test method used, provided that any sample analyses performed prior to the adoption of this Chapter may be considered by the commissioner in approving or structuring a plan if the commissioner determines that such sample analyses was conducted in accordance with a scientifically reliable methodology.

1. All Statewide Order 29-B test results shall also contain a report certified by the testing laboratory including, at a minimum, a description of the testing process or methodology, by whom such testing was conducted, a copy of the laboratory's accreditation to conduct the described test, and all applicable required quality assurance/quality control data.

E. Each plan shall contain a separate section analyzing the sampling and testing as set forth in C and D above by comparison with the applicable Statewide Order 29-B criteria.

F. Any plan submitted by any party, or approved or structured by the commissioner, shall comply with the standards set forth in Statewide Order 29-B. Any party that seeks an exception under the provisions of §319 of Statewide Order 29-B shall submit:

1. a plan that complies with all the provisions of Statewide Order 29-B, exclusive of §319; and
2. a separate plan that includes:
 - a. sufficient proof that there is good cause to grant an exception or exceptions sought under §319;
 - b. sufficient proof showing that the exception or exceptions sought under §319 do not endanger USDW's; and
 - c. a specific citation to the Louisiana rules, regulations or statutes sought to be applied in lieu of Statewide Order 29-B.

G. All plans shall also contain:

1. a chronological work schedule or proposal for a chronological work schedule detailing all activities necessary for its implementation and an estimated cost for each item;
2. a comprehensive itemized cost basis for each item listed in Paragraph G.1;
3. a certification of review and approval by signature from an attorney licensed to practice law in Louisiana, or an attorney from another jurisdiction who has been authorized to appear before the commissioner, worded as follows:

"I, _____, have reviewed the information submitted herewith and hereby attest that to the best of my knowledge, information and belief it is true and correct and is based on scientific data that has been obtained in a manner compliant with all applicable regulations."

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 33:661 (April 2007)

§613. General Requirements of Comments and Responses

A. Comments or responses shall be filed within the time limit set by the court and shall be filed with the commissioner and the court with a copy to each party. Any party filing a comment or response shall submit to the commissioner of conservation at least one hard copy of the comment or response and any data utilized as provided in §617, as well as an acceptable electronic copy to the

commissioner. In addition to outlining the purpose thereof, the comments or responses shall, in addition to the information required by §615 include or be accompanied by the following:

1. a statement that a reasonable effort has been made to obtain a complete list of parties;

2. a plat prepared in accordance with all applicable memoranda, with any technical data labeled thereon and the other items required by statute or regulation or by the commissioner, if different from the plan on which the comments or responses are made;

3. a statement that the comment or response is to evaluate or remediate the environmental damage in accordance with the requirements of the applicable rules and regulations of the Office of Conservation or, if the comment or response seeks to apply rules and regulations of another Louisiana state agency, a citation to the specific rules and regulations of that state agency.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 33:662 (April 2007), amended LR 39:3309 (December 2013).

§615. Notice of Filing a Plan, Comment or Response

A. Any litigation party filing a plan, comment or response pursuant to R.S. 30:29 shall also mail or deliver a copy to each litigation party or their representatives. If a representative represents more than one party, only one copy need be sent, unless otherwise ordered by the court.

B. Each plan, comment or response shall include a list of all parties to whom it is being provided and their addresses and other contact information.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 33:662 (April 2007).

§617. Release of Technical Data

A. Technical data regarding any plan, comment or response shall be provided to each party at the cost of the party sending such technical data at the time the plan, comment or response is filed with the commissioner and the court.

B. If the plan, comment or response utilizes data from another previously or concurrently filed plan, comment or response, a specific reference to the location of the data in those other filings will suffice to meet the requirements of this rule.

C. Reference to the source or sources, including commercial outlets, from whom such technical data can be obtained shall be included in the documentation required by these rules.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 33:662 (April 2007).

