REQUEST FOR QUALIFICATIONS

ISSUE DATE: August 26, 2022

TITLE: **PART A: PRE-SITE RESTORATION SERVICES and
PART B: SITE RESTORATION SERVICES (Construction Management at Risk)**

**Orphaned Well Site Remediation and Restoration Management – Monroe District with Option for
Federal Well Sites in Monroe and Lafayette Districts**

Project No.

August 26, 2022

ISSUED BY: State of Louisiana
Department of Natural Resources
Oilfield Site Restoration Program
LaSalle Building
617 North Third Street, 9th Floor
Baton Rouge, LA 70802

SEALED “PROPOSALS” (Statements of Qualifications) will be received until **12:00 p.m. local time, Monday, September 26, 2022**, for furnishing the work described herein. The **“PROPOSAL”** package must be labeled **“PART A: PRE-SITE RESTORATION SERVICES and PART B: SITE RESTORATION SERVICES (Construction Management at Risk), well site remediation and restoration management – Monroe District with Option for Federal Well Sites in Monroe and Lafayette Districts**

State Project No. __431-PA23-001__” and shown clearly on the outside of the package. Deliver Proposals to the address listed above.

In compliance with this Request for Qualifications and with all Conditions imposed herein, the undersigned offers and agrees to furnish services in accordance with the attached signed Proposal.

I certify that I have read and understand this Request for Qualifications and am duly authorized to sign this proposal for the Proposer. I certify that the language in this document has not been altered in any way and appears as originally transmitted by the issuing authority.

NAME AND ADDRESS OF FIRM (PROPOSER):

_____ DATE: _____

_____ BY: _____

_____ NAME: _____

_____ TITLE: _____

PHONE: _____

FAX: _____

The PROPOSAL package shall include one (1) manually signed original, eight (8) complete hardbound copies, and one (1) USB drive (Proposal and all attachments) in PDF format. Proposals may also be delivered electronically to the following email address: Katie.vance2@la.gov.

1.0 GENERAL INFORMATION

1.1 INTRODUCTION AND PURPOSE

The purpose of this Request for Qualifications (RFQ) is to solicit Proposals (Statements of Qualifications) from qualified Project Managers to establish contracts for Part A: Pre-Site Restoration Services and Part B: Site Restoration Services (Construction Management at Risk) for the State of Louisiana (herein defined as “State”). State intends to contract with a qualified Pre-Site Restoration Manager (PSRM) to provide Pre-Site Restoration Services and a Site Restoration Manager at Risk (SRMR) to provide project management services including guaranteeing the maximum cost of project work through a Guaranteed Maximum Price contract (GMP). The contracting of Part B: Site Restoration Services with the successful Pre-Site Restoration Manager will be a State option. Selection of the PSRM/SRMR will be a selection method based on the Criteria Evaluation and Scoring addressed in Section 5 of this RFQ. The State seeks a qualified PSRM / SRMR to coordinate the day-to-day facilitation, communication and management of Pre-Site Restoration Design Assist and the Management of this project for the various components described in this RFQ. It is anticipated that the SRMR will be responsible and accountable to manage several second-tier contractors.

The State is utilizing the Construction Management at Risk (CMAR) delivery method system based on the authority provided in RS 30:86(E)(7) and 92(C) and RS 38:2225.2.4 in order to undertake Orphaned Well Site Remediation and Restoration utilizing Infrastructure Investment and Jobs Act (“IIJA”) funding, which necessitates meeting federal requirements and guidance. These federal requirements and the volume of work to be done recommend utilization of CMAR, as the proposed project will be complex, require collaboration and cost control, and have a tight time-frame among other reasons.

Because CMAR is normally utilized for construction projects as opposed to procurement of the services outlined in this RFQ, the terminology used in RS 38:2225.2.4 is not necessarily descriptive of the State or management services contractor under this request. Therefore, those terms found in RS 38:2225.2.4 may be modified throughout this request to apply the analogous parties and activities for this RFQ. For instance, use of the term State or LDNR herein may take the place of the term “Owner.” Likewise, Site Restoration may take the place of the term “Construction,” with Pre-Site Restoration Manager and Site Restoration Manager at Risk replacing “Pre-Construction Manager” and “Construction Manager at Risk.” Despite this, the terms utilized for CMAR contracts may be used within this RFQ and should be interpreted as having the meaning of their analogous terms mentioned herein. A complete description of these terms is found in the *Definitions* section of this request. Finally, in compliance with the specific requirements of the Oilfield Site Restoration Act (R.S. 30:80, et seq.) other changes to the normal CMAR requests and requirements are made throughout.

The State has determined the CMAR delivery method of procurement shall be in the public interest and beneficial to the Owner because of the number of wells to be plugged and remediated and the limited nature of the Federal funding necessitating a “best value” approach.

It is expected that the SRMR will engage an Engineer of Record (Design Professional which shall be understood interchangeably with “Architect” and/or “Architect of Record”) acceptable to the State to act as the Engineer of Record for purposes of this project as set forth herein and in the Contract Documents.

The expectation is that State will utilize two different SRMRs for this project and for Project No. 431-PA23-002, though State recommends interested proposers to apply for both.

During Pre-Site Restoration Services, should the Site Restoration Manager and State be unsuccessful at arriving at an agreed to GMP, the Pre-Site Restoration Services Agreement shall be terminated. In accordance with State of Louisiana revised statute RS 38:2225.2.4 subparagraph G.(6):

“If owner and the CMAR contractor are not able to agree upon constructability, construction phasing and sequencing, the GMP for the project, the maximum number of contract days to complete the project, and to reach a negotiated agreement, then the project shall be readvertised and publicly bid utilizing the design-bid-build delivery method, provided the CMAR contractor shall be prohibited from bidding on the project.”

1.2 GENERAL DESCRIPTION AND BACKGROUND

This project consists of managing and ensuring the plugging, abandonment, and remediation of orphaned wells and associated sites and facilities located in several fields within the LDNR, office of conservation’s Monroe District, with an option for federal well sites located in the Monroe and Lafayette Districts, further identified in Exhibit 6. At the sole option of the State the project may be expanded to include the plugging, abandonment, and remediation of orphaned wells and associated sites and facilities located in any of the LDNR, office of conservation’s Districts. The SRMR team shall assist the Design Professional in confirming the overall scope, time-line, and cost for the oilfield site plugging, abandonment, remediation, and required environmental (methane emissions and water quality) sampling, reporting, and other surveys. In addition to the site restoration work typically performed by a contractor for the orphaned well program, this project will include meeting those requirements and recommendations set forth in the U.S. Department of Interior’s IIJA FY 2022 State Initial Grant Guidance in Exhibit 10 (“Federal Guidance for Initial Grant”).

The SRMR shall be responsible for all coordination between the State, the design team, other contractors of the State, and other stakeholders identified by State (Project Team) in order to facilitate the establishment of the aforementioned methane monitoring system.

The SRMR shall determine whether certain elements of the entire project can be completed simultaneously. The SRMR shall consider the State’s priority in overall schedule and completion of the various subparts / phases and be responsible for making final determinations on scheduling, and the management of all aspects of the plugging, remediation, environmental sampling, reporting, and survey activities with the goal being the delivery of the subparts/ phases in a timely manner so as to allow the State to meet the deadlines set forth in the IIJA and DOI Guidance.

1.3 WORK TO SUPPORT AN ACCELERATED START

It is anticipated that Advanced Project Start (APS) activities may be amended into / become part of the Part A: Pre-Site Restoration Services contract accompanied by a mutually agreed to increase / adjustment to the Pre-Site Restoration fee / contract amount and contract time. APS will primarily include long-lead permitting, pre-plugging methane measurement, water quality measurement, Disadvantaged Communities Surveys, and other specified site or well surveys. APS may also include orphaned site restoration and remediation.

1.3.1 LONG LEAD / METHANE EQUIPMENT

Due to the State's desire to complete the project as soon as possible, the SRMR shall identify long-lead items (i.e. methane monitoring equipment, cement, downhole equipment, staffing) for inclusion in the APS activities. The SRMR team will work with the DNR to determine what long lead items and measurement processes are required.

1.3.2 WATER QUALITY

Accelerate water quality review at well sites. Also, determine potential water quality benefits of removing orphan sites. The SRMR team will work with the DNR to determine what long lead items and measurement processes are required.

1.3.4 OTHER SITE SURVEYS

Other site surveys may include, among other things, certain downhole surveys, visual site inspections, surveys of nearby residences, and surveys to identify nearby potential contamination pathways.

1.3.5 DISADVANTAGED COMMUNITIES

Determining methods of identifying and quantifying Disadvantaged Communities, including Low-income Communities, Tribal and Indigenous Communities, and Communities of Color in vicinity of orphaned well sites and identifying benefits of remediation of such well sites to those communities.

1.3.6 ORPHANED SITE RESTORATION

Plugging and abandonment of orphaned wells, removal of associated facilities, equipment and debris and site restoration consistent with the requirements set forth in this RFQ and Contract Documents.

1.3.7 LONG-LEAD PERMITTING

Long-lead permitting, such as but not limited to compliance with Louisiana Office of Coastal Management, Louisiana Department of Environmental Quality, and U.S. Army Corps of Engineers regulatory requirements.

1.4 STATEMENT OF NEEDS

1.4.1 PROJECT TEAM

- 1.4.1.1 The State will have a primary representative for the project who will provide oversight and assist in all matters of project coordination and decision-making. The State plans to coordinate with, as part of the Project Team, state contractors and partners, including, its Methane Emissions Predictive Study and Orphan Site Administrator contractors.
- 1.4.1.2 Pre-Site-Restoration Manager (PCM)/Site-Restoration Manager at Risk (CMR) shall have key representatives residing for the length of the project within close proximity to the work sites or a maximum of a two-hour driving time from the sites.
- 1.4.1.3 SRMR has or will contract for complete project management, field personnel, engineering, environmental, and other professional services.
- 1.4.1.4 At this time, the State intends to utilize an accelerated selection process to procure Site Restoration Management at Risk Services. The initial phase (Part A: Pre-Site Restoration Services - AIA A133 -2019 as modified by State) will bring the successful proposer into the Project Delivery Team as a Pre-Site Restoration Manager (PSRM) providing advice, estimating support, analyses, scheduling support, site logistics, bid trade strategy, provision of a Control Estimate, work to support Accelerated Activities referenced in paragraph 1.3 if utilized and other services. The second phase (Part B: Site-Restoration Services AIA A133-2019 as modified by State) shall be contracted separately to negotiate a Site Restoration Manager at Risk Agreement. For the Pre-Site Restoration Manager to be invited to sign a Part B: Site Restoration Services (Construction Manager at Risk) contract, State will need to be convinced that the State has received excellent service and competitive pricing during the Pre-Site Restoration phase and that the State reasonably expects to receive the same in the Site Restoration Phase. State reserves the right to award the Part B: Site Restoration Services contract.
- 1.4.1.5 After the selection of the Pre-Site Restoration Manager (PSRM) but prior to the selection or confirmation of the Site Restoration Manager at Risk (SRMR) and the issuance of the Part B: Site Restoration Services Contract, State desires to implement a process for prequalification, selection and/or confirmation of Key Subcontractors. The Key Subcontractor prequalification, selection/ confirmation process is anticipated to involve Pre-Site Restoration Manager, Site Restoration Manager at Risk, Project Delivery Team, and others to arrive at a selection method that will:
 - 1.4.1.5.1 Encourage participation of qualified Local (domiciled within the State of Louisiana), Disadvantaged Business Enterprise (DBE) and Veteran-Owned Firms.

- 1.4.1.5.2 Ensure a cultural fit for Project and Project Delivery Team.
- 1.4.1.5.3 Ensure that State's Key Project Values are achieved (See Exhibit 2).
- 1.4.1.5.4 Ensure alignment with relevant sections of AIA A133-2019, as modified by State, and AIA A201-2017, as modified by State, included by attachment to this RFQ.

1.4.1.6 The Pre-Site Restoration Manager (PSRM) and Site Restoration Manager at Risk (SRMR) will be integral member(s) of the Project Delivery Team and accordingly will be actively involved in all aspects of design assistance, value engineering, creative problem solving related to the project and post Project monitoring or surveys. PSRM/SRMR shall provide detailed design review(s) for Project work, analysis and recommendations regarding the performance of the design in relationship to quality, budget confirmation, phasing determinations, and schedule compliance all in a collective effort to deliver the most cost-effective project. In providing services to the State, the PSRM/SRMR shall cooperate with and maintain a high degree of professionalism with the entire Project Delivery Team.

1.4.2 DESCRIPTION OF PRE-SITE RESTORATION AND SITE RESTORATION MANAGEMENT SERVICES

In accordance with the Part A: Pre-Site Restoration Services agreement, it is expected that the successful Proposer will provide Pre-Site Restoration design-assist services. Based on the performance of the Site Restoration Manager during Part A: Pre-Site Restoration Services, the State will have the option to contract Part B: Site Restoration Services (Site Restoration Management at Risk) with the Proposer.

The Part A: Pre-Site Restoration Services and Part B: Site Restoration Services Agreement (AIA A133-2019 as modified by the State) is attached as Exhibit 7 to this RFQ. PSRM/SRMR services are divided into phases or parts, but the services described under each phase may overlap and apply to preceding or subsequent phases as well. The two (2) Project phases or parts are more fully described in Exhibit 3, Pre-Site Restoration Services Scope of Work and Exhibit 4, Site Restoration Services (Site Restoration Manager at Risk) Scope of Work, in this solicitation.

