Dear Commissioner:

Under Order # 29-D-1, McGowan Working Partners Inc. respectfully requests that we be allowed to commingle production from the above listed wells into the Kinder CF #1 production facility, facility ID (924360).

Pursuant to this request, please find the following:

1. Diagrammatic sketch of the mechanical installation with an explanation of oil & gas.
2. Signed statements that commingling will allow accurate measurement, not create inequities, and that interest owners will recover fair share of hydrocarbons produced.
3. Allocation of production to captioned wells will be determined by monthly well tests.
4. List of known owners, affected parties.
5. Our check in the amount of \$252.00.

If the above cannot be approved administratively, we request a hearing date at your earliest convenience.

Re: Commingling Permit Request  
Explanation of flow of gas and liquid hydrocarbons  
Production Facility: Kinder CF #1  
Facility ID: (924360)

Wells: Kinder Canal No. 01, S/N: 218177  
M RA SUA; Kinder Canal Co A No. 01-ALT, S/N: 55539  
VUA; Stout-Kinder Canal No. 07, S/N: 192736  
S1 RA SUA; Stout-Kinder Canal No. 08, S/N: 217249  
S RA SUA; Stout Kinder Canal No. 06, S/N: 163300  
Sherman M Houston No. 03-D, S/N: 59565

The six (6) above captioned wells will be pumped through a header which then flows into a separating vessel (rail car). The oil, gas and water are then separated in the vessel. The oil is dumped into stock tanks where it is metered before selling through a load line to truck. The saltwater is dumped to a saltwater disposal well. Gas is vented off the top of the separator and piped into a gas sales line and or lease use as needed.

Each well can be tested by shutting of the valve at the header and flowing the product to a test vessel where the oil, gas and saltwater are metered. The product is then returned to the system downstream of the header and upstream of the separating vessel.

Testing will be done on a monthly basis.

Dear Commissioner:

Pursuant to our request to use the Kinder CF #1, Facility ID (924360), to a commingling facility for the captioned wells, please be advised that in the opinion of McGowan Working Partners, Inc. the commingling of oil, gas and/or other hydrocarbons and the use of the well test method for allocation of production will provide reasonable accurate measurement, will not create inequities, and that the owners of an interest will have the opportunity to recover their just and equitable share of the reservoir content.

If any additional information is required, or you have any questions or concerns please feel free to contact me at (601) 982-3444 (voice), (601) 982-4014 (fax), or [glenn@mcgowanwp.com](mailto:glenn@mcgowanwp.com) (e-mail).

Dear Commissioner:

Pursuant to our request to use the Kinder CF #1, Facility Code (924360), to a commingling facility for the captioned wells, this letter serves to verify that the oil meters used in the well tests for the referenced facility will be calibrated at least monthly and the gas meters will be calibrated at least quarterly.

If any additional information is required, or you have any questions or concerns please feel free to contact me at (601) 982-3444 (voice), (601) 982-4014 (fax), or [glenn@mcgowanwp.com](mailto:glenn@mcgowanwp.com) (e-mail).
