

EXPLORATION AND PRODUCTION WASTE DETERMINATION REQUEST FORM

MAILING ADDRESS:
 OFFICE OF CONSERVATION
 ENVIRONMENTAL DIVISION
 P.O. BOX 94275
 BATON ROUGE, LA 70804-9275

E-Mail: Environmental-Div@la.gov

PHYSICAL ADDRESS:
 OFFICE OF CONSERVATION
 ENVIRONMENTAL DIVISION
 617 N. THIRD ST., 8TH FLOOR
 BATON ROUGE, LA 70802

Fax: 225-242-3505

Fee: \$300 per request

Generator Name		Contact Name	
Company Mailing Address (Including City, State, & Zip Code)			
Contact Email Address	Telephone Number	Fax Number	
Billing Address	Email Address (Invoice and Approval or Denial Will Be Sent Here)		
Billing Contact	Billing Phone Number	PO Number	
Amount Of Waste (In Barrels)			
Describe How Waste/Material Was Generated			
Normal Screen (Field Measurement of Naturally Occurring Radioactive Material)	Background:	microR/hr or pci/gr	Waste: microR/hr or pci/gr
Has An Analytical Analysis Been Performed On The Waste/Material In Accordance With 29B Standards?			
Attachments/Additional Information Included:			

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this report and all attachments and that, based on my personal knowledge or inquiry of those individuals immediately responsible for obtaining the information, I believe that the information is true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment. I further acknowledge and agree that by typing my name or placing my mark in the signature space on this document it is my intention to electronically sign the document. Further, the electronic signature shall be considered as an original signature for all purposes and shall have the same force and effect as an original signature. Without limitation, "electronic signature" shall include faxed versions of an original signature or electronically scanned and transmitted versions (e.g., via pdf) of an original signature.

EXPLORATION AND PRODUCTION WASTE DETERMINATION REQUEST FORM

E AND P WASTE DETERMINATION FORM DESCRIPTION

This form applies to whether a certain waste material meets the definition of, and therefore would be, an Exploration and Production waste for future waste handling and disposal by the waste generator.

This form is limited to agency determinations for generators use in establishing initial and future waste management decisions and applicable regulatory compliance. This form does not apply to review and processing of Forms UIC 23 and UIC 26, nor for Waste Type 99 review and decisions for Form UIC 28 Waste Manifest compliance purposes. Additionally, this form does not apply to matters involving an enforcement action with or without civil penalty, that originates from active or past generator handling and/or disposal investigations following external inquiries or complaints, internal compliance audits or otherwise.

FORM INSTRUCTIONS

1. Complete all contact information blanks. This information will be used for follow up questions or additional information required regarding the request, in addition to invoicing in accordance with LAC 43:XIX.Chapter 7. The request will not be considered until all contact information is completed.
2. Provide the amount of waste to be disposed or amount of waste to be generated for disposal. If the amount of waste has yet to be generated and the total amount is unknown, it is acceptable to provide an estimated amount of waste to be generated.
3. Describe how the material was or will be generated.
4. Provide NORM values if the material was analyzed for such criteria.
5. Provide 29B analytical data if the material was analyzed for such criteria.
6. Provide any other attachments or information necessary for the E and P waste determination.
7. The generator or generators authorized representative shall print and sign their name under the certification statement.
8. Once review is complete, the box at the bottom of the form will be completed by an Office of Conservation representative and submitted to the generator or generators authorized representative with a copy of the invoice.

E AND P WASTE TYPES

Exploration and Production (E&P) waste is waste generated by the exploration, development, or production of crude oil or natural gas wells and which is not regulated by the provisions of the Louisiana Hazardous Waste Regulations and the Federal Resource Conservation and Recovery Act, as amended. E&P waste include the following waste types (see LAC 43:XIX.501).

- 01 Salt water (produced brine or produced water), except for salt water whose intended and actual use is in drilling, workover or completion fluids or in enhanced mineral recovery operations, process fluids generated by approved salvage oil operators who only receive oil (BS&W) from oil and gas leases, and natural gas plant processing waste fluid which is or may be commingled with produced formation water.
- 02 Oil-base drilling wastes (mud, fluids and cuttings)
- 03 Water-base drilling wastes (mud, fluids and cuttings)

EXPLORATION AND PRODUCTION WASTE DETERMINATION REQUEST FORM

- 04 Completion, workover and stimulation fluids
- 05 Production pit sludges
- 06 Storage tank sludge from production operations, onsite and commercial saltwater disposal facilities, salvage oil facilities (that only receive waste oil [BS&W] from oil and gas leases, and sludges generated by service company and commercial facility or transfer station wash water systems
- 07 Produced oily sands and solids
- 08 Produced formation fresh water
- 09 Rainwater from firewalls, ring levees and pits at drilling and production facilities
- 10 Washout water and residual solids generated from the cleaning of containers that transport E&P Waste and are not contaminated by hazardous waste or material: washout water and solids (E&P Waste Type 10) is or may be generated at a commercial facility or transfer station by the cleaning of a container holding a residual amount of E&P Waste
- 11 Washout pit water and residual solids from oilfield related carriers and service companies that are not permitted to haul hazardous waste or material
- 12 Nonhazardous natural gas plant processing waste solids.
- 14 Pipeline test water which does not meet discharge limitations established by the appropriate state agency, or pipeline pigging waste, i.e., waste fluids/solids generated from the cleaning of a pipeline
- 15 E&P Wastes that are transported from permitted commercial facilities and transfer stations to permitted commercial treatment and disposal facilities, except those E&P Wastes defined as Waste Types 01 and 06
- 16 Crude oil spill clean-up waste
- 50 Salvageable hydrocarbons bound for permitted salvage oil operators
- 99 Other E&P Waste not described above, but generated by activities incidental to the drilling and production of oil and gas wells and meet the EPA/RCRA exemptions criteria