Part A: Pre-Site Restoration Services (Design Assist)

Part B: Site Restoration Services (Construction Management at Risk)

2.0 ADMINISTRATIVE INFORMATION

2.1 DEFINITIONS FOR REQUEST FOR QUALIFICATIONS

For purposes of this Request for Qualifications, the following words and terms shall have the meaning specified below:

1. **Agreement** shall mean the terms and conditions outlined in the Pre-Site Restoration / Site Restoration Management Agreement (AIA A133-2019 as modified by State) or contract; the form of the Agreement that is included as Exhibit 7 of this RFQ.
2. **Available Funds for Construction (AFC)** shall mean the total not-to-exceed budget for the sum of all parts of the Program, which is estimated to exceed \$15,000,000.00.
3. **BOP Test** This test is to verify the good working condition of the BOP. The hydraulic closure system on the preventers must be operational at all times. Pressure test to qualify integrity of BOP body, connection to wellhead, and seal of blind or pipe ram elements. A retest is required each time the BOP stack is removed and subsequently reinstalled on the well.
4. **Commencement of Work** Physically and actively performing the scope of work contained in this request, such as pre-plugging methane monitoring, closing a pit or plugging a well. This definition does not include moving equipment on to the location or “visiting” the location.
5. **Communities of Color** are those communities with a higher than national average percent of individuals in a block group who list their racial status as a race other than white alone and/or list their ethnicity as Hispanic or Latino. That is, all people other than non-Hispanic white-alone individuals. The word “alone” in this case indicates that the person is of a single race, not multiracial. A block group is an area defined by the Census Bureau that usually has in the range of 600-3,000 people living in it.
6. **Community** either a group of individuals living in geographic proximity to one another, or a geographically dispersed set of individuals (such as migrant workers or Native Americans), where either type of group experiences common conditions.
7. **Confirmatory Clean Soil Sample** A homogenous, representative soil sample taken at the excavated surface of any pit or production facility containment area in which the pre-closure soil analysis provided by LDNR did not meet LAC 43:XIX.311 and 313 closure requirements.
8. **Design Professional** shall mean the Orphan Sites Administrator retained by the State to provide design services for the Project, including its agents and representatives. Referred to as “Design Professional”.
9. **Design Assist** shall mean the role of the SRMR in the design process in making early determinations regarding means / methods, cost analyses, selection of subcontractors (plugging companies, environmental services companies, etc.) prior to the completion of the contract documents in order to assist the design team with field work issues, conflict resolution amongst the various trades, selection of

long-lead-time equipment items and alignment of the design and program scope within an established budget.

10. **Disadvantaged Community** a community may be considered disadvantaged based on a combination of the variables below or based on its jurisdiction in the Climate and Economic Justice Screening Tool.
 - Low income, high and/or persistent poverty
 - High unemployment and underemployment
 - Racial and ethnic residential segregation, particularly where the segregation stems from discrimination by government entities
 - Linguistic isolation
 - High housing cost burden and substandard housing
 - Distressed neighborhoods
 - High transportation cost burden and/or low transportation access
 - Disproportionate environmental stressor burden and high cumulative impacts
 - Limited water and sanitation access and affordability
 - Disproportionate impacts from climate change
 - High energy cost burden and low energy access
 - Jobs lost through the energy transition
 - Access to healthcare
 - Geographic areas within Tribal jurisdictions
11. **Facility** The aggregate of vessels, separators, heaters, tanks, treaters, etc. (commonly referred to as production equipment), utilized in the producing and processing of effluents from a well.
12. **Federal Wells** Orphaned wells and well sites on Federal land are considered “Federal wells” and are eligible for funding under the Sec. 40601(b) Federal Program. Orphaned wells-and well sites associated with such wells-that were drilled subject to a federal permit to drill may be considered Federal wells eligible for funding under the Sec. 40601(b) Federal Program.
13. **General Conditions** shall mean those services and associated costs as defined in AIA A201 – 2017 (as modified by State), Exhibit 8 of this RFQ.
14. **Guaranteed Maximum Price (GMP)** shall mean the total maximum contracted amount for the entire project assigned to the SRMR.
15. **Key Subcontractor** shall mean any vendor with a direct contractual relationship under the selected SRMR.
16. **Local Firm** shall mean any firm with headquarters in the State of Louisiana.
17. **Low-income Communities** are those communities that in the last 12 months had a median household income less than twice the poverty level.

18. **Orphan Well** A well which has been orphaned pursuant to the provisions of R.S. 30:80 et seq.
19. **State** shall mean The State of Louisiana, Department of Natural Resources (LDNR), including its agents and representatives.
20. **Pits** A natural topographic depression or man-made excavation used to hold produced water or other E&P waste. See LAC 43:XIX.301 et seq. (Oilfield Pit Regulations).
21. **Pre-Site Restoration Manager (PSRM)** shall mean the successful Proposer contracted to provide Pre-Site Restoration Management Services for the Project.
22. **Plug and Abandon** The date the well is cut and capped, or casing is cut at specified depth below mud line.
23. **Procedures** A detailed description of the work plan by which the contractor intends to carry out the scope of work.
24. **Project** shall mean the design, plugging, remediation, and restoration of Project Sites, including required monitoring, data collection and reports.
25. **Project Team or Project Delivery Team** shall mean the State, Design Professional, Methane Emissions Predictive Study Contractor, Orphan Site Administrator, Pre-Site Restoration Manager, Site Restoration Manager and their respective agents and representatives.
26. **Proposal(s)** shall mean a written Proposal (or Statement of Qualifications) based on the terms and conditions contained in this RFQ for the selection of a Pre-Site Restoration Manager/ Site Restoration Manager at Risk to provide Pre-Site Restoration Services and, at State's option, Site Restoration Services (Site Restoration Management at Risk) for the Project.
27. **Proposal Due Date** shall mean the date established in the RFQ.
28. **Proposer(s)** shall mean those entities or persons submitting a proposal for this RFQ, including their agents and representatives.
29. **RFQ** shall mean this Request for Qualifications, including all addenda, attachments, and exhibits thereto.
30. **Selection Review Committee** shall mean a group of individuals appointed by the State to review RFQ proposals, score the proposers and recommend the best-qualified firm(s) for PSRM and SRMR services.
31. **Site** The confines established for a specific well or group of wells and associated pits, tank batteries, and facilities.

32. **Site Restoration Manager** shall mean the Pre-Site Restoration Manager (during the Pre-Site Restoration Phase) and the Site Restoration Manager at Risk (during the Site Restoration Phase).
33. **Site Restoration Manager at Risk (SRMR)** shall mean the successful proposer contracted to provide overall Site Restoration Management at Risk services for the Project.
34. **Subcontractor** Any individual, firm, partnership, corporation, or combination of the two or more firms or corporations acting jointly, that are bound contractually to the contractor to perform portions of this work.
35. **Tank Battery** An area allocated in the general proximity to well sites for the purpose of containing hydrocarbons and produced water in storage tanks. It is normally bordered by containment dikes/levees. A tank battery may or may not have existing storage tanks.
36. **Tribal and Indigenous Communities** are communities whose members make up a Federally recognized Indian Tribe, a State-recognized Indian Tribe, an Alaska Native community or organization, a Native Hawaiian organization, or any other community of indigenous people located in a State, including indigenous persons residing in urban communities.

2.2 EXPECTED TIME PERIOD FOR CONTRACT

The period of any contract resulting from this RFQ is tentatively scheduled to begin with the award of the Part A: Pre-Site Restoration Services contract and extend through the Part B: Site Restoration Services contract one-year contractor warranty period and formal closeout of the project. The Part A: Pre-Site Restoration design-assist contract shall be a total of 30 calendar days, with an option to extend, at the State's sole discretion, for up to an additional 30 days, and commences at SRMAR pre-site restoration design-assist kickoff meeting and extend through the delivery of the GMP Proposal.

2.3 RFQ COORDINATOR

Request for copies of the RFQ and written questions must be directed to the RFQ Coordinator below.

Roby Fulkerson
Oilfield Site Restoration Manager
State of Louisiana Dept. of Natural Resources
Office of Conservation
LaSalle Building
617 North Third Street
Baton Rouge, LA 70802
Email : Roby.Fulkerson@la.gov

- 2.4 The RFQ is posted in electronic format at the LDNR website at <http://www.dnr.louisiana.gov/index.cfm/page/1622>

The RFQ is being issued by the State of Louisiana, Department of Natural Resources, Office of the Secretary.

2.5 SCOPE

This document contains instructions governing the Proposal (Statement of Qualifications) submittal; the submittal format, and the material contained therein; product requirements, evaluation criteria; and contractual terms and conditions.

2.6 INQUIRIES

The State will consider proposer inquiries / questions regarding RFQ requirements, Scope of SRMR Services, or Program submitted in writing to the email address listed in Section 2.3 herein, so long as such inquiries / questions are received by no later than 4:00 p.m. on September 7, 2022. A mandatory meeting is scheduled for September 7, 2022 at 1200 p.m. in the LaBelle Room on the first floor of the LaSalle Building located at 617 North 3rd Street, Baton Rouge, Louisiana 70802. Inquiries /questions regarding RFQ requirements, Scope of SRMR Services, or Program may be asked on the record. The State reserves the right to modify this RFQ should modification be in the best interest of the State.

2.7 COMMUNICATIONS

From the issuance of this RFQ until the Part A: Pre-Site Restoration Services contract award, communications concerning this solicitation, its evaluation, and negotiations are formal. All correspondence must be in writing and transmitted directly to the individual shown above in Section 2.3 of this section. Proposers are not permitted to ask questions about other competitor proposals, equipment, or services, or to seek information from State of Louisiana personnel, design team or their consultants, or the RFQ coordinator regarding this RFQ or the evaluation results. If a proposer is approached by State of Louisiana personnel other than the RFQ Coordinator with information or questions concerning this RFQ, the proposer shall immediately contact the RFQ Coordinator listed above for direction. Failure to abide by this formal communication requirement may cause the State of Louisiana to disqualify your firm's proposal from further consideration.

2.8 ADDENDA TO RFQ

Addenda to this RFQ may be issued by State by posting on DNR website by no later than 12:00 p.m., September 12, 2022.

2.9 SCHEDULE OF ACTIVITIES

RFQ Posted to LDNR Website / Issued	August 26, 2022
Mandatory Meeting	September 7, 2022
Deadline for Inquiries / Questions	September 7, 2022
Deadline for Addenda to RFQ	September 12, 2022
Proposals (Statements of Qualifications) due no later than 12:00 p.m.	September 26, 2022
Committee Review of Proposals / SRMAR Selection	Sep. 26 – Oct. 3, 2022
LDNR Approval of Contract Award	October 3, 2022
SRMAR selection announcement Target Date	October 3, 2022
SRMAR pre- site restoration design-assist kickoff meeting	October 10, 2022
Contract execution no later than	November 10, 2022

Note: The State of Louisiana reserves the right to amend and/or change this schedule of RFQ activities, as it deems necessary.

2.10 CONTRACTUAL DOCUMENT

This RFQ and the selected Proposal will become the basis for the development of the legally binding Agreement (contract) between State and Proposer. In the event the services should fail to meet the standards as specified in the Proposer's proposal, State reserves the right to terminate and cancel the contract.

2.11 REPORT DISCREPANCIES, ERRORS AND OMISSIONS

If a Proposer discovers any discrepancy, error or omission in this RFQ or any Exhibits, the State shall be notified immediately via email as provided in Sections 2.3 and 2.6 and if necessary, a written clarification, notification, and/or addenda will be posted to the LDNR website. No Proposer will be entitled to additional compensation for any error or discrepancy that appears in this RFQ.

2.12 EXCEPTIONS TO TERMS AND CONDITIONS

The Agreement between the State and the Proposer arising from this selection process shall be based solely on the terms and conditions as outlined within this RFQ, including all related exhibits. However, State reserves the right to negotiate the terms of the Agreement, General Conditions and/or Services as generally referred to in this RFQ prior to execution of the contract.

3.0 PROPOSAL INFORMATION

3.1 MINIMUM QUALIFICATIONS OF PROPOSER

In order for proposer to be considered for this engagement, Proposer, including any member of their team, must meet the following minimum qualifications. Proposers who do not meet the minimum requirements may result in a determination of non-responsive. Proposers must be able to document:

1. A minimum of five (5) years of experience as a Project Manager, oilfield site plugging and restoration manager, Engineering Firm, or other company having a portfolio consisting of a minimum of three (3) projects of similar scope or separate projects that include components of this portfolio (ie well plugging and abandonment, oilfield remediation, other environmental remediation, large project management, etc.).
2. Projects must have had activity within the past ten (10) years. Projects completed or currently underway are acceptable.
3. Proposer shall certify that the legal entity signing any contract emanating from this RFQ, or a member of their team, holds all licenses required under Louisiana law for the activity or activities they will perform under this contract.

4. If the Proposer is a Joint Venture (JV) or other combination of two or more firms, each of the firms must hold the required license(s) required for the activity or activities they will perform under this contract.
5. Attend the mandatory meeting scheduled for September 7, 2022 at 12:00 p.m. in the LaBelle Room on the first floor of the LaSalle Building located at 617 North 3rd Street, Baton Rouge, Louisiana 70802.

3.2 GENERAL REQUIREMENTS

Proposers interested in providing services under this RFQ must submit a Proposal containing the information specified in Section 4.0. The fully completed Proposal with original signatures by an authorized representative must be received in hard copy (printed) version by the RFQ Coordinator designated above by the deadline date specified in the Schedule of Activities. Fax or e-mail submissions are not acceptable. To be considered for selection, Proposers must submit a complete response to this RFQ consisting of one (1) manually signed original, eight (8) complete hardbound copies, and one complete copy in PDF format on a jump drive to the RFQ Coordinator.

Each copy of the proposal should be bound in a single volume. All information requested should be submitted; failure to submit all requested information may result in an unfavorable evaluation or rejection of the Proposal. Documentation submitted with the Proposal should be bound in that single volume. Elaborate brochures and other representations beyond that sufficient to present a complete and effective proposal are not required.

It is solely the responsibility of each Proposer to ensure that his/her Proposal is delivered at the specified place prior to the deadline for submission. Proposals, which for any reason are not so delivered, will not be considered for purposes of this RFQ.

3.3 DETERMINATION OF RESPONSIBILITY

Determination of a Proposer's ability and responsibility relating to this RFQ shall be made according to the standards set forth in LAC 34:136. The State must find that the proposer:

- Has adequate financial resources for performance or has the ability to obtain such resources as required during performance.
- Has the necessary experience, organization, technical qualifications, skills, and facilities, or has the ability to obtain them.
- Is able to comply with the proposed or required time of delivery or performance schedule.
- Has a satisfactory record of integrity, judgment, and performance.
- Is not otherwise obligated to perform any of the work included within this RFQ under Federal or State laws, regulations, or by agreement.
- Is otherwise qualified and eligible to receive an award under applicable laws and regulations.

Proposer should ensure that his/her Proposal contains sufficient information for the State to make its determination by presenting acceptable evidence of the above to perform the services called for by the contract.

3.4 RFQ ADDENDA

The State reserves the right to revise the Schedule of Activities or revise any part of the RFQ by issuing Addenda to the RFQ up to 120 hours prior to the deadline for receipt of Proposals. If an addendum is issued within less than 120 hours of the proposal deadline, an appropriate time extension for submission of Proposals will be granted.

