

2008 EVHA Gold Award - Stitt Energy Systems, Inc.

Category: Custom

Climate: Moderate

Location: Springfield, Missouri

Square Footage: 3,718 s.f.

Construction Cost: \$167 per s.f.

Energy Features

Stitt Energy Systems isn't new to energy-efficient home building or the EnergyValue Housing Award. After nearly 30 years of building homes, Stitt Energy Systems has an unwavering commitment to energy efficiency. Its mission, which hasn't changed since the company's inception, is "to provide energy efficient homes that are environmentally responsible for the health, welfare, and happiness of our customers, our employees, our investors, and future generations." According to the judges, Stitt Energy Systems has demonstrated "exceptional practice" with this custom home. Passive and active solar systems, combined with state-of-the-art efficiency features, contribute towards the \$67 monthly energy bills accrued on average during the first year of occupancy.

Are you a home builder that
is a cut above?

Do you like to build beautiful homes
that are energy efficient and
environmentally responsible?

We would like for Louisiana builders
to be recognized for their tireless
efforts, especially in the rebuilding
after Katrina and Rita.

DID YOU KNOW:

- Over the past 14 years, a NATIONAL competition has been going on with winners receiving recognition for building the most energy efficient homes in the country!
- Energy Value Housing Award (EVHA) is a National award program.
- EVHA is sponsored by the Department of Energy and the National Association of Home Builders.
- The Department of Natural Resources is the proud recipient of the EPA Energy Star Homes Outstanding Achievement Award for seven years, providing support for Energy Star homes built in Louisiana. With EVHA Winners, Louisiana will be put on the map again and recognize those builders that have been going above and beyond by utilizing best practices.

EnergyValue Housing Award Guide: How to Build and Profit with Energy Efficiency in New Home Construction

The EnergyValue Housing Award guide is a compilation of best practices of winners of the national EnergyValue Housing Award – which recognizes builders who voluntarily incorporate energy and resource efficiency into new home design, construction, and marketing. This book is valuable to builders who are thinking about creating a market niche with energy efficiency. It includes information on the basics of energy efficient construction, tried-and-true ideas from successful builders, and a list of resources for those wishing to learn more.
