

**DEPARTMENT OF NATURAL RESOURCES  
COASTAL MANAGEMENT DIVISION**

P.O. BOX 44487  
BATON ROUGE, LOUISIANA 70804-4487  
(225)342-7591  
1-800-267-4019

**COASTAL USE PERMIT/CONSISTENCY DETERMINATION**

**Coastal Use Permit – General Permit-6 (CUP-GP-6)**

**Name and Address:** Louisiana Department of Natural Resources  
Coastal Management Division  
P.O. Box 44487, Baton Rouge, LA 70804

**LOCATION:** In the Louisiana Coastal Parishes of Assumption, Calcasieu, Cameron, Iberia, Jefferson, Lafourche, Livingston, Orleans, Plaquemines, St. Bernard, St. Charles, St. James, St. John the Baptist, St. Martin, St. Mary, St. Tammany, Tangipahoa, Terrebonne and Vermilion.

**DESCRIPTION:** This General Permit provides for the installation, replacement, maintenance, and removal of up to 10,000 linear feet of pipeline in vegetated wetlands, spoil banks, and open water areas.

In accordance with the rules and regulations of the Louisiana Coastal Resources Program and Louisiana R.S. 49, Sections 214.21 to 214.41, the State and Local Coastal Resources Management Act of 1978, as amended, the permitted agrees to:

1. Carry out, perform, operate and maintain the use in accordance with the permit conditions, plans and specifications approved by the Department of Natural Resources.
2. Comply with any permit conditions imposed by the Department of Natural Resources.
3. Adjust, alter, or remove any structure or other physical evidence of the permitted use if, in the opinion of the Department of Natural Resources, it proves to be beyond the scope of the use as approved or is abandoned.
4. Provide, if required by the Department of Natural Resources, an acceptable surety bond in an appropriate amount to ensure adjustment, alteration, or removal should the Department of Natural Resources determine it necessary.
5. Hold and save the State of Louisiana, the local government, the department, and their officers and employees harmless from any damage to persons or property which might result from the use, including the work, activity, or structure permitted.
6. Certify that the use has been completed in an acceptable and satisfactory manner and in accordance with the plans and specifications approved by the Department of Natural Resources. The Department of Natural Resources may, when appropriate, require such certification to be given by a registered professional engineer.
7. All terms of the permit shall be subject to all applicable federal and state laws and regulations.
8. This permit, or a copy thereof, shall be available for inspection at the site of work at all times during operations.
9. The applicant will notify the Coastal Management Division of the date on which initiation of the permitted activity described under the "Coastal Use Description" began. The applicant shall notify the Coastal Management Division by mailing the enclosed green initiation card on the date of initiation of the coastal use.
10. Unless specified elsewhere in this permit, this permit authorizes the initiation of the coastal use described under "Coastal Use Description" for two years from the date of the signature of the Secretary or his designee. If the coastal use is not initiated within this two year period, then this permit will expire and the applicant will be required to submit a new application. Initiation of the coastal use, for purposes of this permit, means the actual physical beginning of the use of activity for which the permit is required. Initiation does not include preparatory activities, such as movement of equipment onto the coastal use site, expenditure of funds, contracting out of work, or performing activities which by themselves do not require a permit. In addition, the permitted must, in good faith and with due diligence, reasonably progress toward completion of the project once the coastal use has been initiated.
11. The following special conditions must also be met in order for the use to meet the guidelines of the Coastal Resources Program:

## I. General Conditions

- A. The Secretary of DNR has determined that full individual permit processing by CMD is in the public interest in order to determine whether proposed activities qualify for authorization under this General Permit. This full individual permit processing will consist of review by the staff of CMD of each authorization request. Therefore, pursuant to the Rules and Procedures for Coastal Use Permits, Title 43, Subpart 723.C.3.a, of the Louisiana Code of Administrative Procedure, an application fee will be assessed for activities proposed for authorization under the authority of this General Permit and, if appropriate, processing fees and appropriate mitigation plan processing fees will also be assessed for activities approved under the authority of this General Permit.
- B. A standard Joint Application Form shall be completed and submitted to CMD along with drawings depicting the location and character of work proposed for approval under the authority of this General Permit. The applicant shall submit a complete application packet (forms and plats) to CMD. The application shall be accompanied by a \$100.00 application fee or the application fee in effect at the time of application submittal. This General Permit shall not apply if the proposed work is determined not to meet the criteria. The applicant shall be advised by letter within five (5) calendar days of receipt of the complete application that the application shall be processed as an individual CUP if the determination is made that the proposed activity is not consistent with this General Permit.
- C. Individual written approvals from CMD must be obtained prior to the commencement of any individual activity proposed under the authority of this General Permit.
- D. Should CMD deem that they may have an interest in the project, prior to issuance of authorization for individual activities under this General Permit, the following agencies shall have a five (5) calendar day period to review the proposed activity: the Louisiana Departments of Wildlife and Fisheries; Health and Hospitals; Environmental Quality; Natural Resources/Coastal Restoration Division; Culture Recreation and Tourism; Transportation and Development; State Land Office; and the approved Parish Local Program, if applicable. CMD may issue authorization for the activity after the five-day review period or after receiving notification by each of the agencies, either in writing or by telephone, that there are no objections to the proposed activity. However, the final decision for the issuance of authorization for individual activities under the authority of this General Permit, to issue approval with modifications or additional Operating Conditions, or to deny approval for the proposed work, shall be made by the Secretary of DNR.
- E. Should it be deemed in the public interest, the Secretary shall deny authorization to perform work under the authority of this General Permit and require the applicant to obtain an individual CUP for the proposed activity.

- F. Authorization for work under the authority of this General Permit shall expire if the work is not initiated and completed within two (2) years from the date of issuance of the original written approval. Initiation of the Coastal Use, for purposes of this General Permit, means the actual physical beginning of the use or activity for which the permit is required. Initiation does not include preparatory activities, such as movement of equipment onto the Coastal Use site, expenditure of funds, contracting out of work, or performing activities which by themselves do not require a permit. In addition, the permittee must, in good faith and with due diligence, reasonably progress toward completion of the project once the Coastal Use has been initiated. All activities authorized under the authority of this General Permit must be completed within 90 days of initiation of the work, with a one-time mobilization, unless a different time schedule is specifically approved by CMD.
- G. The Term of this General Permit shall be five (5) years from the date of issuance, except as provided for in LAC 43 Subpart 723.E.3.b. The term of individual authorizations issued under the authority of this General Permit shall be two years from the date of issuance of the original individual authorization.
- H. The permittee shall notify CMD of commencement of work which is authorized under the authority of this General Permit. The permittee shall notify CMD by either providing the information in writing or entering the information through the online system, within three (3) days of the date of initiation of the authorized work.
- I. Issuance of approval under the authority of this General Permit does not relieve the applicant of obtaining other lawfully required permits (local, state, or federal) before commencing work.
- J. The permittee shall allow representatives of CMD or authorized agents to make periodic, unannounced inspections to assure the activity is being performed in accordance with the conditions of the permit.
- K. Work carried out under the authority of this General Permit shall conform to all appropriate state and federal safety regulations.
- L. An authorization issued under the authority of this General Permit may not be transferred to another party without giving prior notice to, and receiving written approval from, the CMD Administrator. A transfer form can be downloaded at <http://dnr.louisiana.gov/crm/coastmgt/cup/cup.asp>, or can be provided upon request.
- M. Work carried out under the authority of this General Permit shall be performed in full compliance with the rules and regulations of DNR which exist at the time of approval for that work.

## II. Operating Conditions

- A. All logs and stumps unearthed during dredging shall be buried beneath the bottom of the waterway or removed to a disposal site on land.
- B. Spoil shall not be placed in and shall not block any tidal sloughs.
- C. The activities covered by this General Permit shall not adversely affect any threatened or endangered species. Adverse impacts on fish, wildlife and the environment shall be minimized.