3.5 WAIVER OF ADMINISTRATIVE INFORMALITIES

The State reserves the right, at its sole discretion, to waive administrative informalities contained in any proposal.

3.6 PROPOSAL REJECTION

The issuance of this RFQ in no way constitutes a commitment by the State to award a contract. The State reserves the right to accept or reject, in whole or in part, all proposals submitted and/or cancel the announcement if it is determined to be in the State's best interest.

3.7 WITHDRAWAL AND RESUBMISSION OF PROPOSAL

A Proposal may be withdrawn at any time up to the date and time the Proposal is due. To accomplish this, a written request signed by the authorized representative of the proposer must be submitted to the RFQ coordinator.

3.8 SUBCONTRACTING INFORMATION

The State shall have a single prime Pre-Site Restoration Manager/Site Restoration Manager at Risk as the result of any contract negotiation, and that single prime PSRM/SRMR shall be responsible for all deliverables referenced in this RFQ. This general requirement notwithstanding, a proposer may enter into subcontractor agreements in accordance with the subcontractor selection goals outlined in section 1.4.1.5 of this RFQ; however, a proposer should acknowledge in its proposal total responsibility for the entire contract.

If the proposer intends to subcontract portions of the site restoration management services or to form a joint venture or other project specific entity, the proposer should identify each subcontractor or venture partner known at the time of the proposal submission and should include specific designations of the tasks to be performed by the subcontractor or venture partner. Information required of the proposer under the terms of this RFQ is also required for each subcontractor or venture partner. Unless provided for in the contract with the State, the prime Site Restoration Manager at Risk shall not contract with any other party than those named for furnishing the work and professional services herein contracted for without the express written approval of the State.

3.9 OWNERSHIP OF PROPOSAL

All materials submitted in response to this request become the property of the State. Selection or rejection of a proposal does not affect this right.

3.10 PROPRIETARY INFORMATION

Only information that is in the nature of legitimate trade secrets or non-published financial data may be deemed proprietary or confidential. Any material within a proposal identified as such must be clearly marked in the proposal and will be handled in accordance with the Louisiana Public Record Act R.S. 44:1-44 and applicable rules and regulations. Any proposal marked as confidential or proprietary in its entirety may be rejected without further consideration or recourse.

3.11 COST OF PREPARING PROPOSALS

Costs associated with developing the Proposal, preparing for interviews/presentations, and any other expenses incurred by the Proposer in responding to this RFQ are entirely the responsibility of the Proposer. The State shall not be held liable for the reimbursement of any of these costs.

3.12 ERRORS AND OMISSIONS IN PROPOSALS

The State will not be liable for any errors and/or omissions in Proposals. The State reserves the right to make corrections or amendments due to errors identified in Proposal(s) by State or proposer. The State, at its option, has the right to request clarification or additional information from the proposers.

3.13 CONTRACT AWARD AND EXECUTION

The State reserves the right to enter into an Agreement (contract) based on the initial offer received without further discussion of the proposal submitted. The State reserves the right to contract for all or a partial list of services offered in the proposal.

The RFQ and Proposal of the selected proposer will become part of the contract initiated by the State. In case of any discrepancy between the documents, the order of precedence will be as follows: AIA A133-2019 Standard Form of Agreement Between State and Site Restoration Manager where the Site Restoration Manager is also the Site Restorer, as modified by the State, AIA A201-2017 General Conditions of the Contract, as modified by the State, State's Site Restoration Documents, inclusive of drawings, addenda during proposal period and acknowledged by Proposers, Project Manual including the Specifications, all exhibits, instructions, provisions, amendments, and post-bid addenda attached thereto, State's RFQ with addenda, followed by the Proposal.

It is State's specific intent that the only terms and conditions with the successful proposer shall be those contained within this RFQ, including exhibits provided, however, that State reserves the right to change the terms of the Agreement (contract) and General Conditions attached to this RFQ prior to execution.

3.14 CODE OF ETHICS

Proposers are responsible for determining that there will be no conflict or violation of the Ethics Code if their company is awarded the contract. Ethics issues are interpreted by the Louisiana Board of Ethics. Proposers are required to disclose any and all conflicts of interest or issues that could reasonably be perceived as conflicts of interest.

4.0 RESPONSE INSTRUCTIONS

4.1 PROPOSAL SUBMISSION

Proposals must be received on or before the date and time specified in the Schedule of Activities. Proposers should allow sufficient mail delivery time to ensure receipt by the time specified. The proposal package must be delivered at the proposer's cost to the RFQ Coordinator listed above. It is solely the responsibility of each proposer to assure that his/her Proposal is delivered at the specified place prior to the deadline for submission. Proposals that, for any reason other than the fault of the Department of Natural Resources, are not received timely may be deemed non-responsive and may not be considered.

4.2 PROPOSAL FORMAT

The State requires that Proposal package be submitted to the RFQ Coordinator at the address specified. The Proposal package shall contain one (1) manually signed original clearly marked or differentiated from the other copies of the Proposal, eight (8) complete hardbound copies, and one (1) complete copy on USB drive in PDF format. As an option, the Proposal packet can be delivered electronically to katie.vance2@la.gov. The original will be retained for incorporation by reference in any contract resulting from this RFQ.

Proposal must be signed by company official(s) or agent(s) duly authorized to sign proposal or contracts on behalf of the organization.

Proposal should not be more than fifty (50) pages in length and be no smaller than 11-point type. The page limit excludes the table of contents, cover letter, resumes, covers, tabs, dividers and any State requested attachments. A page is defined as one 8 1/2" x 11" page printed on one side. Printing on both sides is considered two pages. All pages should be numbered.

4.3 SPECIFIC REQUIREMENTS

The following components are to be considered as contents for a complete submittal. State intends to evaluate and compare only Proposals that substantially conform to the terms and conditions of this RFQ. State reserves the right to reject any and all proposals and to waive any informality. The proposal response should be presented and submitted under tabs as noted below.

TAB 1: SIGNED COVER LETTER AND ACKNOWLEDGEMENT OF ADDENDA

A signed cover letter requesting consideration regarding these SRMR services. The cover letter should be limited to one (1) page.

TAB 2: PROPRIETARY INFORMATION

State if any information contained in this proposal response is being declared proprietary as discussed in Section 3.10 of this RFQ.

TAB 3: EXECUTIVE SUMMARY

Provide a brief summary of the Proposal's contents, emphasizing any unique aspects or strengths of the proposal. The executive summary should be limited to three (3) pages.

TAB 4: BUSINESS ORGANIZATION AND HISTORY OF THE FIRM

Provide a narrative on the history of the firm including years in business and the depth of resources to provide Pre-Site Restoration and Site Restoration Management at Risk services.

Explain the size of your firm, including office locations and the legal structure. If the proposer is a joint venture or includes partners or key sub-consultants or sub-contractors as part of the SRMR, please explain the relationships of the parties.

4.1 Arbitration / Litigation Proceedings

Identify any and all lawsuits and/or arbitration proceedings that you, your affiliate, parent, and/or subsidiary, were a party to that were filed within the last ten (10) years and the result of the proceeding.

4.2 Disclosure of Conflicts

Disclose any financial or legal conflicts of interest, whether existing or potential, which may affect Proposer's performance of services, required under the PSRM/SRMR Agreement should Proposer be selected as Pre-Site Restoration / Site Restoration Manager at Risk, including, but not limited to, requirements to perform the same or similar work due to obligations with regulatory agencies of the State or with entities regulated by the State and any business services currently being provided for institutions that may be in direct competition with the State of Louisiana.

4.3 References

4.3.1 Provide the name, address and telephone number of no more than three (3) engineers or other professionals to act as references for the Proposer or persons currently employed by the Proposer with whom Proposer has worked with within the last ten (10) years. Identify the project(s), location(s), and services performed.

4.3.2 Provide the name, address and telephone number of no more than three (3) environmental remediation oil & gas companies, Federal, State, and Local governmental agencies whom the Proposer has worked for or with or with whom Proposer has interacted with regarding work by the Proposer within the last ten (10) years. Identify the project(s), location(s), and services performed.

4.3.3 In providing the references, Proposer consents to State contacting Proposer's references for the purpose of evaluating Proposer qualifications.

TAB 5: ORGANIZATIONAL STRUCTURE

This section of the Proposal should contain the following information and data:

5.1 If the Proposer is a corporation, provide the following information:

5.1.1 Date of incorporation

5.1.2 Place of incorporation and principle place of business

- 5.1.3 Officers and Directors (include position, address and telephone number)
- 5.1.4 Affiliates, partner corporations, and subsidiaries
- 5.2 If the Proposer is a general or limited partnership, provide the following information:
 - 5.2.1 General Partners (include address and telephone number)
 - 5.2.2 Limited Partners, if applicable (include address and telephone number)
- 5.3 If the Proposer is a joint venture, provide the following information:
 - 5.3.1 Date of formation
 - 5.3.2 Name and address of each venture partner
 - 5.3.3 Principals of each venture partner
 - 5.3.4 Venture partner holding the majority interest in the venture and its percentage of interest
 - 5.3.5 Proposer shall include a copy of the Joint Venture agreement as an attachment to proposal. Such attachment shall not count in the page limit stated in 4.2 above.
- 5.4 If the Proposer is not a corporation, general or limited partnership, or joint venture, please identify the type of business entity and provide any pertinent information
- 5.5 Provide the total number of employees (divided into full-time and part-time); and if sole proprietor, so state this.
- 5.6 Certify that the entity signing any contract emanating from this RFQ holds all required licenses under Louisiana Law based on the activities they plan to perform.

TAB 6: SAFETY

This section of the proposal shall contain the following information and data and shall be tied to project examples listed in TAB 9:

- 6.1 Safety Program Description including:
 - 6.1.1 Name and Qualifications of Safety Officer(s)
 - 6.1.2 Narrative description of program
 - 6.1.3 Training and safety education programs used

- 6.1.4 Maintenance of your firm's safety statistics
- 6.1.5 Organization chart showing relationship of safety officers to senior management of Proposer's organization
- 6.1.6 Oil Spill Response Plan
- 6.2 Safety Record (past five (5) years minimum) including:
 - 6.2.1 Description of program
 - 6.2.2 Organization chart
 - 6.2.3 Relationship of safety management to senior management of the Proposer
 - 6.2.4 Man hours worked
 - 6.2.5 EMR rate and OSHA recordable rates
 - 6.2.6 Describe any OSHA violations or citations and actions taken to correct and lessons learned

TAB 7: FINANCIAL CONDITION AND INSURANCE REQUIREMENTS

- 7.1 The Proposer shall examine the bond requirements included in the attached Pre-Site Restoration / Site Restoration Management Agreement and provide a bonding capacity letter demonstrating the Proposers current bonding capacity.
- 7.2 The Proposer should examine the insurance requirements included in the attached Pre-Site Restoration / Site Restoration Management Agreement and shall provide an insurance certificate evidencing Proposer's liability coverage with minimum limits, per the insurance requirements in the attached contract.

TAB 8: EXPERIENCE OF KEY PERSONNEL / PRE-SITE RESTORATION AND SITE RESTORATION MANAGEMENT TEAM AND STAFFING PLAN

- 8.1 Pre-Site Restoration Manager Organizational Chart
 - 8.1.1 Proposer shall submit a summary description of the Pre-Site Restoration Management Team. Include summary descriptions of key team members and how they have worked together in the past and plan to work together on this project to create value to the State.
 - 8.1.2 Proposer shall submit a detailed organizational chart identifying the individuals whom the Proposer proposes to perform the services required under the Part A: PSRM Agreement. Any firms or individuals proposed to be subcontracted to the Proposer shall be clearly noted as such.

- 8.1.3 The organizational chart shall be accompanied by a narrative summary indicating the duties, the functional responsibilities, and the designated authority of each individual on the chart.
- 8.1.4 Proposer should present a proposed monthly man-hour staffing plan, Preliminary Project Schedule, and Pre-Site Restoration Fee Worksheet, for the duration of the Part A: Site Restoration Services contract. Roles for Key Personnel and their involvement shall be highlighted and defined. Staffing plan shall respond to the scope description included in Exhibit 3, Pre-Site Restoration Services Scope of Work.
- 8.1.5 Identify the Pre-Site Restoration services PSRM intends to subcontract, if any. Any firms or individuals proposed to be subcontracted to Proposer shall be named and clearly noted as such.
- 8.1.6 Identify the relationships of any partner, Joint Venture or other vendor to PSRM intended to participate on the project in direct relationship to the State and Design Professional. Any firms or individuals proposed to be in such direct relationships shall be named and clearly noted as such.

8.2 Site Restoration Manager at Risk Organization Chart

- 8.2.1 Proposer shall submit a detailed organizational chart identifying the individuals whom the Proposer proposes to perform the services required under the Part B: SRMR Agreement. Any firms or individuals proposed to be subcontracted to the Proposer shall be clearly noted as such.
- 8.2.2 The organizational chart shall be accompanied by a narrative summary indicating the duties, the functional responsibilities, and the designated authority of each individual on the chart.
- 8.2.3 Proposer shall present a proposed monthly man-hour staffing plan, Preliminary Project Schedule, and Site Restoration Management Worksheet for the duration of the project. Roles for Key Personnel and their involvement shall be highlighted and defined. Staffing plan shall respond to the scope description involving management of all phases (e.g. sitework, any needed additions to be able to reach a wellsite, plugging equipment, etc.), each to be delivered in a Site Restoration Management at Risk (SRMR) approach. Final staffing will be adjusted to address the final detailed delivery strategy and associated staff and services.
- 8.2.4 Identify the relationships of any partner, Joint Venture or other vendor to SRMR intended to participate on the project in direct relationship to State. Any firms or individuals proposed in such direct relationships shall be named and clearly noted as such.

8.3 Key Personnel

8.3.1 For each person identified as Key Personnel by the Proposer, the following information should be provided in resume format:

8.3.1.1 Name and title

8.3.1.2 Project responsibilities and roles

8.3.1.3 Educational background

8.3.1.4 Professional registrations and memberships

8.3.1.5 Years of relevant experience

8.3.1.6 Relevant project experience

TAB 9: EXPERIENCE ON SIMILAR PROJECTS

This section of the Proposal addresses the firm's or team member's related experience:

9.1 Experience Managing Plugging and Abandonment of Wells, Environmental Remediation, and/or Large-scale Project Management

Describe the Proposer's experience in the last ten (10) years in any similar projects involving projects of significant scope:

9.1.1 Project name, location, description, size and cost

9.1.2 Date of actual start and actual substantial completion compared to planned start and planned completion; explain variances

9.1.3 Original budget, final cost: explain variances

9.1.4 Owner (corporate or governmental entity) and any other key project team members (include address and telephone number)

9.1.5 Services performed by the Proposer or persons currently employed by the Proposer as well as the Proposer's office performing the work (if applicable)

9.1.6 Engineer of Record (Design Professional) proposal

9.1.7 Any awards, recognition, or communications related to the project

9.1.8 Personnel who worked on the project who are being proposed for the Project. Identify when the Key Personnel have worked together on other projects of similar scope and scale.