§619. Revisions to Plans, Comments or Responses Thereto

A. If, after any plan, comment or response is filed, such plan, comment or response is revised, the party revising the plan, comment or response shall promptly notify the commissioner and all parties to whom the plan, comment or response was sent, of the revision. The revising party shall furnish the commissioner at least one hard copy and one acceptable electronic copy of the data and revised plan, comment or response, and any technical data used to support the revision. The revising party shall also provide the court and all parties a copy of any revised plan, comment or response and any technical data used to support the revision. The revising party shall, if requested by the commissioner, participate in an additional commissioner's conference to discuss the revised plan, comment or response prior to the hearing. No revised plan, comment or response may be considered at the hearing unless notice of the revision has been sent to the commissioner, the court and to all parties to whom the legal notice is required at least 10 days prior to the hearing.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 33:662 (April 2007), amended LR 39:3309 (December 2013).

§621. Mandatory Disclosures and New Evidence

A. All technical data available to any party filing a plan, comment or response shall be disclosed to all parties on or before the date such plan, comment or response is filed with the commissioner, regardless of whether such technical data is used or referenced in such plan, comment or response.

B. If new technical data becomes available to any party after proceedings have been initiated hereunder, such technical data shall be made available immediately to all parties by notice of its availability and by release in accordance with §617. Such technical data may be used by any party at the hearing and may be the basis for revision of plans, comments or responses previously made by any party. Subject to the time limitations set forth in R.S. 30:29, the commissioner in his discretion may determine that additional time should be afforded for consideration of new technical data. The commissioner in his discretion may also establish a time limit beyond which new technical data may not be considered.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 33:663 (April 2007).

§623. Hearing Officer

A. The Commissioner of Conservation may designate a licensed Louisiana attorney to act as hearing officer in any hearing or at any conferences under these rules.

B. The duties of the hearing officer include, but are not limited to, conducting any Commissioner's Conference provided under these rules, ruling on evidentiary or procedural matters, maintaining order at the hearings, and generally ensuring that an accurate record is made of the proceedings under these rules.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 33:663 (April 2007).

§625. Costs

A. At least 15 days before the scheduled hearing, the Commissioner of Conservation shall provide the court and litigation parties a schedule of its estimated costs for the review and evaluation of any plans, comments or responses, hearing costs as well as any other costs the Commissioner of Conservation is expected to incur. The responsible party shall deposit sufficient funds in the registry of the court, or, with the approval of the court, may submit such funds directly to the Commissioner of Conservation.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 33:663 (April 2007).

§627. Plan Approvals

A. Within 60 days of the conclusion of the hearing, or within such longer time as the court allows, the Commissioner of Conservation shall either approve a submitted plan as the most feasible plan or structure a plan which, based on the evidence submitted on the record, the commissioner determines to be the most feasible plan and shall further issue written reasons for the plan he approves or structures.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 33:663 (April 2007).

§629. Rehearing

A. Requests for rehearing by any party shall not be considered by the Commissioner of Conservation.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 33:663 (April 2007).

§631. Timeliness of Filings

A. All notices and filings provided for herein shall be presumed to be timely when the postmark date or actual date of receipt, if hand delivered, of the copy received by the commissioner complies with appropriate delays herein provided. Copies required to be provided to the parties shall be deposited on the same date in the United States mail, properly stamped and addressed, or, if telegraphic or

wireless communication is used, dispatched on that date by the transmitting party.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 33:663 (April 2007).

§633. Notice of Hearings and Continued Hearings

A. In addition to the publication of the legal notice by the commissioner in the official state journal, the responsible party or parties shall provide for the posting of a copy of the legal notice of the hearing and a plat or plats in a prominent place in the area affected, and shall cause to be published at least 15 days before the hearing a copy of the legal notice in a newspaper published in the vicinity or general area of the affected tract or tracts. The responsible party or parties shall mail copies of the legal notice to all parties and a copy of the plat or plats shall be included with the legal notice, if said parties have not already been furnished same. Evidence to establish posting, publishing and mailing shall be submitted at the hearing.

B. When a hearing is opened and continued, the notice given for the original hearing shall be applicable to the continued hearing, if the hearing officer at the time of granting the continuance designates the new time, date and place of the continued hearing. In all other instances of a continued hearing, the responsible party or parties shall at least 15 days before the hearing provide notice of the continued hearing by posting such notice in a prominent place in the area affected, by publishing such notice in a newspaper published in the vicinity or general area of the affected tract or tracts and by mailing such notice to all parties.

