SNT Satellite Update
InSAR Subsidence
August 23, 2024

Lonquist comment:

The SNT satellite (12-day revisit) passed by Sulphur on Friday August 23, but we were informed by TREA that the image acquisition was absent from the ESA's most recent acquisition plan and the image was not acquired. The next pass on 9/4/2024 does currently have a planned acquisition scheduled for the site.