9.1.9 The number of delay days, if any, requested and received with explanation of the delay. Identify the project for each.

TAB 10: MANAGEMENT APPROACH AND SERVICES

- 10.1 The Proposal should provide a detailed narrative of the management approach that will be used for the Project. The Proposer should identify any unique experience, qualifications, tools, techniques, and approaches that will best achieve the project’s objectives. Proposer shall explain why and how it is industry leading in these areas.

- 10.2 The following issues should be addressed for both Part A: Pre-Site Restoration Services and Part B: Site Restoration services:
 - 10.2.1 Scheduling and scheduling management
 - 10.2.2 Cost tracking and control
 - 10.2.3 Project documentation and reporting
 - 10.2.4 Project coordination and management methodology/strategy
 - 10.2.5 Pre-Site Restoration and Site Restoration quality assurance and control plan
 - 10.2.6 Software programs, web-based applications, and other computer applications proposed or required for project management, scheduling, and cost management tasks. NOTE: the winning Proposer is expected to utilize Oracle’s Primavera P6 Enterprise Project Portfolio Management software for this project.
 - 10.2.7 Provide examples of project deliverables (as attachment to proposal, pages are excluded from page limit of proposal)
 - 10.2.8 Experience with alternate delivery strategies and innovative ways to speed up procurement and project delivery
 - 10.2.9 Provide an estimate of the number of orphaned well sites listed on Exhibit 6 that Proposer can restore, consistent with the requirements outlined in this request, within one year (365 days) of the commencement of Pre-Site Restoration work and provide explanation of impact on Key Project Values.

TAB 11: UNIQUE CAPABILITIES / RESOURCES

- 11.1 Summarize any unique capabilities and/or resources that distinguish your firm with regard to this assignment.

TAB 12: PRE-SITE RESTORATION SERVICES and SITE RESTORATION MANAGEMENT SERVICES

12.1 State will make a selection of a Pre-Site Restoration Manager based on Qualifications submitted for the scope of services described in Exhibit 3 and Exhibit 4. Both the Proposer qualifications and the proposed Site Restoration Services Staffing Plan will be taken into account in the selection of the PSRM/SRMR. **Note that a Pre-Site Restoration Services Staffing Plan and Site Restoration Services Staffing Plan shall be included within the Proposal (Statement of Qualifications)” due on September 26, 2022.**

12.2 The Part A: Pre-Site Restoration Services stipulated fixed fee in the amount of **\$50,000** should be broken down as follows:

The total stipulated Pre-Site Restoration Services fixed fee in dollars, man-hours, rates for each employee by month, and associated expenses for Pre-Site Restoration Services, including long-lead and Advanced Start expenses, shall be submitted to State by the successful Proposer prior to execution of the Part A: Pre-Site Restoration Services contract. Pre-Site Restoration Services shall be detailed and summed to the stipulated fixed fee as advertised. State reserves the right to extend Pre-Site Restoration Services beyond the date indicated in the Project Schedule without any increase in compensation to the PCM.

5.0 EVALUATION AND SELECTION

5.1 EVALUATION TEAM

Proposals will be evaluated by a review selection committee designated by the State for the purpose of determining Proposers most qualified to deliver project, taking into consideration evaluation factors set forth in this Section of the RFQ. The members of the selection committee are as follows:

To be provided by addenda

Should the membership of the selection committee change subsequent to publication of this RFQ, such change will be acknowledged by addenda to this RFQ.

5.2 CLARIFICATION OF PROPOSALS

The State reserves the right to seek clarification of any proposal for the purpose of identifying and eliminating minor irregularities or informalities.

5.3 ADMINISTRATIVE AND MANDATORY SCREENING

All proposals will be reviewed to determine compliance with requirements as specified in the RFQ. Proposals found to be in non-compliance will be rejected from further consideration.

5.4 EVALUATION AND REVIEW

Proposer evaluations will be based on information provided in the Proposal (Statement of Qualifications) or during Proposer interviews according to the following:

5.4.1 Proposal Evaluation Criteria

Proposal will be evaluated using the following criteria:

1-History, organization, financial condition of firm and its team

- Business organization and history of the firm
- Organization structure
- Financial condition and bonding capacity
- Capacity to manage the volume and complexity of work

2-Qualifications and staffing plan

- Experience of key personnel including proposed partners, key subcontractors, and others proposed in key roles for the project.
- Pre-Site Restoration Phase Staffing Plans
- Site Restoration Phase Staffing Plans

3-Approach and methodology

- Management approach
- Consistency of Proposal with Key Project Values
- Project Organization
- Experience with innovative delivery and procurement strategies
- Unique capabilities/resources

4-Past Performance on Similar Projects

- Experience on similar projects
- Breadth of locations and types of similar projects
- Customer satisfaction on similar projects

A final determination of selection / contract award will be based upon the evaluation criteria above and Proposal scoring / ranking by each committee member for each of the categories. Scoring will be in ascending order with the lowest total score representing the best score (i.e. for each category best proposer = 1 point, second best = 2 points, etc.). The Proposer (firm) receiving the best score will be recommended for the Part A: Pre-Site Restoration Services contract award.

The scoring determinations of the Selection Review Committee shall be final. In accordance with RS 38:2225.2.4, subparagraph D:

“There shall be no challenge by any legal process to the choice of the successful construction manager at risk contractor except for fraud, bias for pecuniary or personal reasons not related to the

taxpayers' interest, or arbitrary and capricious selection by the owner."

5.4.2 Award Criteria

The State may award only Part A: Pre-Site Restoration Services at this time. State maintains an option to award subsequent Part B: Site Restoration Services (Site Restoration Management at Risk) to the selected firm. The State may cancel this Request for Qualifications (RFQ) or reject proposals at any time prior to any award. The award document will include a contract incorporating by reference all the requirements (i.e. RFQ, related Exhibits, AIA A133-2019 Agreement Between State and Site Restoration Manager as Constructor as modified by State, AIA A201-2017 General Conditions of the Contract for Construction as modified by the State, the terms and conditions of this solicitation and the Proposer's proposal).

5.5 AWARD PROCEDURE AND ANNOUNCEMENT OF SITE RESTORATION MANAGER

The State may notify the successful Proposer of its intention to proceed with award of the Part A: Pre-Site Restoration Services contract. Unsuccessful proposers will be notified in writing accordingly. The award of a contract is subject to the approval of the Secretary of LDNR.

- 5.5.1 Any award of Part A: Pre-Site Restoration Services and/or Part B: Site Restoration Services shall be subject to the requirements of the contract documents.
- 5.5.2 Successful Proposer may first be awarded Part A: Pre-Site Restoration Services and be deemed Pre-Site Restoration Manager (PSRM).
- 5.5.3 Award of Part B: Site Restoration Services (SRMR) will be by separate Contract.
- 5.5.4 In order for the award for Part B: Site Restoration Services, PSRM must demonstrate to the State and Design Professional satisfactory performance during Pre-Site Restoration Services. PSRM must also present a GMP proposal that is within the project budget (budget for site restoration combined with contingencies as designated).

6. SITE RESTORATION MANAGER REQUIREMENTS

6.1 CORPORATION REQUIREMENTS

If the Site Restoration Manager is a corporation not incorporated under the laws of the State of Louisiana, the Site Restoration Manager / contractor shall be prepared to obtain a certificate of authority pursuant to R.S. 12:301-302 from the Secretary of State of Louisiana. In addition, if the Site Restoration Manager / contractor is a corporation whose stock is not publicly traded, Site Restoration Manager /

contractor will be required to file a “Disclosure of Ownership” with the Secretary of State of Louisiana. Proposer must certify that the entity signing any contract emanating from this RFQ holds all licenses required under Louisiana Law for the activities they plan to perform under this contract.

6.2 CONFIDENTIALITY

All financial, statistical, personal, technical and other data and information relating to the State’s operation which are designated confidential by the State and made available to the Site Restoration Manager in order to carry out this contract, shall be protected by the Site Restoration Manager from unauthorized use and disclosure through the observance of the same or more effective procedural requirements as are applicable to the State. The identification of all such confidential data and information as well as the

State’s procedural requirements for protection of such data and information from unauthorized use and disclosure shall be provided by the State in writing to the Site Restoration Manager. If the methods and procedures employed by the contractor for the protections of the Site Restoration Manager’s data and information are deemed by the State to be adequate for the protection of the State’s confidential information, such methods and procedures may be used, with written consent of the State, to carry out the intent of this paragraph. The Site Restoration Manager shall not be required under the provision of the paragraph to keep confidential any data or information that is or becomes publicly available, is already rightfully in the Site Restoration Manager’s possession, is independently developed by the Site Restoration Manager outside the scope of the contract, or is rightfully obtained from third parties. Under no circumstance is the Site Restoration Manager to discuss and/or release information to the media concerning this project without prior express written approval of the State.

7. EXHIBITS

7.1 The following Exhibits attached and/or issued via addendum are provided to assist Proposers in preparing responses to this RFQ and are considered part of this RFQ package:

1. Project Description
2. Key Project Values
3. Pre-Site Restoration Services Scope of Work
4. Site Restoration Management Services Scope of Work
5. Plugging and Abandonment & Methane Measurement General Procedures
6. Preliminary Project – Well List
7. Form of State/Site Restoration Manager Agreement – AIA A133-2019 as modified by State
8. General Conditions of the Contract – AIA A201-2017 as modified by State
9. Insurance Requirements
10. Federal Guidance for Initial Grant

EXHIBIT 1

Project Description

This project consists of managing and ensuring the plugging, abandonment, and remediation of orphaned wells and associated sites and facilities located in several fields within the LDNR, office of conservation's Monroe District, with an option for federal well sites located in the Monroe and Lafayette Districts, further identified in Exhibit 6. At the sole option of the State the project may be expanded to include the plugging, abandonment, and remediation of orphaned wells and associated sites and facilities located in any of the LDNR, office of conservation's Districts. The SRMR team shall assist the Design Professional in confirming the overall scope, time-line, and cost for the oilfield site plugging, abandonment, remediation, and required environmental (methane emissions and water quality) sampling, reporting, and other surveys. In addition to the site restoration work typically performed by a contractor for the orphaned well program, this project will include meeting those requirements and recommendations set forth in the U.S. Department of Interior's IJA FY 2022 State Initial Grant Guidance in Exhibit 10 ("Federal Guidance for Initial Grant"). All work under this project shall be performed with the intent of furthering the Key Project Values found in Exhibit 2.

The work under this project is to be performed on the specific wells agreed to between State and SRMR through pre-site remediation planning/design. All such work shall be consistent with this RFQ; Contract Documents; all applicable State, Federal, and local laws, including but not limited to Statewide Order No. 29-B (LAC 43:XIX.101, et seq.), U.S. Bureau of Land Management (BLM) plugging and site restoration requirements; the DOI Guidance; and Key Project Values. Work to be performed at or near orphaned well sites may include but not be limited to:

- pre-site remediation design, potentially including advanced start activities;
- Landowner research and notice;
- Disadvantaged Communities surveys and plan implementation;
- Pre-well plugging methane (other gasses) and water quality sampling;
- Plugging and abandonment activities including facility and equipment removal;
- Site restoration and re-vegetation;
- Post-well plugging methane (other gasses) and water quality sampling;
- Submission of all required data and reports

The SRMR shall be responsible for all coordination between the State, State's contractors, design team and rest of the SRMR team (Project Team) in order to facilitate the establishment of the aforementioned methane monitoring system.

The SRMR shall determine whether certain elements of the entire project can be completed simultaneously. The SRMR shall consider the State's priority in overall schedule and completion of the various subparts / phases and be responsible for making final determinations on scheduling, and the management of all aspects of the plugging, remediation, environmental sampling, reporting, and survey activities with the goal being the delivery of the subparts/ phases in a timely manner so as to allow the State to meet the deadlines set forth in the IJA and DOI Guidance.

EXHIBIT 2

Key Project Values

In addition to meeting the basic programmatic needs for the Project, other key values and objectives of the Project include the following:

- A. Schedule** – The Preliminary Project Schedule is included and is based on certain advance site-restoration start activities commencing during the Part A: Pre-Site Restoration Services contract. This is a significant project for the Department of Natural Resources. Accelerated delivery and efficient completion of the project is a Key Project Value.
- B. Cost** – The total budget for this project, which must be kept to a minimum and cannot exceed the available federal funds from the Infrastructure Investment and Jobs Act.
- C. Efficiency** – The PSRM/MR should restore, plug and abandon orphan wells and related sites in an efficient cost effective manner.
- D. Environmental Impact** – The PSRM/SRMR should aid in establishing or revising protocols and programs for methane and water quality testing and monitoring in coordination with the Project Team including the Methane Emissions Predictive Studies Contractor to determine appropriate test requirements.
- E. Disadvantaged Communities** - The PSRM/SRMR should, in coordination with the Project Team, develop and implement a system to track the effects of orphan site remediation on Disadvantaged Communities, including Tribal and Indigenous Communities, Communities of Color, and Low-income Communities.
- F. Team Attitudes and Behaviors** – This project’s success will be highly dependent on the attitudes and behaviors of the individuals and teams involved. Therefore, the State desires to foster an environment that rewards positive thinking, advanced problem solving, a “can do” attitude and highly collaborative behavior. The successful PSRM/SRMR will behave and act accordingly. Problem and issue identification is part of any creative process. The successful PSRM/SRMR will assist the design team in solutions deliberatively and collaboratively. The team will need to push beyond old ways of thinking and explore new ideas and approaches that streamline the project delivery and bring maximum value to the State. The team will need to think and relate differently than in traditional orphaned site restoration projects in order for the State to achieve its goals for speed, innovation, and low cost.
- G. Opportunity for Local, DBE, and Veteran-Owned Firm Participation** – Since orphaned well funding under the Infrastructure Investment and Jobs Act seeks, in part, to ensure well-paying jobs for the citizens of the State of Louisiana, including those directly impacted by orphaned well sites; it is a Key Project Value to implement a process for maximizing the opportunity for participation of Local, Disadvantaged Business Enterprise (DBE), and Veteran-Owned Firms as Key Subcontractors and Suppliers. The process for pre-qualifying / selecting or confirming Key Subcontractors and Suppliers will be in accordance with section 1.4.1.5 of this RFQ.