C. In no case shall a hearing be held more than 60 days from the date of the final submission without the express approval of the trial court.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 33:663 (April 2007).

§635. Rules of Hearing Conduct and Procedure

A. The responsible party or parties shall first present the entire scientific, technical or other bases of their plan or plan(s).

B. Any litigation party or parties who have filed a comment in support of any responsible party's plan or plans shall then present the entire scientific, technical or other bases for their support and shall do so immediately after the responsible party or parties have completed their presentations.

C. Any litigation party who has submitted a plan or plans shall then present the entire scientific, technical or other bases thereof. If any litigation party has filed a comment in opposition to any responsible party's plan or plans, such party shall then present their entire scientific, technical or

NATURAL RESOURCES

other bases for such opposition. Any litigation party who has filed a comment in support of a litigation party's plan shall then present the entire scientific, technical or other bases for such support.

D. Each responsible party shall then have the opportunity to provide rebuttal evidence in response to the opposition to its plan or plans, or in response to any plan offered by any litigation party.

E. The litigation party filing the plan shall then have the opportunity to provide rebuttal evidence in response to the opposition to its plan.

F. All rebuttal scientific, technical or other testimony, shall be strictly limited to a refutation of the matters covered by the opponents.

G. Any witness shall be subject to examination by the commissioner or any member of his staff and by no more than two representatives of a party. Cross-examination shall be conducted in accordance with the following guidelines.

1. Cross-examination shall be limited to questions concerning the testimony and exhibits presented by the witness, testimony and exhibits presented by any other witness and the credibility of the witness.

2. Matters peculiarly within the knowledge of the cross-examiner or his witnesses shall be presented by them on direct examination, and there shall be no attempt to establish such matters by cross-examination.

3. Cross-examination shall be conducted in a polite and courteous manner without reference to personalities of the witness or the party represented by the witness.

H. The litigation parties and responsible parties may make opening statements. The litigation parties and responsible parties may also make closing statements concerning their positions, but such statements shall not include technical matters which have not been presented by sworn testimony. The responsible parties shall have the right to make the last closing statement. If there is more than one litigation party or responsible party, the parties may agree on the sequence in which opening or closing statements are presented, or the commissioner or hearing officer shall determine the sequence.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 33:664 (April 2007).

§637. Penalty for Non-Compliance

A. Failure to comply with the provisions of or the spirit of these rules of procedure may prevent plan, comment or response from being advertised or heard, or may prevent a party from presenting evidence at the hearing, but any approval or structure of a plan issued by the commissioner shall not be invalid by operation of this rule.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 33:664 (April 2007).

§639. Time of Commencement

A. The procedures set forth in these rules shall commence upon final submission date as provided in these rules.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 33:664 (April 2007).

§641. Coverage of Rules

A. Nothing contained in these rules shall in any way limit the authority of the commissioner of conservation to independently initiate any civil or administrative proceeding or to initiate any civil enforcement action.

B. Nothing in these rules shall in any way limit the Office of Conservation from independently responding to an inquiry or request by a landowner or any other person for investigation of alleged environmental damage.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:4 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 33:664 (April 2007).

Title 43
NATURAL RESOURCES

Part XIX. Office of Conservation—General Operations

Subpart 2. Statewide Order No. 29-R

Chapter 7. Fees

§701. Definitions

Application Fee—an amount payable to the Office of Conservation, in a form and schedule prescribed by the Office of Conservation, by industries under the jurisdiction of the Office of Conservation.

Application for Automatic Custody Transfer—an application for authority to measure and transfer custody of liquid hydrocarbons by the use of methods other than customary gauge tanks, as authorized by Statewide Order No. 29-G-1 (LAC 43:XVII.2301 et seq.), or successor regulations.

Application for Commercial Class I Injection Well—an application to construct and/or operate a commercial Class I injection well, as authorized by Statewide Order No. 29-N-1 (LAC 43:XVII.101 et seq.), Statewide Order No. 29-N-2 (LAC 43:XVII.201 et seq.), or successor regulations.