- D. This general permit does not convey any property rights, mineral rights, or exclusive privileges, nor does it authorize injury to property.
- E. The applicant shall notify the landowner(s), upon whose property the proposed work shall occur, of the fact that the application will be submitted. Copies of the initial notification letters sent to the landowner(s) shall be provided to CMD with the authorization request.
- F. If archaeological, historical or other cultural resources are encountered during activities authorized under the authority of this General Permit, work shall cease and the applicant shall immediately notify the Division of Archaeology, Louisiana Department of Culture, Recreation, and Tourism (P. O. Box 44247, Baton Rouge, LA 70804) and CMD (P. O. Box 44487, Baton Rouge, LA 70804-4487, (225) 342-7591). Work may not resume until written approval is obtained from CMD.
- G. The permittee shall insure that all sanitary sewage and/or related domestic wastes generated during the subject project activity and at the site, thereafter, as may become necessary shall receive the equivalent of secondary treatment (30 mg/l BOD5) with disinfection prior to discharge into any of the streams or adjacent waters of the area or, in the case of total containment, shall be disposed of in approved sewerage and sewage treatment facilities, as is required by the State Sanitary Code. Such opinion as may be served by those comments offered herein shall not be construed to suffice as any more formal approval(s) which may be required of possible sanitary details (i.e. provisions) scheduled to be associated with the subject activity. Such shall generally require that appropriate plans and specifications be submitted to the Department of Health and Hospitals for purpose of review and approval prior to any utilization of such provisions.
- H. The permittee shall comply with all applicable laws regarding the need to contact the Louisiana One Call System ([800] 272-3020) to locate any buried cables and pipelines.
- I. All activities, involving any discharge of pollutants, must be consistent with applicable water quality standards and any necessary permits issued through the Department of Environmental Quality/Office of Water Resources must be obtained.
- J. Dredging and/or filling activities authorized under the authority of this General Permit shall not exceed the volume specified in the work statement of the individual authorization.
- K. Activities authorized under the authority of this General Permit shall be carried out on a one-time basis, during a one-time mobilization, except in situations where sequential phases (e.g., use of different types of dredging techniques) may be specified in the work statement of the individual authorization. Additional authorizations may be necessary for maintenance activities or work beyond the scope of the authorized activities.
- L. The requirement for compensatory mitigation for impacts to wetlands resulting from the referenced project will be determined after one full growing season (March 1 to November 1) following the completion of the permitted activities. This assessment shall include both primary impacts and secondary impacts which may result from the permitted activities.

If CMD determines that compensatory mitigation is required, Permittee shall submit a compensatory mitigation plan for approval within 30 days of notification of the compensatory mitigation requirements by CMD. All necessary approvals shall be obtained for the compensatory mitigation plan and the plan shall be implemented as directed by CMD. Permittee should be aware that compensatory mitigation projects may be required to be maintained for as many as 20 years for marsh mitigation projects and 50 years for forested wetland mitigation projects. A processing fee will be assessed for the determination of compensatory mitigation requirements and evaluation of the proposed compensatory mitigation plan in accordance with LAC Title 43, Part I, Chapter 7, §724.D. This fee shall apply regardless of which compensatory mitigation option is selected and does not include the cost incurred to implement the required compensatory mitigation.

- M. When adverse impacts to vegetated wetlands may result from the proposed activity, and/or when otherwise determined necessary by CMD, the applicant and CMD shall negotiate, in consultation with the owner(s) of land on which the permitted activity is proposed to occur, and those other natural resource agencies deemed appropriate by CMD, a compensatory mitigation plan, and the applicant shall implement that plan. That plan shall fulfill the requirements of Louisiana Revised Statute 49:214.41 and those rules and regulations adopted thereunder. The compensatory mitigation plan shall be developed prior to the issuance of approval under the authority of this General Permit. The expiration of the term of this General Permit, or the revocation or expiration of approval to perform work under the authority of this General Permit, shall not absolve the permittee, its transferees, or assignees from the obligation and responsibility of implementing and maintaining the compensatory mitigation plan.
- N. The applicant shall adhere to the following conditions if the project is within the boundaries of a public oyster seed ground:
1. Permittee shall be liable for, and shall compensate the state for, any damages to the oyster seed grounds caused by Permittee or Permittee's contractors during any work done under this permit. Prior to commencement of the permitted activity, Applicant will also provide LDWF with the name of an individual in authority who can be contacted regarding any work done under the permit.
  2. Compensation for impacts to the public oyster seed grounds shall be in the form of the planting of cultch material (i.e. crushed concrete, limestone, oyster shell, etc) at the rate of 1 cubic yard per acre of impacted area for barren, non-supportive areas of the seed grounds, 50 cubic yards per acre of impacted area for supportive areas, and 187 cubic yards per acre of impacted area for reef areas plus the value of any living oyster resources destroyed. Applicant shall bear the expense of acquisition and deposition of cultch. The cultch shall be deposited by the Applicant, Applicant's contractor, or sub-contractor, under the direct supervision of LDWF, and shall be deposited at a time, place, and in a manner prescribed by the Department. In lieu of planting cultch material, the Applicant may make payment directly to the Public Oyster Seed Ground Development Account.
  3. Permittee shall not discharge any drilling and/or workover effluent except for flocculated filtered water into the waters in the areas of the proposed activity. Discharge rate of water shall not exceed the rate of filtering.
  4. Permittee shall not discharge any produced waters into the waters in the areas of proposed activity.