- H. Good-paying Jobs and Davis-Bacon Act Requirements** – Pursuant to Federal Guidance for Initial Grant (See Exhibit 10), “all laborers and mechanics employed by the [State], subrecipients, contractors or subcontractors in the performance of construction, alteration, or repair work on an award or project in excess of \$2,000 funded directly by or assisted in whole or in part by funds made available under Initial grants [of the IJA] shall be paid wages at rates not less than those prevailing on similar projects in the locality, as determined by the Secretary of Labor in accordance with subchapter IV of chapter 31 of title 40, United States Code commonly referred to as the ‘Davis-Bacon Act.’”
- I. Made in America – Executive Order 14005** – Pursuant to Federal Guidance for Initial Grant (See Exhibit 10), the winning Proposer is “expected to comply with Executive Order 14005, *Ensuring the Future Is Made in All of America by All of America’s Workers*, which requires awardees and sub-awardees of Federal financial assistance awards to maximize the use of goods, products, materials, and services from sources that will help American businesses compete in strategic industries and help America's workers thrive. Waivers may be requested through the DOI Office of Grants Management.”

EXHIBIT 3
Pre-Site Restoration Services - Scope of Work

Key responsibilities of the selected Pre-Site Restoration Manager (PSRM) will be:

1. Assist State and Project Team in refining and finalizing the project delivery strategy for the Project. PSRM shall bring ideas, experience and expertise to the Project Team and be involved in discussions related to project delivery, with an emphasis on criteria of low cost, speed of delivery, high quality and safety.
2. PSRM shall develop, based on in-progress site restoration documents furnished by the other members of the Project Team and other documents, a detailed pre-site restoration and site restoration schedule for the Project. PSRM shall offer innovative ideas to accelerate and/or otherwise improve project delivery.
3. PSRM shall develop integration and coordination strategies that will bring the right vendors in at the right time to avoid re-work, eliminate waste and provide best value to the State.
4. PSRM shall develop the project budget as the basis of the Control Estimate intended to validate and confirm State's project budget.
5. PSRM shall cooperate with the other members of the Project Team in the identification and selection of Key Subcontractors.
6. PSRM may enlist support from appropriate Key Subcontractors and others to identify and act on design assist activities as appropriate.
7. PSRM shall prepare submittals and place orders for long lead items.
8. PSRM shall develop a Trade / Bid Strategy to procure and manage subcontractor work and materials.
9. PSRM may be requested to provide Work to Support an Accelerated Site Restoration Start including but not limited to:
 - a. Methane Measurement
 - b. Water Quality Measurement
 - c. Contacting Landowners of Potential of Operations
 - d. Performing other surveys on orphaned wells, sites, and adjacent property
 - e. Determining methods of identifying and quantifying Disadvantaged Communities, including Tribal and Indigenous Communities, Low-income Communities, and Communities of Color near the orphaned well sites identified in Exhibit 6.
 - f. Long-lead permitting, such as but not limited to compliance with Louisiana Office of Coastal Management, Louisiana Department of Environmental Quality, and U.S. Army Corps of Engineers regulatory requirements.

- g. Accelerated start to orphan well site plugging, restoration and remediation.

Work of this nature, if any, may be performed on a cost of the work or time and materials basis and shall be included in the final GMP contract amount.

10. PSRM shall develop a Master Project Schedule that will be used as a basis for the GMP.
11. PSRM shall develop GMP proposal and issue to State for review and approval.
12. PSRM/SRMR shall, upon approval by State, enter into a contract with State for the project per the contract documents.
13. PSRM shall prepare for and coordinate all testing and sampling required in the contract documents.
14. PSRM shall develop a Quality Control Plan.

EXHIBIT 4

Site Restoration Services – Site Restoration Manager at Risk Scope of Work

Key responsibilities of the selected Site Restoration Manager at Risk (SRMR) will be:

1. SRMR shall collaborate with State, Project Team, and Design Professional on the implementation of the project consistent with this RFQ, applicable state and federal laws, and any applicable DOI Guidance or other federal guidelines for the IJA funds.
2. SRMR shall procure, in accordance with the Contract Documents, other general or trade contractors as needed for the Project.
3. SRMR shall coordinate with other vendors and contractors that may be hired by State or others in connection with the site restoration, environmental sampling and evaluation, related studies and protocol development, or otherwise completing the Project.
4. SRMR shall utilize its resources to complete the Project quickly, efficiently and safely while complying with the contract documents.
5. SRMR shall comply with methods outlined in the contract documents for utilization of contingency diversions and submission and approval of change orders.
6. SRMR shall not unreasonably withhold acceptance of assignment of contract of certain specialty vendors the State has hired prior to SRMR being hired.
7. SRMR shall continuously look for and recommend to the State ways to speed project delivery, improve quality and save money. SRMR shall collaborate closely with the State, the Design Professional, and others to ensure these concepts are maintained throughout the project delivery process.
8. SRMR shall be a leader for safety. SRMR shall ensure all persons, equipment and processes connected with the project make safety the first order of business.
9. SRMR shall provide financial transparency (open book financial records) to State, the State's Program Administrator contractors, and state and federal auditors.

The Site Restoration Manager at Risk (CMR) **shall be allowed self-performance** on the Work. SMR shall identify portions of Project that it plans to Self Perform.

EXHIBIT 5

Plugging and Abandonment & Methane Measurement General Procedures

These procedures will be updated during design period. Additionally, wells marked Wildlife (U.S. Fish and Wildlife) and injection wells may require additional abandonment requires. U.S. Fish and Wildlife wells may require abandonment to BLM standards, and injection wells to current Louisiana Department of Natural Resource standards. These wells and required procedures will be reviewed during the pre-construction phase.

Plugging and Abandonment Procedures for CMAR Wells – MONROE DISTRICT

- All Cement plugs shall be blended API cement. Class ‘A’ cement to be utilized from 0’-6,000’ and Class ‘H’ cement from 6,000’- Total Depth of Well. A minimum density of 15.6 ppg is required on all slurries. Accelerator additives as required to minimize time waiting on cement. Dry and blended cement samples shall be provided to CES agent if requested.
- Contractor must provide absorbent and/or containment booms to contain any sheen that might be generated by the removal operations.
- Obtain district office approval prior to deviating from this procedure.
- 1. Remove debris from well area to allow safe access to well site. Make necessary repairs on wellhead. Install blow out preventers and test to 29B standards. Verify that the hydraulic closure system is operational at all times. Check and record well pressure on tubing and casing. Kill well if necessary. Establish injection rates and pressure in the tubing (or production casing if tubing not present). Monitor casing pressure during injection or if necessary, pressure up on casing to determine tubing and casing integrity. Pressure test all casing strings and annuli to 300 psi. If no production packer present forego production casing pressure test. Note: Report all rates and pressures to District Office.
- 2. Pull and lay down rods, if necessary. Pull production tubing and packer from wellbore and lay down. Verify wellbore is cleaned out to CIBP OD size.
- 3. Set CIBP plug 100’ above top perforation. Tag CIBP and test to 300 psi. Place a minimum of 25 sacks of cement above CIBP.
- 4. At the option of the district office an additional cement plug may be required. This plug will be set at a depth determined by district office. Perforate and squeeze a minimum of 100’ of cement into annulus. Place 100’ balanced plug in wellbore.
 - If unable to inject into perforations, place 100’ cement plug inside of wellbore. Wait on cement 4 hours. Tag and pressure test cement plug to 300 psi.
- 5. Set CIBP +/-110’ below base of USDW. Tag and pressure test to 300 psi.
 - If cement top is calculated to be below base of USDW or less than 200’ above the base of USDW - Perforate 100’ below base of USDW. Establish injection, report rates and pressures. Set cement retainer 50’ above CIBP and perforations. Squeeze a minimum of 200’ of cement into annulus. Leave cement from cement retainer to CIBP inside of wellbore. Place a minimum 150’ of cement on top of the cement retainer. If unable to inject into perforations, place 200’ cement plug above CIBP and inside of wellbore.
 - If cement top is calculated to be at least 200’ above the base of USDW - Place a 200’ cement plug within the wellbore.
 - The wellbore must be covered with cement in the wellbore and in all casing annuli. If a casing annuli is open between surface and production casing, USDW must be covered with cement.
 - Consider filling wellbore with cement from USDW plug to surface.
- 6. Set 100’ surface plug. Circulate balanced cement plug in the production casing. Using a small diameter pipe circulate a 100’ cement plug in all casing annuli. Verify all casing annuli have cement at surface, if not top off.

7. Cut and remove wellhead 5' below ground level. Weld plate with serial number and date welded on to well.
8. Restore wellsite and restore any damage caused by P&A operations on the site and access route to well location. Removed all equipment associated with the production of this well.

Plugging and Abandonment Procedures for CMAR Wells – LAFAYETTE DISTRICT

- All Cement plugs shall be blended API cement. Class 'A' cement to be utilized from 0'-6,000' and Class 'H' cement from 6,000'- Total Depth of Well. A minimum density of 15.6 ppg is required on all slurries. Accelerator additives as required to minimize time waiting on cement. Dry and blended cement samples shall be provided to CES agent if requested.
 - Contractor must provide absorbent and/or containment booms to contain any sheen that might be generated by the removal operations.
1. Mobilize equipment and materials on location. Make necessary repairs on wellhead. Install blow out preventers and test. Verify that the hydraulic closure system is operational at all times. Check well pressure on tubing and casing. Kill well if necessary. Establish injection rates and pressure in the tubing. Monitor casing pressure during injection or if necessary, pressure up on casing to determine tubing and casing integrity. Pressure test all casing annuli to 300 psi. Note*: Report all rates and pressures to Lafayette District Office
 2. RU wireline. MU gauge ring assembly with CCL. RIH in the tubing to production packer noting any restrictions, tight spots or obstructions.
 - Verify tubing integrity via pressure test with plug.
 3. Mix and pump 50 sxs of cement and squeeze the perforations leaving the TOC in the tubing at production packer. WOC 4 hours. Tag cement with wireline and pressure test cement squeeze to 300 psi.
 4. TIH with tubing punch and perforate tubing at +/-100' above production packer. Circulate well clean and displace wellbore with corrosion inhibitor. Leave weighted fluid in wellbore, minimum of 9.0 ppg. Mix and pump 200-ft of cement to leave balanced cement plug in the tubing and production casing. Shut well in, WOC 4 hours. Tag cement with slick line. Pressure test casing to 300 psi.
 5. TIH with tubing punch and perforate tubing at mid-point of wellbore. Mix and pump 200-ft of cement to leave balanced cement plug in the tubing and production casing. Shut well in, WOC 4 hours. Tag cement with slick line. Pressure test casing to 300 psi.
 6. Cut tubing at surface casing shoe. Pull slips to floor and verify string is free. Lay down string.
 7. Pick up and run in with a CIBP. Set CIBP inside of production casing at the surface casing shoe depth. Pressure test casing to 300 psi.
 8. Mix and pump 200-ft of cement to leave balanced cement plug in the production casing. WOC 4 hours. Tag cement with slick line. If necessary, perforate production casing and set 200' annulus cement plug between surface casing and production casing if calculations shoe cement is not present.
 9. Set CIBP in production casing 180' below mud line. Set 165-ft of cement above CIBP at 180'.
 10. Check all casing annuli, and top off with 100' cement plug if necessary. Top off any additional casing strings with 100' of cement.
 11. Complete removing remaining casing 15' BML.
 12. Remove Production Facility (including, but not limited to: production equipment, production/well platform, pilings, and all associated equipment) in accordance with LAC43:XIX.311 and 313.
 13. Remove and dispose of all equipment, material, and debris associated with the past operation of this well and plugging activity.

14. Perform Site Clearance and Verification Survey. Site must pass survey (method approved by Inspection and Enforcement). (See Section 2, Item 28).
15. Restore any damage caused by P&A operations on the site and access route to well location and restore any bottom damage caused by removal operations.

Contractor Protocols for Pre-Plug Methane Measurement

Overview: Contractors will be required to provide preliminary methane measurement data at wellhead sites before plugging the well. Contractors will be required to abide by protocols outlined in this document.

Instrumentation: Contractors will obtain preliminary methane leakage measurements at the site of the wellhead. The methane measurement can be carried out by one of the instruments listed below, or an alternative instrument can be suggested to DNR for consideration. Regardless of the instrument chosen for methane measurement, it must be equipped with a GPS. The instrument should record the GPS location alongside measurements and save a file internally with record on measurement with a time stamp and location. Measurements of wind speed, wind direction, temperature, and humidity will also be required at the wellhead at the time of methane measurement using low-cost commercially available measurement tool.

Measurement Instructions: Measurement should be carried out *before* the well is plugged. The measurement should not be carried out under rainy conditions or when local wind speeds exceed ~30 miles per hour. All measurements should closely follow calibration procedure outlined in EPA Method 21 – Determination of Volatile Organic Compound Leaks. A minimum of five discrete methane measurements should be taken at each well site. Contractors should record both the measurement, as well as provide a brief description of where the measurement was taken.¹ An additional minimum of two measurements should be taken at two locations 20-30 m away from the wellhead in the upwind direction. Contractors should take care to avoid any potential source of methane while choosing these locations (e.g. not close to a idling engine, another wellhead etc.) so as not to bias these measurements. Wind speed, wind direction, temperature, and humidity should be recorded at each well site. Measurement should be near the wellhead.

The methane measurement instrument should record the time, GPS location, and methane measurement to a file that should also be provided to DNR. Although contractors will upload specific measurements into an online form, this file will be used for quality control.

Questionnaire: Contractor will be required to fill out the Qualtrics survey below for each site that measurement is completed. The survey can be filled out on a mobile device on site or in the office on a

¹ Examples might include: “Wellhead cap”, “Top valve”, “bottom valve”, “Connection of tree and flow line”, “line into tank battery” etc.

later date. All data should be entered into the survey below within seven days of measurement. A file with the instrument's measurement information should also be provided to DNR either via email or uploaded to the link below.

https://lsu.qualtrics.com/jfe/form/SV_ehW9fUFYrUwJdUa

List of suggested instruments

1. Bascom-Turner Gas Rover
2. LGR ultraportable methane analyzer (extended range)
3. Picarro GasScouter

Instruments not on the list can be approved by DNR on a case-by-case basis via the submittal process. Please contact DNR with details.