Application for Commercial Class I Injection Well (Additional Wells)—an application to construct and/or operate additional Class I injection wells within the same filing, as authorized by Statewide Order No. 29-N-1 (LAC 43:XVII.101 et seq.), Statewide Order No. 29-N-2 (LAC 43:XVII.201 et seq.), or successor regulations.

Application for Commercial Class II Injection Well—an application to construct and/or operate a commercial Class II injection well, as authorized by Statewide Order No. 29-B (LAC 43:XIX.401 et seq.), Statewide Order No. 29-M-2 (LAC 43:XVII.3101 et seq.), or successor regulations.

Application for Commercial Class II Injection Well (Additional Wells)—an application to construct and/or operate additional Class II injection wells within the same filing, as authorized by Statewide Order No. 29-B (LAC 43:XIX.401 et seq.), Statewide Order No. 29-M-2 (LAC 43:XVII.3101 et seq.), or successor regulations.

Application for Multiple Completion—an application to multiple complete a new or existing well in separate common sources of supply, as authorized by Statewide Order N. 29-C-4 (LAC 43:XIX.1301 et seq.), or successor regulations.

Application for Noncommercial Injection Well—an application to construct and/or operate a class I, II, III, or V noncommercial injection well, as authorized by Statewide Order Nos. 29-B (LAC 43:XIX.401 et seq.), 29-M (LAC 43:XVII.301 et seq.), 29-N-1 (LAC 43:XVII.101 et seq.),

29-N-2 (LAC 43:XVII.201 et seq.), 29-M-2 (LAC 43:XVII.3101 et seq.), successor regulations.

Application for Permit to Drill (Minerals)—an application to drill in search of minerals (six months or one year), as authorized by R.S. 30:28.

Application for Public Hearing—an application for a public hearing as authorized by R.S. 30:1 et seq.

Application for Site Clearance—an application to approve a procedural plan for site clearance verification of platform, well or structure abandonment developed by an operator/lessee and submitted to the commissioner of conservation, as authorized by LAC 43:XI.311 et seq., or successor regulations.

Application for Substitute Unit Well—an application for a substitute unit well as authorized by Statewide Order No. 29-K-1 (LAC 43:XIX.2901 et seq.), or successor regulations.

Application for Surface Mining Development Operations Permit—an application to remove coal, lignite, or overburden for the purpose of determining coal or lignite quality or quantity or coal or lignite mining feasibility, as authorized by Statewide Order No. 29-O-1 (LAC 43:XV.101 et seq.), or successor regulations.

Application for Surface Mining Exploration Permit—an application to drill test holes or core holes for the purpose of determining the location, quantity, or quality of a coal or lignite deposit, as authorized by Statewide Order No. 29-O-1 (LAC 43:XV.101 et seq.), or successor regulations.

Application for Surface Mining Permit—an application for a permit to conduct surface coal or lignite mining and reclamation operations, as authorized by Statewide Order No. 29-O-1 (LAC 43:XV.101 et seq.), or successor regulations.

Application for Unit Termination—an application for unit termination as authorized by Statewide Order No. 29-L-3 (LAC 43:XIX.3100 et seq.), or successor regulations.

Application to Amend Permit to Drill (Injection or Other)—an application to alter, amend, or change a permit to drill, construct and/or operate an injection, or other well after its initial issuance, as authorized by R.S. 30:28.

Application to Amend Permit to Drill (Minerals)—an application to alter, amend, or change a permit to drill for minerals after its initial issuance, as authorized by R.S. 30:28.*

*Application to amend operator (transfer of ownership, including any other amendment action requested at that time)

NATURAL RESOURCES

for any orphaned well, any multiply completed well which has reverted to a single completion, any non-producing well which is plugged and abandoned within the time frame directed by the commissioner, as well as any stripper crude oil well or incapable gas well so certified by the Department of Revenue shall not be subject to the application fee provided herein.

Application to Commingle—an application for authority to commingle production of gas and/or liquid hydrocarbons and to use methods other than gauge tanks for allocation, as authorized by Statewide Order No. 29-D-1 (LAC 43:XIX.1500 et seq.), or successor regulations.