5. Permittee, Permittee's contractors and sub-contractors shall not discharge any human waste from any vessel that does not meet or exceed the requirements of the Department of Health and Hospitals.
6. If access route traverses a currently productive public oyster area, the Applicant shall secure approval of the access route from LDWF and shall ingress and egress to the project location only along the approved route.
7. Permittee shall establish and maintain, until the project is complete, along the access route appropriate access route markings for vessels traveling to and from the project location. These markings may be subject to applicable local, state, and federal navigation requirements. These markings shall be sufficient to be used during day and night operations as well as in any climatic and sea condition which may occur during permitted activities.
8. Permittee shall provide legal representation and indemnification to LDWF for any and all lawsuits and legal claims that may be filed or made against LDWF as a result of the activities by Applicant.
9. This permit specifically does not authorize prop washing, wheel washing, dredging, or jetting beyond what is shown in the application and drawings. Any changes or variances in the location, access route, volume of material moved and/or magnitude of the area of impact shall require formal application to, and prior written authorization from, DNR. The decision by DNR whether to authorize those changes will require consultation by DNR with LDWF in strict adherence to all applicable provisions of the February 3, 2005 Memorandum of Agreement between those two agencies.
10. Permittee shall have at the project location float booms for containing any spills.
11. At the discretion of the Secretary or Deputy Assistant Secretary of the Louisiana Department of Wildlife and Fisheries, any activities may be suspended until more favorable conditions prevail.
12. Permittee shall provide a letter of completion and as-built drawings of the completed project to the LDWF no later than 60 days following completion of the permitted activity.
13. At the discretion of LDWF, a post-project bottom contour and side-scan survey may be required. The results of these surveys will be made available to the Department, upon request.
14. Permittee shall remove or spread any dredged material which is greater than 0.5 feet above original bottom contours.
15. At the discretion of LDWF, the Permittee may be required to return all or part of water bottoms to pre-project conditions.
16. All vessels utilized under this permit shall be of such size and loaded in such a manner as to not impact the water bottoms over which they pass.
17. Permittee shall provide to the Louisiana Department of Wildlife and Fisheries a water bottom assessment (unless waived by LDWF) that meets LDWF water bottom assessment sampling protocol prior to commencement of permitted activity.

- O. If the project authorized under the authority of this General Permit is located on the aboriginal homelands of the Chitimacha Tribe of Louisiana and/or at any time during the course of work any traditional cultural properties are discovered, the permittee shall immediately contact Kimberly S. Walden (Cultural Director) or Melanie Aymond (Research Coordinator) at (337) 923-9923 or (337) 923-4395. Office hours are Monday through Thursday from 7:30 AM - 5:00 PM. and on Friday between 7:30 AM and 11:30 PM. If traditional cultural properties are discovered on the weekend or after business hours, the notification shall be made the next business morning.

**III. This General Permit does not apply in the following locations without prior written authorization from the appropriate agencies:**

- A. Work under the authority of this General Permit shall not be approved in the following areas, without prior written approval of the Louisiana Department of Wildlife and Fisheries (LDWF):
1. Within one-quarter mile of the boundary of or within a currently productive oyster seed ground, oyster seed reservation or public oyster harvesting area; or
  2. Within the boundaries of an LDWF-owned or managed wildlife refuge or wildlife management area; or
  3. Within 1,000 feet, or other distance deemed appropriate by LDWF, of a known bald eagle nest; or
  4. Within 1,500 feet, or other distance deemed appropriate by LDWF, of a known bird rookery area.
  5. Within the officially designated critical habitat of a threatened or endangered species.
- B. Work under the authority of this General Permit shall not be approved in the following areas, unless the applicant first provides a letter of no objection from the Louisiana Department of Culture, Recreation, and Tourism.
1. Within a State Park, State Recreation Area or State Commemorative Area; or
  2. Within any known historic or archaeological site or within the boundaries of an historical district.
- C. Within 1,000 feet of an established navigation channel or fairway constructed, owned, operated, or maintained by federal, state or local governments, or with federal, state or local government funds, without written consent of each appropriate agency or governing body. An authorization request that is not accompanied by such written permission shall be processed as an application for an individual CUP. If, however, there is a physical barrier at the project site that isolates the Coastal Use from the navigation channel or fairway and effectively prevents any interchange between the two, this restriction does not apply.
- D. Within 1,000 feet of a levee or other flood control facility constructed, owned, operated or maintained by federal, state or local governments, or with federal, state or local government funds, without the written consent of each appropriate agency or governing body.