Insurance Requirements:

1. **GENERAL LIABILITY:**

- A. Minimum limits of \$1,000,000 per occurrence.
- B. BI/PD/Contractual/Products-Completed Operations/OCP.
- C. Additional Insured - The State of Louisiana, all State Departments, Agencies, Board and Commissions, its officers, directors, agents, and employees are to be included as additional insured with respect to any work done by the Insured under contract.
- D. Waiver of Subrogation in favor of: The State of Louisiana, all State Departments, Agencies, Board and Commissions, its officers, directors, agents and employees with respect to any work done by the Insured under contract.
- E. Pollution Liability including Clean up.
- F. Underground Resources.
- G. Blowout & Cratering.
- H. Broad Form Property Damage.
- I. XCU - Explosion/Collapse/Underground.
- J. No restriction in coverage for use of explosives.

2. **WORKERS' COMPENSATION:**

- A. Statutory coverage and Employers Liability.
- B. Waiver of Subrogation in favor of: The State of Louisiana, all State Departments, Agencies, Board and Commissions, its officers, directors, agents and employees with respect to any work done by the Insured under contract.
- C. Minimum Employers Liability of \$1,000,000/\$1,000,000/\$1,000,000.
- D. No restriction in coverage for use of explosives.

3. **AUTOMOBILE LIABILITY:**

- A. Minimum limits of \$1,000,000 per occurrence.
- B. Owned/Non Owned/Hired Automobiles.
- C. Additional Insured - The State of Louisiana, all State Departments, Agencies, Board and Commissions, its officers, directors, agents and employees are to be included as additional insured with respect to any work done by the Insured under contract.
- D. Waiver of Subrogation in favor of: The State of Louisiana, all State Departments, Agencies, Board and Commissions, its officers, directors, agents and employees with respect to any work done by the Insured under contract.

4. **IF NOT COVERED BY GENERAL LIABILITY**

- A. Pollution Liability including Clean up.
- B. Underground Resources.
- C. Blowout & Cratering.
- D. Broad Form Property Damage.
- E. XCU - Explosion/Collapse/Underground.
- F. Errors and Omissions

Federal Guidance for Initial Grant

U.S. DOI INITIAL GRANT GUIDANCE BEGINS ON FOLLOWING PAGE
REMAINDER OF THIS PAGE LEFT INTENTIONALLY BLANK

UNITED STATES DEPARTMENT OF THE INTERIOR

BIPARTISAN INFRASTRUCTURE LAW SEC. 40601 ORPHANED WELL PROGRAM

FY 2022 STATE INITIAL GRANT GUIDANCE

I. INTRODUCTION

President Biden signed the Bipartisan Infrastructure Law (BIL; [Public Law 117-58](#)) on November 15, 2021, making a once-in-a-generation investment in the Nation's infrastructure and economic competitiveness. This landmark investment will rebuild America's critical infrastructure, tackle the climate crisis, address legacy polluted sites, advance environmental justice, and drive the creation of good-paying union jobs. By addressing long overdue infrastructure and environmental improvements and strengthening our resilience to the changing climate, this investment in our communities across the country will grow the economy sustainably and equitably for decades to come.

Section 40601 of the BIL creates an orphaned well site plugging, remediation, and reclamation program within the Department of the Interior (DOI) to address orphaned wells and well sites on Federal lands.¹ Subsection (d) creates a grant program for Tribes, and subsection (c) creates three types of grants for states:

1. Initial grants (Section 40601(c)(3))
2. Formula grants (Section 40601(c)(4))
3. Performance grants (Section 40601(c)(5))

This document:

1. Sets forth the application process for states and provides requirements for carrying out activities under the Initial grants authorized by Sec. 40601(c)(3) of the BIL; and
2. Describes what the Department of the Interior considers to be the best practices for establishing, conducting, and reporting on the activities of a program to plug, remediate, and reclaim orphaned wells on State and private lands.

The document indicates what information is **required** in applications for an Initial grant and for expenditure of the grant funding. It also includes a number **strongly recommended** best practices that can help maximize the benefits and transparency of activities carried out with Initial grant funding. Many of these best practices will be further refined with input from the States and Tribes and may form the basis for future

¹ Section 40601 amends Section 349 of the Energy Policy Act of 2005, but for simplicity all references to the amended Section 349 will be written as components of Section 40601 of the BIL in this document.

requirements in the subsequent orphaned well grants, so States expecting to apply for subsequent rounds of grants are encouraged to ensure their programs apply these best practices as early as possible in order to promote consistent standards for well plugging and reclamation activities, and that benefits from the program can be properly tracked.

II. DEFINITIONS

“Administrative costs” identified in Sec. 40601(c)(2)(B)(i), limited to not more than 10 percent of the funds received,² are those costs that cannot be directly attributed to activities listed under Sec. 40601(c)(2)(A), i through viii, but instead to general grants management or program administration. Administrative costs can be expended for personnel or non-personnel costs, and can be direct or indirect, but should represent the costs to the State for managing the overall grant-funded work rather than preparation for and execution of individual projects.

“Communities of color” are those communities with a higher than national average percent of individuals in a block group who list their racial status as a race other than white alone and/or list their ethnicity as Hispanic or Latino. That is, all people other than non-Hispanic white-alone individuals. The word "alone" in this case indicates that the person is of a single race, not multiracial. A block group is an area defined by the Census Bureau that usually has in the range of 600-3,000 people living in it.³

“Community” – either a group of individuals living in geographic proximity to one another, or a geographically dispersed set of individuals (such as migrant workers or Native Americans), where either type of group experiences common conditions.⁴

“Date of receipt of funds,” as identified in Sec. 40601(c)(3)(A)(i)(II)(cc), is the effective date of the grant and the start of its period of performance, as determined by the DOI Agreements Officer and the receiving State. For the large-scale Initial grant, the effective date begins the 90-day period within which the State must “use” no less than 90% of funds as certified in the grant application. To “use ... funding” under this section is to obligate funding by definitely committing it to a new or existing contract or issuing a new grant.

² Except as provided by Section 40601(c)(2)(B)(ii), which allows larger amounts to be used for administrative costs under the small-scale Initial grants described further in Section IV of this document.

³ This definition is adopted from USEPA’s EJSCREEN definitions at: <https://www.epa.gov/ejscreen/overview-demographic-indicators-ejscreen#demoindex>

⁴ Definition from OMB and CEQ Interim Implementation Guidance for the Justice40 Initiative (M-21-28) dated July 20, 2021

“Disadvantaged Community” – a community may be considered disadvantaged based on a combination of the variables below or based on its inclusion in the Climate and Economic Justice Screening Tool.⁵

- Low income, high and/or persistent poverty
- High unemployment and underemployment
- Racial and ethnic residential segregation, particularly where the segregation stems from discrimination by government entities
- Linguistic isolation
- High housing cost burden and substandard housing
- Distressed neighborhoods
- High transportation cost burden and/or low transportation access
- Disproportionate environmental stressor burden and high cumulative impacts
- Limited water and sanitation access and affordability
- Disproportionate impacts from climate change
- High energy cost burden and low energy access
- Jobs lost through the energy transition
- Access to healthcare
- Geographic areas within Tribal jurisdictions

“Federal land” is defined in Sec. 40601(a)(1) as land administered by a land management agency within the Department of Agriculture or the Department of the Interior.

“Federal wells” – Orphaned wells and well sites on Federal land are considered “Federal wells” and are eligible for funding under the Sec. 40601(b) Federal Program. Orphaned wells—and well sites associated with such wells—that were drilled subject to a federal permit to drill may be considered Federal wells eligible for funding under the Sec. 40601(b) Federal Program, regardless of surface ownership. As the funding under the Federal Program is not expected to be sufficient to remediate all eligible Federal wells, a State may use grant funds received under Sec. 40601 to plug and remediate Federal wells located on State or private land and may include those wells in its inventory of documented orphaned wells on State or private land. Any plugging and reclamation activities on such split-estate orphaned wells would be subject to the Federal government’s onshore plugging and reclamation standards and DOI approval prior to the start of operations.

⁵Definition from OMB and CEQ Interim Implementation Guidance for the Justice40 Initiative (M-21-28) dated July 20, 2021. See Climate and Economic Justice Screening Tool at: [Explore the tool - Climate & Economic Justice Screening Tool \(geoplatform.gov\)](https://www.eplanning.gov/Explore/~/036000mainpage/Explore%20the%20tool%20-%20Climate%20&%20Economic%20Justice%20Screening%20Tool%20(geoplatform.gov))

“Low-income communities” are those communities that in the last 12 months had a median household income less than twice the poverty level.⁶

“Orphaned Well” – The term “orphaned well” with respect to Federal or Tribal land, means a well that is not used for an authorized purpose, such as production, injection, or monitoring, and for which no operator can be located, the operator of which is unable to plug the well and to remediate and reclaim the well site, or that is in the National Petroleum Reserve - Alaska. With respect to State or private land, the term:

- (1) has the meaning given the term by the applicable State; or
- (2) if that State uses different terminology, has the meaning given another term used by the State to describe a well eligible for plugging, remediation, and reclamation by the State.

“Pre-Award Costs” – Per 2 CFR 200.458, Pre-Award Costs are those incurred after the award date and before the effective date of the Federal award and only with the written approval of the Federal awarding agency (DOI). DOI will evaluate pre-award costs on a case-by-case basis.

“Tribal and Indigenous communities” are communities whose members make up a Federally recognized Indian Tribe, a State-recognized Indian Tribe, an Alaska Native community or organization, a Native Hawaiian organization, or any other community of indigenous people located in a State, including indigenous persons residing in urban communities.

“Unobligated amounts” – For purposes of determining the deadline for expenditure under Sec. 40601(c)(3)(C), “unobligated amounts” covers any funding that is not subject to a definite commitment that creates a legal liability of the State for an immediate or future payment for goods or services ordered or received, including by contract or sub-contract award.⁷

III. PERMISSIBLE USES OF INITIAL GRANT FUNDS

- A. As provided under Section 40601(c)(2), a State may use funding from Initial grants to:
- i. plug, remediate, and reclaim orphaned wells located on State-owned or privately-owned land;
 - ii. identify and characterize undocumented orphaned wells on State and private land;
 - iii. rank orphaned wells based on factors including public health and safety, potential environmental harm, and other land use priorities;

⁶ This definition is similar to USEPA’s EJSCREEN definition at <https://www.epa.gov/ejscreen/ejscreen-map-descriptions#category-demographics>

⁷ See Government Accountability Office definitions at: <https://www.gao.gov/assets/gao-05-734sp.pdf>

- iv. make information regarding the use of funds received available on a public website;
 - v. measure and track -
 - I. emissions of methane and other gases associated with orphaned wells; and
 - II. contamination of groundwater or surface water associated with orphaned wells;
 - vi. remediate soil and restore native species habitat that has been degraded due to the presence of orphaned wells and associated pipelines, facilities, and infrastructure;
 - vii. remediate land adjacent to orphaned wells and decommission or remove associated pipelines, facilities, and infrastructure;
 - viii. identify and address any disproportionate burden of adverse human health or environmental effects of orphaned wells on communities of color, low-income communities, and Tribal and Indigenous communities; and
 - ix. administer the program of work identified in its grant agreement.
- B. Initial grants are available for such activities where the surface is owned by the State or by a private party, including, potentially, individually owned Indian properties that are held in trust by the Secretary of the Interior but deemed by the State to be ‘orphaned wells’ on ‘private land,’ for purposes of compliance with this section only. Funds may not be used for activities where the surface is owned by the United States or by an Indian Tribe, but may be used for Federal wells where the surface is owned by the State or by a private party and appropriate agreements are in place with the Federal mineral manager, which has determined the well to be orphaned.
- C. Section 40601(c)(3)(A) allows States to request an Initial grant of up to \$25 million under clause (i)—referred to as large-scale Initial grants—or up to \$5 million under clause (ii)—referred to as small-scale Initial grants. States may receive one Initial grant under 40601(c)(3): either a small-scale grant or a large-scale project grant, but not both.
- D. Section 40601(c)(A)(i)(II)(cc) provides that a State that applies for a large-scale Initial grant must include a certification that the State will use not less than 90% of its requested funding to issue new contracts, amend existing contracts, or issue grants for plugging, remediation, and reclamation work by not later than 90 days after the date of the receipt of the funds.
- E. Section 40601(c)(3)(C) - Expenditure and Reimbursement: A State that receives funds under the Initial grant authority shall reimburse the Secretary in an amount equal to the amount of funds that remain unobligated on the date that is one year after the date of receipt of the funds. In other words, all funds must be obligated within a

year of date of receiving the funds otherwise unobligated funds shall be reimbursed to the Secretary.

IV. INSTRUCTIONS FOR INITIAL GRANT APPLICATIONS

A. *Deadline*

- i. Small-Scale Grants (up to \$5 million): States may apply for an Initial grant of up to \$5 million within a time frame sufficient to ensure that periods of performance and final obligations are complete prior to September 30, 2030.
- ii. Large-Scale Grants (up to \$25 million): The deadline for submitting applications for Initial grants of up to \$25.0 million is **May 13, 2022**, 11:59 pm EDT.

Applications must be emailed to orphanedwells@ios.doi.gov. An email acknowledging receipt will be provided by DOI to the sending State within one business day of receipt.

B. *Required Elements*

To be complete, the application should include sufficient details as described below to provide assurances regarding the ability of the State to properly carry out and oversee the activities to be funded. All Required Elements are Standard Forms or approved forms under OMB Control No. 1093-0012.

- i. Federal Forms: The following Federal forms, all available at [Grants.gov](https://www.grants.gov), must be submitted for an Initial grant request for funding (the application) to be complete. Digital signatures are acceptable:
 - (a) SF-424v4 Application for Federal Assistance
 - (b) SF-424A Budget Information for Non-Construction Programs
An SF-424A is a standard form that provides an estimate of the work's major cost centers (e.g., State employee labor, training, equipment, contracting and other operational costs), where the sum total of the budget justification equals the overall Initial grant request.
 - (c) SF-LLL Disclosure of Lobbying Activities
If the grant applicant does not engage in lobbying activities, it is sufficient to mark the SF-LLL form "N/A" for Not Applicable.
 - (d) OMB Form 4040-0010 Key Contacts Form

- ii. Detailed Budget Proposal/Justification: This detailed information supports and identifies the estimated costs provided in the SF-424A and should include an itemized budget breakdown with unit costs for the period of the Initial grant funding and the basis for estimating the costs of personnel salaries, fringe benefits, project staff travel, materials and supplies, equipment, and consultants and contracts. This document should also include narrative descriptions of the items included in the project budget.
- iii. Project Abstract Summary (OMB Form Number 4040-0019): A project abstract of not more than one page will include the project purpose, activities to be performed, expected deliverables or outcomes, intended beneficiaries, and subrecipient activities (if known).

