

SNT Satellite Update
InSAR Subsidence
September 28, 2024

Lonquist comment:

The SNT satellite (12-day revisit) passed by Sulphur on Saturday September 28, but the image acquisition was unsuccessful. The below note was provided from TREA regarding the missed acquisition.

From TREA 9/30/2024:

Thank you for your email. I apologize for the late notice that the September 28th image was not included in the European Space Agency's (ESA) SNT acquisition plan. I have reviewed the latest acquisition plan from ESA, and the next image is scheduled for October 10, 2024. We will notify you in advance if there are any changes to this date.