- E. Within 1,500 feet of a barrier island, barrier island feature, chenier, or other coastal feature without the approval of the appropriate resource agencies that CMD determines to have programmatic interests.

**IV. This General Permit does NOT apply in the following situations:**

- A. Within 1,000 feet of an area determined to be a unique ecological feature by the Secretary of DNR.
- B. Within Special Significance Areas designated pursuant to R.S. 49:214.41(F) and those rules and regulations adopted thereunder, where applicable.
- C. Within the boundaries of a national park or monument, national wildlife refuge or established buffer zone for any such national site.

**V. Special Conditions:**

- A. 12 inch maximum inside diameter and a maximum of 10,000 feet in length for pipelines to be authorized under the authority of this General Permit.
- B. No dredging or propeller washing, including that required for access is authorized under the authority of this General Permit.
- C. Pipelines routes shall be located in non-wetland areas and existing disturbed corridors (e.g., spoil banks) whenever feasible and practicable, unless the Secretary determines that such location would have significant adverse impacts to contiguous wetlands.
- D. In wetlands and on spoil banks, pipelines shall be laid on the surface of the ground, buried to a depth of no less than three feet below the existing ground surface, or placed on pipe bents, except as may be otherwise provided by the Secretary. If other pipelines are encountered along the installation route, the pipeline being installed shall be buried below the encountered pipeline(s) if necessary to meet the minimum burial depth requirement of three feet.
- E. In open water areas, pipelines shall be buried (trenched, jetted, or directionally bored) to a minimum of three feet below the mudline, except as may be otherwise directed by the Secretary. If other pipelines are encountered along the installation route, the pipeline being installed shall be buried below the encountered pipeline(s) if necessary to meet the minimum burial depth requirement of three feet. Pipeline trenches shall be backfilled to within six inches of pre-project bottom contours upon completion of pipeline installation. Pipeline burial in such locations shall comply with Special Condition E. and F. Where it is determined to be necessary by the Secretary, an appropriate quantity of suitable erosion resistant material (rock or other material approved by the Coastal Management Division) shall be placed on each canal bank, natural bank, or shoreline at the location(s) of pipeline crossings. Such shoreline stabilization shall not extend further than 10' below MLW and shall be maintained for the life of the project.

- F. Trenches dredged for the burial of pipelines shall be restricted to the minimum width required for safe working conditions; however, the top width of trenches shall not exceed 6 feet. Material dredged from the trenches shall be temporarily stockpiled adjacent to the trenches. Stockpiled material shall be clearly marked, and the markers shall be maintained, to minimize any possible hazard to navigation. Trenches shall be backfilled upon successful testing of the pipeline; however, all trenches shall be backfilled within thirty (30) days of dredging.
- G. If replacement of an existing pipeline is authorized under the authority of this General Permit, that portion of the old pipeline to be replaced shall be removed, unless it is determined by the Secretary that deferring removal of the pipeline would be in the public interest, provided that the applicant agrees to retain liability for the pipeline and that letter(s) of no objection to leaving the pipeline in place is received from:
1. LDWF for areas:
    - a. within one-quarter of a mile or within the boundaries of an oyster lease, oyster seed ground, oyster seed reservation or public oyster harvesting area or other shell reef area; or
    - b. within the boundaries of an LDWF owned or managed wildlife refuge or wildlife management area; or
    - c. within an area designated as a natural and scenic river in accordance with the provisions of R. S. 56:1840.
  2. The Louisiana Department of Culture, Recreation and Tourism for areas within:
    - a. within a State Park, State Recreation Area or State Commemorative Area; or
    - b. within any known historic or archaeological site or within the boundaries of an historical district.
  3. The Louisiana Department of Natural Resources' Pipeline Operations Division
  4. The State Land Office
- H. Pipelines installed under the authority of this general permit shall be removed within one hundred (120) days of abandonment unless it is determined by the Secretary that deferring removal of the pipeline would be in the public interest, provided that the applicant agrees to retain liability for the pipeline and that, if appropriate, a letter of no objection to leaving the pipeline in place is received from:
1. LDWF for areas:
    - a. Within one-quarter of a mile or within the boundaries of an oyster lease, oyster seed ground, oyster seed reservation or public oyster harvesting area or other shell reef area; or
    - b. Within the boundaries of an LDWF owned or managed wildlife refuge or wildlife management area; or
    - c. Within an area designated as a natural and scenic river in accordance with the provisions of R. S. 56:1840.