C. Recommended Elements

The following list includes the features the Department of the Interior has determined are important components of a successful orphaned well program. Although not required in relation to Initial grant funding, many will be further refined in coordination with the States and may be required for subsequent grants. States are encouraged to incorporate these features into projects funded with Initial grants.

For those parts that are applicable, the State should include the following information as a narrative attachment to the required elements listed above:

- (a) The State's process for determining that a well has been orphaned, including what efforts will be made to redeem financial assurances or otherwise recoup remediation costs from any parties responsible under State law;
- (b) A description of the State's plugging standards, including the witnessing requirements (qualifications of witness, documentation);
- (c) Details of the State's prioritization process for evaluating and ranking orphan wells and associated surface reclamation, including criteria, weighting, and how such prioritization will address resource and financial risk, public health and safety, potential environmental harm (including methane emissions where applicable), and other land use priorities;
- (d) If no prioritization process currently exists, the State should describe its plans to develop and implement a prioritization process;
- (e) Details of how the State will identify and address any disproportionate burden of adverse human health or environmental effects of orphaned wells on communities of color, low-income communities, and Tribal and Indigenous communities;

- (f) The methodology to be used by the State to measure and track methane and other gases associated with orphaned wells, including how the State will confirm the effectiveness of plugging activities in reducing or eliminating such emissions;
- (g) The methodology to be used by the State to measure and track contamination of groundwater and surface water associated with orphaned wells, including how the State will confirm the effectiveness of plugging activities in reducing or eliminating such contamination;
- (h) The methodology to be used to decommission or remove associated pipelines, facilities, and infrastructure and to remediate soil and restore habitat that has been degraded due to the presence of orphaned wells and associated infrastructure;
- (i) Methods the State will use to solicit recommendations from local officials and the public regarding the prioritization of well plugging and site remediation activities, and any other processes the State will use to solicit feedback on the program from local officials and the public;
- (j) Latitude/Longitude and all other data elements and associated units of measure as indicated in the Orphaned Well Data Reporting Template that accompanies this guidance;
- (k) How the State will use funding to locate currently undocumented orphaned wells;
- (l) Plans the State has to engage third-parties in partnerships around well plugging and site remediation, or any existing similar partnerships the State currently belongs to;
- (m) Training programs, registered apprenticeships, and local and economic hire agreements for workers the State intends to conduct or fund in well plugging or site remediation;
- (n) Plans the State has to support opportunities for all workers, including workers underrepresented in well plugging or site remediation, to be trained and placed in good-paying jobs directly related to the project;
- (o) Plans the State has to incorporate equity for underserved communities into their planning, including supporting the expansion of high-quality, good paying jobs through workforce development programs and incorporating workforce strategy into project development;
- (p) Procedures the State will use to coordinate with Federal or Tribal agencies to determine whether efficiencies may exist by combining field survey, plugging, or surface remediation work across private, State, Federal, and Tribal land;
- (q) The State's authorities to enter private property, or a State's procedures to obtain landowner consent to enter private property, in the event that any wells to be plugged will be accessed from privately owned surface;
- (r) A work schedule covering the period of performance of the Initial grant;
and

- (s) If applicable, a federally approved Indirect Cost Rate Agreement or statement regarding State's intention to negotiate or utilize the de minimis rate.

D. *Restrictions on funding use (90% must be for contracts & grants)*

States may not use more than 10 percent of the funds received as authorized under Sec. 40601(c)(3)(A)(i) for administrative costs associated with activities listed in Section III. This limitation does not apply to an Initial grant of up to \$5.0 million received as authorized under Sec. 40601(3)(c)(3)(A)(ii). However, States receiving the smaller Initial grants must nonetheless comply with 2 CFR § 200.414, which requires States to adhere to federally-approved indirect cost rate agreements.

E. *Certifications (digital signatures are acceptable)*

- i. Small-Scale Grants: For small-scale grant applications up to \$5 million, a certification (see Attachment A) must be submitted to the Department that:
 - (a) The State has a plugging, remediation, and reclamation program in effect for orphaned wells; or
 - (b) The State has the capacity to initiate such a program; or
 - (c) The funds provided under this paragraph will be used to carry out any administrative action necessary to develop an application for a formula grant or performance grant.

- ii. Large-Scale Grants: For large-scale grant applications up to \$25 million, a certification (see Attachment B) must be submitted to the Department that:
 - (a) The State is a Member State or Associate Member State of the Interstate Oil and Gas Compact Commission;
 - (b) There are 1 or more documented orphaned wells located in the State; and
 - (c) The State will use not less than 90 percent of the funding requested to issue new contracts, amend existing contracts, or issue grants for plugging of orphan wells, and reclamation of associated surface conditions by not later than 90 days after the date of receipt of the funds.

V. RECOMMENDED STANDARDS FOR MEASUREMENT, PLUGGING, AND REMEDIATION

A. Pre and Post-Plugging Measurement or Estimation of Air and Water Pollution

- i. As a best practice, States are encouraged to conduct an inspection of each orphaned well site being considered under this grant to measure or estimate current contamination of surface water and groundwater and to measure or

estimate current emissions of methane, hydrogen sulfide, and other gas emissions. States are also encouraged to conduct post-plugging inspections and measurements to verify the lack of gaseous emissions or water contamination from plugged wells and the achievement of vegetation performance standards appropriate to the site's future land uses. Such post-plugging inspection and measurement will be documented to create a verifiable record of activities performed under the grant.

- ii. States are encouraged to use the protocol in *Assessing Methane Emissions from Orphaned Wells to meet Reporting Requirements of the 2021 Infrastructure Investment and Jobs Act (BIL): Federal Program Guidelines*, available at the [OEPC Legacy Pollution Program website](#),⁸ to measure and report methane emissions from orphaned wells. States may also use a third-party methodology, such as the American Carbon Registry's draft methodology.⁹ States should report in their Project Narrative the methodology or methodologies they will use or require their contractors to use.
- iii. Pre- and post-plugging measurements or estimates, by well, of water contamination, gaseous emissions (particularly methane), and acres restored should be included in the Final Performance Report described in Section VII.C. below.

B. Well Plugging and Site Remediation Standards

- i. States with established and documented well plugging standards and regulations will require their contractors to meet those requirements. For a State that does not have established well plugging standards, it is strongly recommended that the work reflect, at a minimum: the plugging standards in the Bureau of Land Management's Onshore Oil and Gas Order No. 2 Section III.G for plugging wells (https://www.blm.gov/sites/blm.gov/files/energy_onshoreorder2.pdf); or, for offshore wells, the provisions of 30 CFR Part 250.
- ii. States will adhere to any well plug witnessing and documentation requirements pursuant to State law.
- iii. For States with established well abandonment standards (inclusive of those actions necessary to complete surface reclamation and revegetation), all well closures shall meet those requirements. If a State does not have well abandonment standards, then for a well site to be considered plugged and fully abandoned, such that it can be reported as a completed unit, the work must reflect, at a minimum,

⁸ <https://www.doi.gov/priorities/investing-americas-infrastructure/legacy-pollution>

⁹ <https://americancarbonregistry.org/carbon-accounting/standards-methodologies/plugging-abandoned-orphaned-oil-and-gas-wells>

the Bureau of Land Management’s Reclamation and Abandonment Standards. For additional details, see: <https://www.blm.gov/sites/blm.gov/files/Chapter%206%20-%20Reclamation%20and%20Abandonment.pdf>

VI. FEDERAL AND TRIBAL COORDINATION

Efficiency and cost-effectiveness in well plugging and site remediation will be maximized by ensuring proper coordination in these activities between States, Tribes, and the Federal government. As early as practical – preferably before State grant applications are submitted – States should provide a primary contact for coordination between Tribal and Federal land management agencies to orphanedwells@ios.doi.gov. DOI will provide a map of Federal wells approved for plugging to the State contacts and IOGCC. This map, and subsequent updates, will be posted publicly as soon as reasonably possible. All questions regarding coordination with Federal or Tribal agencies should also be sent to orphanedwells@ios.doi.gov.

When undertaking work on Federal land under a cost-sharing, Good Neighbor, or other arrangement with the Federal government, States must collect the data required to be reported under the BIL for wells plugged and sites remediated on Federal land, unless all such data collection is otherwise captured in the terms of a lawful agreement between the State and the Federal Land Manager (e.g., cooperative agreement). Early coordination with Federal agencies is encouraged to ensure that States are collecting the proper data in a format that can most easily be transferred to the Federal government.

States are also encouraged to consult with Federal agencies and Tribal representatives to ensure appropriate and efficient collaboration on compliance issues (e.g., cultural resources, endangered species, sacred sites) and to minimize disruption of operations and land management activities, such as planning field activities to avoid special events that might be impacted by the work.

VII. REPORTING REQUIREMENTS

- A. *Quarterly Reports:* Consistent with 2 C.F.R. § 200.328, States must submit quarterly financial and performance reports to the DOI within 30 days of the close of each Federal fiscal quarter. Financial reporting will use [SF-425](#) or other forms if specified by the Office of Management and Budget.
- B. *Personal Property report:* States will be required to submit an annual Tangible Personal Property Report (SF-428) if grant funds are used to purchase equipment.
- C. *Final Financial and Performance Reports:* Consistent with 2 C.F.R. § 200.329, States must submit a final financial and performance reports to the DOI within 120 days of

period of performance end date. Financial reporting will use [SF-425](#) or other forms if specified by the Office of Management and Budget.

- D. 15-month report: States receiving either type of Initial grant must submit a report, no later than 15 months after the date on which the State receives the funds, describing the means by which the State used the funds in accordance with its certification. If the 15-month report includes all of the detail that would have been provided in the corresponding quarterly Financial and Performance Report described in VII.C, a separate quarterly Financial and Performance Report need not be submitted for that period.

E. Data Collection and Reporting

1. In order to simplify and standardize reporting and tracking requirements and ensure that the Federal resources utilized are well-spent and achieving the statutory objectives, States are encouraged to track the following data for all actions taken using orphaned well grant funding. Such data elements will help inform, and be incorporated into, the processes being developed for the forthcoming Formula grants and Performance grants listed in Section I above. As appropriate, data tracking may be accomplished through existing systems such as the Groundwater Protection Council's Risk-Based Data Management Solutions (RBDMS):
 - (a) Well location information (e.g., latitude/longitude);
 - (b) Well type (e.g. orphaned production or disposal well);
 - (c) Bureau of Labor Statistics NAICS codes for each of the employees working on each well site, along with the hours each employee spent on each site;
 - (d) The population living within a half mile radius of each well being plugged;
 - (e) Pre-plugging methane emissions (if available);
 - (f) Post-plugging methane emissions;
 - (g) Surface water contamination identified;
 - (h) Surface water contamination remediated;
 - (i) Groundwater contamination identified;
 - (j) Groundwater contamination remediated;
 - (k) Acreage impacted by well and infrastructure (site footprint);
 - (l) Revegetation performance standard monitoring start date;
 - (m) Revegetation performance standard attainment date (project complete);
 - (n) Actual total cost per well of plugging and surface reclamation; and
 - (o) If the project is located in a community of color, low-income community, or Tribal or Indigenous community.
2. This list highlights important parameters that DOI will report to Congress annually and is a subset of the larger data set to be reported by the States as part

of the quarterly performance reports (VII.A.) and 15-month report (V.A.iii.) and detailed in the Orphaned Well Data Reporting Template available at the [OEPC Legacy Pollution Program website](#). States that intend to apply for a Formula grant (as per forthcoming Formula grant guidance) should note that information regarding the activities under such grants are required to be posted on a public website, and States are strongly encouraged to develop such a website to provide information to the public about the activities undertaken using Initial grant funding as well. Developing a website is an allowable use of Initial grant funds and ensuring that Initial grant activities are tracked in the same manner as Formula grant activities will allow for a better determination of the successes of the funding, help meet goals of transparency and accountability, and make it easier for the State to meet future reporting requirements.

- F. After providing the grantee an opportunity to redact personally identifiable or proprietary information, the Department of the Interior may post successful grant applications on a publicly available web site.
- G. The Department of the Interior will publish a summary of performance accomplishments on a publicly available web site, following submission by the States of the report required in Section VII.C of this guidance.
- H. Additional clarification on reporting requirements and grant terminology is provided in Attachment C.

VIII. DAVIS-BACON ACT REQUIREMENTS

All laborers and mechanics employed by the applicant, subrecipients, contractors or subcontractors in the performance of construction, alteration, or repair work on an award or project in excess of \$2,000 funded directly by or assisted in whole or in part by funds made available under Initial grants shall be paid wages at rates not less than those prevailing on similar projects in the locality, as determined by the Secretary of Labor in accordance with subchapter IV of chapter 31 of title 40, United States Code commonly referred to as the “Davis-Bacon Act” (DBA).

Applicants shall provide written assurance acknowledging the DBA requirements for the award or project and confirming that all laborers and mechanics performing construction, alteration, or repair work on projects in excess of \$2,000 funded directly by or assisted in whole or in part by and through funding under the award are paid or will be paid wages at rates not less than those prevailing on projects of a character similar in the locality as determined by the Secretary of Labor in accordance with Subchapter IV of Chapter 31 of Title 40, United States Code (Davis-Bacon Act).

Recipients of funding will also be required to undergo DBA compliance training and to maintain competency in DBA compliance. The U.S. Department of Labor offers free Prevailing Wage Seminars several times a year that meet this requirement, at <https://www.dol.gov/agencies/whd/government-contracts/construction/seminars/events>.

For additional guidance on how to comply with DBA provisions and clauses, see <https://www.dol.gov/agencies/whd/government-contracts/construction> and <https://www.dol.gov/agencies/whd/government-contracts/protections-for-workers-in-construction>.