Application to Process Form R-4—application for authorization to transport oil from a lease as authorized by Statewide Order No. 25 (LAC 43:XIX.900 et seq.), or successor regulations.

BOE—annual barrels oil equivalent. Gas production is converted to *BOE* by dividing annual MCF by a factor of 29.0.

Capable Gas—natural and casing head gas not classified as incapable gas well gas or incapable oil well gas by the Department of Revenue, as of December 31, 2013.

Capable Oil—crude oil and condensate not classified as incapable oil or stripper oil by the Department of Revenue, as of December 31, 2013.

Class I Well—a Class I injection well used to inject hazardous or nonhazardous, industrial, or municipal wastes into the subsurface, which falls within the regulatory purview of Statewide Order No. 29-N-1 (LAC 43:XVII.101 et seq.), Statewide Order No. 29-N-2 (LAC 43:XVII.201 et seq.), or successor regulations.

Class I Well Fee—an annual fee payable to the Office of Conservation, in a form and schedule prescribed by the Office of Conservation, on *class I wells* in an amount not to exceed \$400,000 for Fiscal Year 2000-2001 and thereafter.

Class II Well—a class II injection well which injects fluids which are brought to the surface in connection; with conventional oil or natural gas production, for annular disposal wells, for enhanced recovery of oil or natural gas, and for storage of hydrocarbons. For purposes of administering the exemption provided in R.S. 30:21(B)(1)(c), such exemption is limited to operators who operate *class II wells* serving a stripper oil well or an incapable gas well certified pursuant to R.S. 47:633 by the Severance Tax Section of the Department of Revenue and located in the same field as such *class II well*.

Class III Well—a Class III injection well which injects for extraction of minerals or energy.

Emergency Clearance—emergency authorization to transport oil from lease.

Production Fee—an annual fee payable to the Office of Conservation, in a form and schedule prescribed by the Office of Conservation, by oil and gas operators on capable oil wells and capable gas wells based on a tiered system to establish parity on a dollar amount between the wells. The tiered system shall be established annually by rule on capable oil and capable gas production, including nonexempt wells reporting zero production during the

annual base period, in an amount not to exceed \$2,450,000 for fiscal year 2002/2003 and thereafter.

Production Well—any well which has been permitted by and is subject to the jurisdiction of the Office of Conservation, excluding wells in the permitted and drilling in progress status, class II injection wells, liquid storage cavity wells, commercial salt water disposal wells, class V injection wells, wells which have been plugged and abandoned, wells which have reverted to landowner for use as a fresh water well (Statewide Order No. 29-B, LAC 43:XIX.137.G, or successor regulations), multiply completed wells reverted to a single completion, and stripper oil wells or incapable oil wells or incapable gas wells certified by the Severance Tax Section of the Department of Revenue, as of December 31, 2013.

Regulatory Fee—an amount payable annually to the Office of Conservation, in a form and schedule prescribed by the Office of Conservation, on class II wells, class III wells, storage wells, type A facilities, and type B facilities in an amount not to exceed \$875,000 for fiscal year 2000-2001 and thereafter. No fee shall be imposed on a class II well of an operator who is also an operator of a stripper crude oil well or incapable gas well certified pursuant to R.S. 47:633 by the Severance Tax Section of the Department of Revenue as of December 31, 2013, and located in the same field as such class II well. Operators of record, excluding operators of wells and including, but not limited to, operators of gasoline/cycling plants, refineries, oil/gas transporters, and/or certain other activities subject to the jurisdiction of the Office of Conservation are required to pay an annual registration fee of \$105. Such payment is due within the time frame prescribed by the Office of Conservation.

Type A Facility—commercial E and P waste disposal facilities within the state that utilize technologies appropriate for the receipt, treatment, storage, or disposal of oilfield waste solids and liquids for a fee or other consideration, and fall within the regulatory purview of Statewide Order No. 29-B (LAC 43:XIX.501 et seq.), Statewide Order No. 29-M-2 (LAC 43:XVII.3101 et seq.), or successor regulations.

