Site Observations:

-Confirmed that we can work under NWP 6 in this area W of #7. Excavation schedule for mid to late October, pending equipment availability.

Operational Notes:

- Injection pumps were decreased in attempt to keep #7 tubing pressure closer to 70psi rather than 80 psi.
- Gas removal or oil withdrawal:
 - No gas was removed for any well yesterday.
 - Westlake operations did not attempt oil withdrawal from #7 to frac tank yesterday.
- 6X Obstruction Remediation:
 - Work scheduled to start on 10-16. UIC-17 and work procedure will be submitted today.
- 3D Seismic:
 - Lonquist working on completing final contour map. Received comments from Liberty Gas.
- Monitoring wells:
 - Westlake, DNR, and ERM have meeting scheduled for today to discuss new well locations.
- Sub-surface Seismic:
 - Long lead items have been ordered. We are still on track for installation in early 2024.
- Geo-mechanical Studies:
 - Westlake is working with Lonquist to fund Respec on phase 2 modeling.
- Insar
 - Recent data set continues to show recent non-linear trends. The data set also show areas outside of the dome experiencing similar displacements. TREA has been notified of these areas and is performing some quality control checks to investigate these areas further.