IX. ADDITIONAL TERMS AND CONDITIONS

- A. DOI Standard Award Terms and Conditions will be included in all Initial grants, at the time of award. These standard terms and conditions can be found at: [Standard Award Terms and Conditions](#).
- B. Award recipients will be expected to comply with Executive Order 14005, *Ensuring the Future Is Made in All of America by All of America's Workers*, which requires awardees and sub-awardees of Federal financial assistance awards to maximize the use of goods, products, materials, and services from sources that will help American businesses compete in strategic industries and help America's workers thrive. Waivers may be requested through the DOI Office of Grants Management.
- C. Under 2 C.F.R. § 200.329, the Federal awarding agency may make site visits as warranted to ensure appropriate fiscal accountability and oversight. States shall provide Federal awarding agency access to relevant documentation in State possession and facilitate, to the extent allowable under State law, Federal awarding agency access to project sites.
- D. The DOI Freedom of Information Act Office provides guidelines to requestors of grant applications around what information may be redacted from applications. This information includes patent rights, confidential financial information, personally identifiable information (PII), and detailed budget, consultant, and business assets information. 2 CFR § 200.338 places limitations on public access to award-related documents.
- E. As required by Section 70914 of the Bipartisan Infrastructure Law on or after May 14, 2022, none of the funds under a federal award that are part of Federal financial assistance for infrastructure may be obligated for a project unless all of the iron, steel, manufactured products, and construction materials used in the project are produced in the United States, unless subject to an approved waiver. The requirements of this section must be included in all subawards, including all contracts and purchase orders for work or products.

State Certification

Orphaned Well Site Plugging, Remediation, And Restoration

Small-Scale Initial Capacity Grant

Consistent with Section 40601(c)(3)(A)(ii)(III) of the Infrastructure Investment and Jobs Act (aka Bipartisan Infrastructure Law), the State or Commonwealth of

_____ certifies that it:

- has in effect a plugging, remediation, and reclamation program for orphaned wells;

OR

- has the capacity to initiate such a program;

OR

- that the funds will be used to carry out any administrative actions necessary to develop an application for a formula grant or a performance grant under Section 40601(c)(4) or Section 40601(c)(5), respectively.

Certifying Official Signature Date

State Certification

Orphaned Well Site Plugging, Remediation, And Restoration

Large-Scale Initial Project Grant

Consistent with Section 40601(c)(3)(A)(i)(II)(aa) of the Infrastructure Investment and Jobs Act (aka Bipartisan Infrastructure Law), the State or Commonwealth of

_____ certifies that it is a Member State or Associate Member State of the Interstate Oil and Gas Compact Commission.

The State or Commonwealth also certifies that it has one (1) or more documented orphaned wells located within our State or Commonwealth.

And the State or Commonwealth certifies that it will use no less than 90 percent of the funds requested under this grant to issue new contracts, amend existing contracts, or issue grants for plugging, remediation and reclamation work on orphaned wells within our State or Commonwealth by not later than 90 days after the date of receipt of the funds.

Annex to the Initial State Grants Guidance

Overview: The \$4.3B orphan well State grant program is historic, new, and critical to clean up legacy pollution. These sections provide instructions and awareness to States on standard grants management requirements that are part of applying for a Federal award.

- 1. Unique Entity Identifier and System for Award Management (SAM)**
- 2. Conflict of Interest Disclosure**
- 3. Single Audit Reporting Statement**
- 4. Certification Regarding Lobbying and Disclosure Requirements**
- 5. Intergovernmental Review**
- 6. Data Availability**
- 7. Agency Review Process**
- 8. Additional Reporting Requirements**
 - a. Significant Development Reports**
 - b. Conflict of Interest Disclosures**
 - c. Other Mandatory Disclosures**
 - d. Reporting Matters Related to Recipient Integrity and Performance**
- 9. Payments**

1. Unique Entity Identifier and System for Award Management (SAM)

Before submitting an application, applicants must be registered in SAM.gov and have a [Unique Entity Identifier \(UEI\)](#) which replaces the Data Universal Numbering System (DUNS) number from Dun & Bradstreet in April 2022. Registration is through the [SAM.gov](#) website, which has user guides and other information to assist you with registration under the “Help” tab if you are not already registered. The Grants.gov “[Register with SAM](#)” page also provides detailed instructions, and applicants can contact the supporting Federal Service Desk for help as needed. A Federal award may not be made to an applicant that has not completed the SAM.gov registration. Federal award recipients must renew and validate their SAM registration at least once every 12 months to maintain an active SAM.gov registration with current information through the life of their Federal award(s).

[Applicants that are registered with SAM just need to login to get their UEI, SAM generates it automatically.](#)

2. Conflict of Interest Disclosure

Per the Financial Assistance Interior Regulation (FAIR), [2 CFR §1402.112](#), applicants must state in their application if any actual or potential conflict-of-interest exists at the time of submission.

(a) *Applicability.*

(1) This section intends to ensure that non-Federal entities and their employees take appropriate steps to avoid conflicts of interest in their responsibilities under or with respect to Federal financial assistance agreements.

(2) In the procurement of supplies, equipment, construction, and services by recipients and by subrecipients, the conflict-of-interest provisions in 2 CFR 200.318 apply.

(b) *Notification.*

(1) Non-Federal entities, including applicants for financial assistance awards, must disclose in writing any conflict of interest to the DOI awarding agency or pass-through entity in accordance with 2 CFR 200.112.

(2) Recipients must establish internal controls that include, at a minimum, procedures to identify, disclose, and mitigate or eliminate identified conflicts of interest. The recipient is responsible for notifying the Grants Officer in writing of any conflicts of interest that may arise during the life of the award, including those that have been reported by subrecipients.

(c) *Restrictions on lobbying.* Non-Federal entities are strictly prohibited from using funds under a grant or cooperative agreement for lobbying activities and must provide the required certifications and disclosures pursuant to 43 CFR part 18 and 31 U.S.C. 1352.

(d) *Review procedures.* The Grants Officer will examine each conflict-of-interest disclosure on the basis of its particular facts and the nature of the proposed grant or cooperative agreement and will determine whether a significant potential conflict exists and, if it does, develop an appropriate means for resolving it.

(e) *Enforcement.* Failure to resolve conflicts of interest in a manner that satisfies the government may be cause for termination of the award. Failure to make required disclosures may result in any of the remedies described in 2 CFR 200.339, Remedies for Noncompliance, including suspension or debarment (see also 2 CFR part 180).

3. Single Audit Reporting Statement

All U.S. States expending \$750,000 USD or more in Federal award funds in the applicant's fiscal year must submit a Single Audit report for that year through the [Federal Audit Clearinghouse's Internet Data Entry System](#). U.S. States must state if your organization was or was not required to submit a Single Audit report for the most recently closed fiscal year in your application. If your organization was required to submit a Single Audit report for the most recently closed fiscal year, provide the EIN (Tax ID) associated with that report and state if it is available through the [Federal Audit Clearinghouse](#) website.

4. Certification Regarding Lobbying and Disclosure Requirements

Applicants requesting more than \$100,000 in Federal funding must certify to the statements in [43 CFR Part 18, Appendix A-Certification Regarding Lobbying](#). If this application requests more than \$100,000 in Federal funds, the Authorized Official's signature on the appropriate SF-424, Application for Federal Assistance form also represents the entity's certification of the statements in 43 CFR Part 18, Appendix A.

Applicants and recipients must not use any federally appropriated funds (annually appropriated or continuing appropriations) or matching funds under a Federal award to pay any person for lobbying in connection with the award. Lobbying is influencing or attempting to influence an officer or employee of any U.S. agency, a Member of the U.S. Congress, an officer or employee of the U.S. Congress, or an employee of a Member of the U.S. Congress in connection with the award. Applicants and recipients must complete and submit the [SF-LLL, "Disclosure of Lobbying Activities"](#) form if the Federal share of the proposal or award is more than \$100,000 and the applicant or recipient has made or has agreed to make any payment using non- appropriated funds for lobbying in connection with the application or

award. The SF-LLL form is available with this Funding Opportunity on Grants.gov. See 43 CFR, Subpart 18.100 for more information on when additional submission of this form is required.

5. Intergovernmental Review

An intergovernmental review may be required for submissions from a U.S. State. Prior to application submission, U.S. State applicants should visit the OMB Office of Federal Financial Management website and view the “State Point of Contact (SPOC) List” to determine whether their application is subject to the State intergovernmental review process under Executive Order (E.O.) 12372 [“Intergovernmental Review of Federal Programs.”](https://www.whitehouse.gov/omb/office-federal-financial-management/) <https://www.whitehouse.gov/omb/office-federal-financial-management/>

6. Data Availability

Per the Financial Assistance Interior Regulation (FAIR), [2 CFR §1402.315](#):

(a) All data, methodology, factual inputs, models, analyses, technical information, reports, conclusions, valuation products or other scientific assessments in any medium or form, including textual, numerical, graphic, cartographic, narrative, or audiovisual, resulting from a financial assistance agreement is available for use by the Department of the Interior, including being available in a manner that is sufficient for independent verification.

(b) The Federal Government has the right to:

(1) Obtain, reproduce, publish, or otherwise use the data, methodology, factual inputs, models, analyses, technical information, reports, conclusions, or other scientific assessments, produced under a Federal award; and

(2) Authorize others to receive, reproduce, publish, or otherwise use such data, methodology, factual inputs, models, analyses, technical information, reports, conclusions, or other scientific assessments, for Federal purposes, including to allow for meaningful third-party evaluation.

7. Agency Review Process

The awarding agency conducts a review of the SAM.gov Exclusions database for all applicant entities and their key project personnel prior to award. The awarding agency cannot award funds to entities or their key project personnel identified in the SAM.gov Exclusions database as ineligible, prohibited/restricted or otherwise excluded from receiving Federal contracts, certain subcontracts, and certain Federal assistance and benefits, as their ineligibility condition applies to this Federal program.

Prior to award, the awarding agency will evaluate the risk posed by applicants as required in 2 CFR 200.205. The awarding agency documents applicant risk evaluations using DOI’s “Financial Assistance Recipient Risk Assessment” form. Prior to approving awards for Federal funding in excess of the simplified acquisition threshold (currently \$250,000), the awarding agency is required to review and consider any information about or from the applicant found in the Federal Awardee Performance and Integrity Information System. The awarding agency will consider this information when completing the risk review. The awarding agency uses the results of the risk evaluation to establish monitoring plans, recipient reporting frequency requirements, and to determine if one or more of the specific award conditions in 2 CFR 200.207 should be applied to the award.

8. Additional Reporting Requirements

Significant Development Reports Events may occur between the scheduled performance reporting dates which have significant impact upon the supported activity. In such cases, recipients are required to notify

the awarding agency in writing as soon as the recipient becomes aware of any problems, delays, or adverse conditions that will materially impair the ability to meet the objective of the Federal award. This disclosure must include a statement of any corrective action(s) taken or contemplated, and any assistance needed to resolve the situation. The recipient should also notify the awarding agency in writing of any favorable developments that enable meeting time schedules and objectives sooner or at less cost than anticipated or producing more or different beneficial results than originally planned.

Conflict-of-Interest Disclosures Recipients must notify the program immediately in writing of any conflict of interest that arises during the life of their Federal award, including those reported to them by any subrecipient under the award. Recipients must notify the program in writing if any employees, including subrecipient and contractor personnel, are related to, married to, or have a close personal relationship with any Federal employee in the Federal funding program or who otherwise may have been involved in the review and selection of the award. The term employee means any individual engaged in the performance of work pursuant to the Federal award. Recipients may not have a former Federal employee as a key project official, or in any other substantial role related to their award, whose participation put them out of compliance with the legal authorities addressing post-Government employment restrictions. See the [U.S. Office of Government Ethics website](#) for more information on these restrictions. The awarding agency will examine each conflict-of-interest disclosure based on its particular facts and the nature of the project and will determine if a significant potential conflict exists. If it does, the awarding agency will work with the recipient to determine an appropriate resolution. Failure to disclose and resolve conflicts of interest in a manner that satisfies the awarding agency may result in any of the remedies described in 2 CFR 200.339 Remedies for Noncompliance, including termination of the award.

Other Mandatory Disclosures Applicants must disclose, in a timely manner, in writing to the Federal awarding agency or pass-through entity all violations of Federal criminal law involving fraud, bribery, or gratuity violations potentially affecting the Federal award. Non-Federal entities that receive a Federal award including the terms and conditions outlined in 2 CFR 200, Appendix XII—Award Term and Condition for Recipient Integrity and Performance Matters are required to report certain civil, criminal, or administrative proceedings to SAM. Failure to make required disclosures can result in any of the remedies described in 2 CFR 200.339 Remedies for Noncompliance, including suspension or debarment.

Reporting Matters Related to Recipient Integrity and Performance If the total value of your currently active grants, cooperative agreements, and procurement contracts from all Federal awarding agencies exceeds \$10,000,000 for any period of time during the period of performance of this Federal award, then you as the recipient during that period of time must maintain the currency of information reported to the System for Award Management (SAM) that is made available in the designated integrity and performance system (currently the Federal Awardee Performance and Integrity Information System (FAPIIS)) about civil, criminal, or administrative proceedings in accordance with Appendix XII to 2 CFR 200.

9. Payments

Domestic recipients are required to register in and receive payment through the U.S. Treasury's Automated Standard Application for Payments (ASAP), unless approved for a waiver by the awarding agency program. The recipient will be notified of the ASAP enrollment process, or if already enrolled, the process to link their ASAP account to the Agency.

Attachment D

Paperwork Reduction Act Statement

In accordance with the Paperwork Reduction Act (44 U.S.C. 3501, et seq.), the U.S. Department of the Interior collects information necessary for implementing a grant program for applicable government entities to plug, remediate, and reclaim orphaned wells on lands covered by the legislation. The associated investments, as part of the new grant programs, will rebuild America's critical infrastructure, tackle the climate crisis, advance environmental justice, and drive the creation of good-paying union jobs., and to respond to requests made under the Freedom of Information Act and the Privacy Act of 1974. Information requested in this form is required to obtain or retain a benefit. According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. OMB has approved this collection of information and assigned Control No. 1093-0012.

Estimated Burden Statement

We estimate public reporting for this collection of information to average 44 hours, including time for reviewing instructions, gathering and maintaining data and completing and reviewing the form. Direct comments regarding the burden estimate or any other aspect of the form to the Department Information Clearance Officer, U.S. Department of the Interior, 1849 C Street, Washington, DC 20240, or via email at DOI-PRA@doi.gov. Please do not send your completed grant package to this address.