2. The Louisiana Department of Culture, Recreation and Tourism for areas within:
    - a. within a State Park, State Recreation Area or State Commemorative Area; or
    - b. within any known historic or archaeological site or within the boundaries of an historical district.
  3. The Louisiana Department of Natural Resources' Pipeline Operations Division
  4. The State Land Office
- I. If the applicant has a clearly identifiable need to leave the pipeline in place (i.e., possible future use, conflicting activities, and etc.) The Secretary may authorize the permittee to allow the pipeline to remain in place for a period of 1 year. During this period of time, the authorization shall not be transferred without specific acceptance of the responsibility to remove the pipeline as agreed. In order for the Secretary to consider authorizing a delay in removing an abandoned pipeline, the applicant must provide detailed justification timing for the delay in removing the pipeline.
  - J. All pipelines removed under the authority of this General Permit shall be disposed of in accordance with applicable federal and state regulations and guidelines, and the pipeline trench shall be completely backfilled in accordance with Special Condition E.
  - K. All pipelines removed under the authority of this General Permit shall be purged at the time of removal accordance with applicable federal and state regulations and guidelines.
  - L. As-built drawings shall be submitted within 30 days of completion of this project to the Louisiana Department of Natural Resources, Office of Conservation, Pipeline Division, P. O. Box 94275, Baton Rouge, La. 70804 and to the Louisiana Department of Natural Resources, Coastal Management Division, P.O. Box 44487, Baton Rouge, La. 70804-4487.
  - M. Trenches, up to 1,000 feet long, authorized for the lowering and/or repair of existing pipelines, not limited to 12 inches in inside diameter, shall be restricted to the minimum width required for safe working conditions; however, the top width of trenches shall not exceed 12 feet. Material dredged from the trenches shall be temporarily stockpiled adjacent to the trenches. Stockpiled material shall be clearly marked, and the markers shall be maintained, to minimize any possible hazard to navigation. Trenches shall be backfilled upon successful testing of the pipeline; however, all trenches shall be backfilled within thirty (30) days of dredging.
  - N. Work areas required for pipelines crossing other pipelines metering stations, corrosion protection facilities, and to tie into other pipelines shall be no larger than 30 feet wide X 30 feet long X 9 feet deep, directional drilling locations for the installation of pipelines shall be no larger than 30 feet wide X 75 feet long X 9 feet deep, are authorized under the authority of this General Permit. Material dredged from the trenches shall be temporarily stockpiled adjacent to the trenches. Stockpiled material shall be clearly marked, and the markers shall be maintained, to minimize any possible hazard to navigation. Trenches shall be backfilled upon successful testing of the pipeline; however, all trenches shall be backfilled within thirty (30) days of dredging.

VI. Definitions

A. As used in this general permit, the following terms shall have the meaning ascribed to them:

1. "Pipelines" shall refer to lines 12 inches or less in inside diameter which carry oil, gas, and salt water. Lines which carry sulphur, caustics, or other hazardous or toxic substances shall not be authorized by this general permit.
2. "Wetlands" means an open water area or an area that is inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and under normal circumstances does support, a prevalence of vegetation typically adapted for life in saturated soil conditions which occur within the designated coastal zone of the state. Wetlands generally include swamps, marshes, bogs, and similar areas.
3. "Abandonment" occurs when something is no longer used for the purpose in which it was authorized.
4. "Push Pull Method" refers to the method of pushing and pulling a pipeline from a staging or construction area without using wheeled or tracked vehicles on the marsh.

\*\*\*\*\*END OF CONDITIONS\*\*\*\*\*

By accepting this permit the applicant agrees to its terms and conditions.

I affix my signature and issue this permit this 17<sup>th</sup> day of February, 2009.

DEPARTMENT OF NATURAL RESOURCES

  
\_\_\_\_\_

Jim Rives, Administrator  
Coastal Management Division

This agreement becomes binding when signed by the Administrator of the Coastal Management Division, Department of Natural Resources.
