

# API Updates

API Updates are triggered by changes in a well's surface location (ie, location amendment to different Parish/State prior to drilling); to correct an erroneous API; or to assign an API to a well that has never had an API in the SONRIS database.

Per API Bulletin D12A, P2 Energy Solutions assigns historic APIs for wells permitted before 7/1/1966. Irma Barrera is the primary contact. She will reach out from time-to-time for API corrections. Submit requests to [EnR.WSupport2@ifs.com](mailto:EnR.WSupport2@ifs.com).

Verify the corrected API isn't being utilized by another well serial number before making the correction. If there is a conflict, consult with Irma.

Duals, triples, repermits, and redrills will share the same API.

See "The API Well Number and Standard State and County Numeric Codes Including Offshore Waters" reference book. A copy is within F:\OoC\Eng\Engineering\RegulatorySection\PermitsSection\DrillingPermits as "API Well Number Guide."

A future enhancement to SONRIS will be to include API in the well history table (or perhaps its own set of tables since a lateral could have multiple APIs if we utilized the last 4 digits of the API- up until now, the last 4 digits in SONRIS are 0000).

How to update API numbers:

Utilize SONRIS SRCN2610 to process a green

API Number 17-017-16542 =  
17017165420000 – Add 4 zeroes,  
remove dashes.

Single Green Card [checked] Directional [unchecked]

1. Query Serial number (date doesn't really matter) leave as correction.
2. Change API number
3. Verify – \*Delete everything in the comment box\* – Enter Comment to “TO UPDATE API NUMBER TO 17-017-16542” or something similar.
