7400 RB VUC (LUW: 516571) (GTA 2 #28D – SN: 92823)
SL 17935 (LUW: 049831 – SN: 230696)
FACILITY ID: 953180

Dear Mr. Magee:

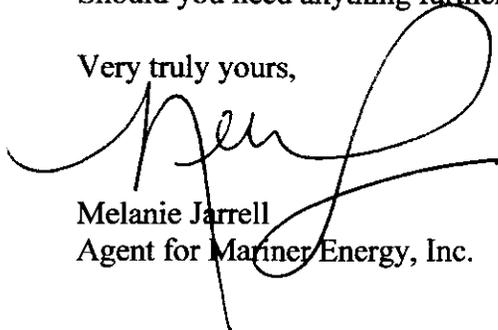

Mariner Energy, Inc. (Mariner) respectfully requests approval for the wells/LUWs listed above to commingle into the existing South Pass Block 24 Commingling Facility (which includes W1 and W2 platforms and associated wells).

Mariner understands that a Public Hearing is required since Mariner was unsuccessful in locating every stakeholder involved in this field. Mariner will, once a date is established for the hearing, submit a written notice via regular United States mail to all of the stakeholders Mariner was able to locate, and also publish a notice in the local newspaper announcing the date, time, and place of the public hearing.

Enclosed is Mariner's application for commingling, which includes drawings and text explaining the commingling process at the South Pass Block 24 field since it was acquired from Forest Oil and restored/refurbished after hurricane damages.

Should you need anything further, please call me at 904-537-3507.

Very truly yours,

Melanie Jarrell
Agent for Mariner Energy, Inc.

For Mariner Energy, Inc.

Consolidated W-1 Facility (95318)

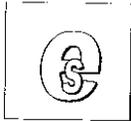

South Pass Block 24 Field
Plaquemines Parish, Louisiana

In the opinion of the applicant, the commingling of gas and/or liquid hydrocarbons and the use of metering for allocation of oil and gas production, as proposed under this application to the Louisiana Office of Conservation, will provide reasonably accurate measurement and will not create inequities. Each owner of any interest (herein) will have the opportunity to recover his/her just and equitable share of the reservoir content. All liquid and/or gas meters employed in the installation covered by this application will be of a proved, commercially available type. Moreover, suitable means of calibrating each liquid meter are provided, such that the accuracy of each meter in operation can be proved.

Dear Mr. Magee:

As per a conversation today, I am resubmitting the 2 drawings (W1 and W2 schematics) to show the three wells that Mariner is requesting for commingling approval. I have requested a listing of all known interested parties from the Mariner Land Department. It is included in this package.

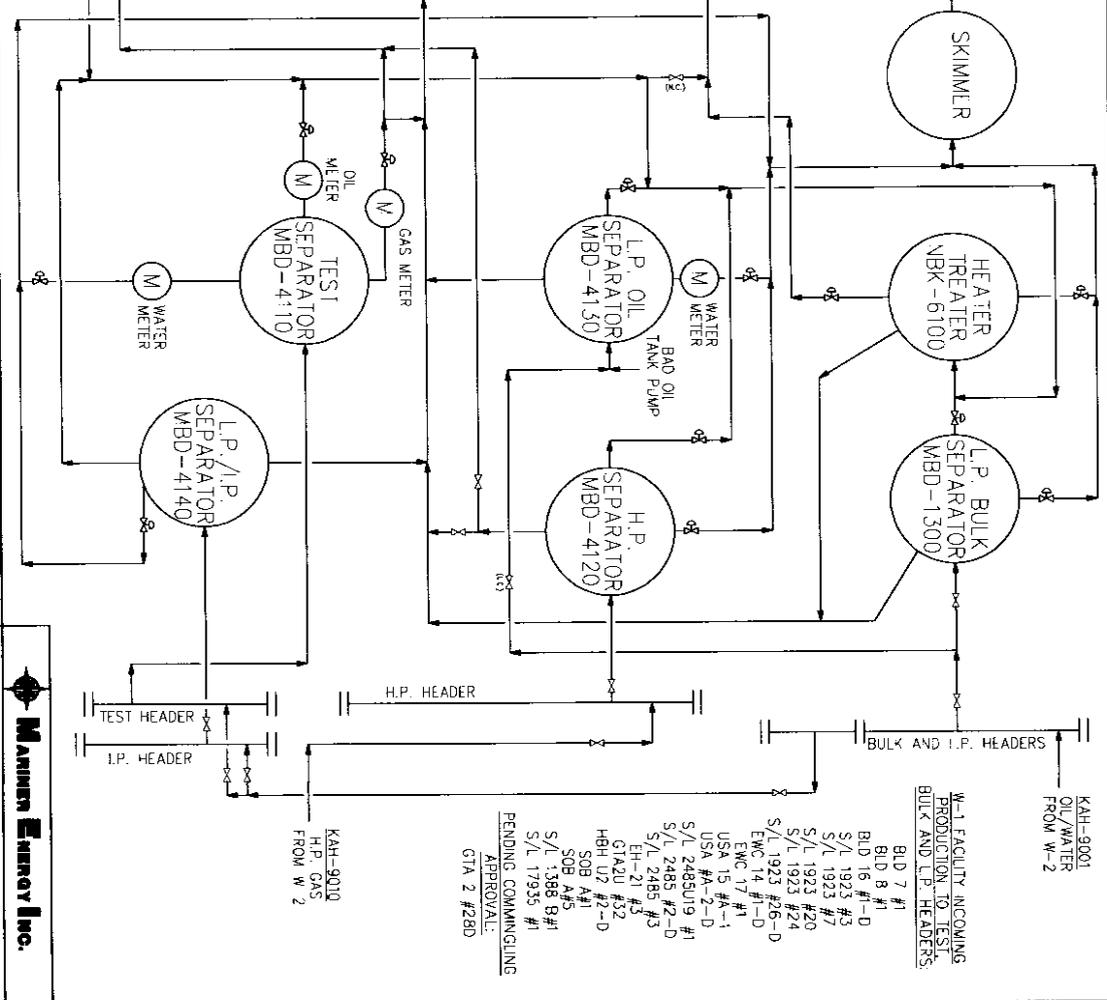

Should you need anything further, please call me at 904-537-3507.

Very truly yours,