Type B Facility—commercial E and P waste disposal facilities within the state that utilize underground injection technology for the receipt, treatment, storage, or disposal of only produced saltwater, oilfield brine, or other oilfield waste liquids for a fee or other consideration, and fall within the regulatory purview of Statewide Order No. 29-B (LAC 43:XIX.501 et seq.), or successor regulations.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:21 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 14:542 (August 1988), amended LR 15:551 (July 1989), LR 21:1249 (November 1995), LR 24:458 (March 1998), LR 24:2127 (November 1998), LR 25:1873 (October 1999), LR 26:2302 (October 2000), LR 27:1919 (November 2001), LR 28:2366 (November 2002), LR 29:2499 (November 2003), LR 31:2950 (November 2005), LR 32:2087 (November 2006), LR 33:2461 (November 2007), LR 34:2404 (November 2008), LR 35:2463 (November 2009), LR 36:2567 (November 2010), LR 37:3271 (November 2011), LR 38:2930 (November 2012), LR 39:3099 (November 2013), 40:2266 (November 2014).

§703. Fee Schedule for Fiscal Year 2014-2015

A. Fee Schedule

Application Fees	Amount
Application for Unit Termination	\$252
Application for Substitute Unit Well	\$252
Application for Public Hearings	\$755
Application for Multiple Completion	\$126
Application for Commingle	\$252
Application for Automatic Custody Transfer	\$252
Application for Noncommercial Injection Well	\$252
Application for Commercial Class I Injection Well	\$1,264
Application for Commercial Class I Injection Well (Additional Wells)	\$631
Application for Commercial Class II Injection Well	\$631
Application for Commercial Class II Injection Well (Additional Wells)	\$314
Application for Permit to Drill – Minerals: 0’ – 3,000’(6 months)	\$126
Application for Permit to Drill – Minerals: 3,001’ – 10,000’(6 months)	\$631
Application for Permit to Drill – Minerals: 10,001’ +(6 months)	\$1,264
Drill Minerals Deeper (> 3,000’) (6 months)	\$504
Drill Minerals Deeper (> 10,000’) (6 months)	\$632
Application for Permit to Drill - Minerals: 0' - 3,000' (1 year)	\$252
Application for Permit to Drill - Minerals: 3,001' - 10,000' (1 year)	\$1,262
Application for Permit to Drill - Minerals: 10,001' + (1 year)	\$2,528
Drill Minerals Deeper (> 3,000’) (1 year)	\$1,008
Drill Minerals Deeper (> 10,000’) (1 year)	\$1,264
Application to Amend Permit to Drill – Minerals	\$126
Application to Amend Permit to Drill – Injection or Other	\$126
Application for Surface Mining Exploration Permit	\$65
Application for Surface Mining Development Operations Permit	\$94
Application for Surface Mining Permit	\$2,212
Application to Process Form R-4	\$36
Application to Reinstate Suspended Form R-4	\$65
Application for Emergency Clearance Form R-4	\$65
Application for Site Clearance	\$600

B. Regulatory Fees

1. Operators of each permitted type A facility are required to pay an annual regulatory fee of \$6,496 per facility.

2. Operators of each permitted type B facility are required to pay an annual Regulatory Fee of \$3,248 per facility.

3. Operators of record of permitted non-commercial class II injection/disposal wells are required to pay \$651 per well.

4. Operators of record of permitted class III and Storage wells are required to pay \$651 per well.

C. Class I Well Fees. Operators of permitted class I wells are required to pay \$11,940 per well.

D. Production Fees. Operators of record of capable oil wells and capable gas wells are required to pay according to the following annual production fee tiers.

Tier	Annual Production (Barrel Oil Equivalent)	Fee (\$ per Well)
Tier 1	0	17

Tier 2	1 - 5,000	94
Tier 3	5,001 - 15,000	267
Tier 4	15,001 - 30,000	443
Tier 5	30,001 - 60,000	700
Tier 6	60,001 - 110,000	974
Tier 7	110,001 - 9,999,999	1,202

E. Exceptions

1. Operators of record of each class I injection/disposal well and each type A and B commercial facility that is permitted, but has not yet been constructed, are required to pay an annual fee of 50 percent of the applicable fee for each well or facility.

