Addendum # 1

Vendor's Question and State's Response:

Question 1: "On page 45 of Part III, section 4.5 Navigational Lights, you are requesting Automatic Power, Inc. Model FA-249 or approved equal.

I respectfully request that the Sealite Model SLCGC60-W be allowed as an approved equal. Attached above is a PDF on our marine lantern. As you will read, this Sealite Model is U.S. Coast Guard Approved for use in Class C waters as an obstruction light. It is a totally self contained marine lantern and does not require the cumbersome Lift, Solar Panels, Battery Box and Steel Mounting that is required in the API Model FA-249. In addition the cost is substantially less than the FA-249 assembly package. The SLCGC60-W simply mounts to the Pilings with bolt hardware. The Battery Service Life averages 5 Years and utilizes 6 ultra-high intensity LEDs offering >100,000 hours of life expectancy."

Answer 1: To keep things consistent at this project site we elect not to use the Sealite Model SLCGC60-W. We have an Automatic Power single lift assembly with FA-249 Marine Lantern currently on site. Additionally, the maintenance contract has the Automatic Power lift assembly with FA-249 marine lantern listed and a price established for any future repair or replacement.

The following items are to be addressed in addendum # 1:

1. Coast Guard permit issued.
2. Davis-Bacon wage determination and reporting will not be required for this contract.
3. Pre-Bid Conference Sign-In Sheet.
