

SNT Satellite Update
InSAR Subsidence
January 30, 2025

Lonquist comment:

The SNT satellite (12-day revisit) passed by Sulphur on Sunday January 26, but we were informed by TREA that the image acquisition was absent from the ESA's most recent acquisition plan and the image was not acquired. The next pass on 2/7/2025 does currently have a planned acquisition scheduled for the site.