2. Operators of record of each inactive type A and B facility which have voluntarily ceased the receipt and disposal of E and P waste and are actively implementing an Office of Conservation approved closure plan are required to pay an annual regulatory fee of 50 percent of the annual fee for each applicable type A or B facility.

3. Operators of record of each inactive type A or B facility which have voluntarily ceased the receipt and disposal of E and P waste, have completed Office of Conservation approved closure activities and are conducting a post-closure maintenance and monitoring program, are required to pay an annual regulatory fee of 25 percent of the annual fee for each applicable Type A or B facility.

F. Pipeline Safety Inspection Fees

1. Owners/Operators of jurisdictional gas pipeline facilities are required to pay an annual gas pipeline safety inspection fee of \$22.40 per mile, or a minimum of \$400, whichever is greater.

2. Owners/Operators of jurisdictional hazardous liquids pipeline facilities are required to pay an annual hazardous liquids pipeline safety inspection fee of \$22.40 per mile, or a minimum of \$400, whichever is greater.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:21 et seq., R.S. 30:560 and 706.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 14:543 (August 1988), amended LR 15:552 (July 1989), LR 21:1250 (November 1995), LR 24:458 (March 1998), LR 24:2128 (November 1998), LR 25:1874 (October 1999), LR 26:2304 (October 2000), LR 27:1920 (November 2001), LR 28:2368 (November 2002), LR 29:350 (March 2003), LR 29:2501 (November 2003), LR 30:2494 (November 2004), LR 31:2950 (November 2005), LR 32:2088 (November 2006), LR 33:2461 (November 2007), LR 34:2405 (November 2008), LR 35:2463 (November 2009), LR 36:2569 (November 2010), LR 37:3273 (November 2011), LR 38:2931 (November 2012), LR 39:3099 (November 2013), LR 40:2267 (November 2014).

§705. Failure to Comply

A. Operators of operations and activities defined in §701 are required to timely comply with this order. Failure to comply by the due date of any required fee payment will subject the operator to civil penalties provided in Title 30 of the *Louisiana Revised Statutes* of 1950, including but not limited to R.S. 30:18.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:21 et seq.

NATURAL RESOURCES

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 14:544 (August 1988), amended LR 15:552 (July 1989), LR 21:1251 (November 1995), LR 24:459 (March 1998), LR 24:2128 (November 1998), LR 25:1874 (October 1999), LR 26:2304 (October 2000), LR 27:1921 (November 2001), LR 28:2368 (November 2002), LR 29:2501 (November 2003), LR 34:2406 (November 2008), LR 36:2569 (November 2010), LR 37:3274 (November 2011), LR 38:2931 (November 2012), LR 39:3100 (November 2013), LR 40:2267 (November 2014).

§707. Severability and Effective Date

A. The fees set forth in §703 are hereby adopted as individual and independent rules comprising this body of rules designated as Statewide Order No. 29-R-14/15 and if any such individual fee is held to be unacceptable, pursuant to R.S. 49:968(H)(2), or held to be invalid by a court of law, then such unacceptability or invalidity shall not affect the other provisions of this order which can be given effect without the unacceptable or invalid provisions, and to that end the provisions of this order are severable.

B. This order (Statewide Order No. 29-R-14/15) supersedes Statewide Order No. 29-R-13/14 and any amendments thereof.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:21 et seq.

HISTORICAL NOTE: Promulgated by the Department of Natural Resources, Office of Conservation, LR 14:544 (August 1988), amended LR 15:552 (July 1989), LR 21:1251 (November 1995), LR 24:459 (March 1998), LR 24:2128 (November 1998), LR 25:1874 (October 1999), LR 26:2305 (October 2000), LR 27:1921 (November 2001), LR 28:2368 (November 2002), LR 29:2502 (November 2003), LR 30:2494 (November 2004), LR 31:2950 (November 2005), LR 32:2088 (November 2006), LR 33:2462 (November 2007), LR 34:2406 (November 2008), LR 35:2464 (November 2009), LR 36:2570 (November 2010), LR 37:3274 (November 2011), LR 38:2931 (November 2012), LR 39:3100 (November 2013), LR 40:2267 (November 2014).
