## INSPECTION FORM OFFICE OF CONSERVATION INJECTION & MINING DIVISION 617 NORTH 3RD STREET BATON ROUGE, LA 70802

Time of Departure:

1:00:00 PM

Rode the boat

Lake bubbling

site's.

area's. No major

today with the calm

winds and checked

out most of Central

Yellowrock

S-4 - Opsi casing

#1012 50 psi tubing

5psi tubing

changes in bubbling S-7 75psi tubing

Inspector Name(s): Billy Carnes Other personnel on site: Randy Broussard / Tanner const. cre Weather Conditions (Temp/Wind Speed/Direction, etc.): Cloudy Skies 68\* to 83\* degs ssw 11 mph .. This morning it was calm winds Any planned work for today: Check Cavern pressures, Check Bubbling site's and some Yellowrock Well pressures Inspection locations: Cavern Well 7A Cavern Well 7B CL-1 CL-2 CL-3 CL-4 CL-5 Cavern 6X (near BW-22, west (location description): side of Central (east side of Central (Central Lake (Central Lake (Central Lake Lake) Lake) bubbling site) bubbling site) bubbling site) Most of the Site was unchange from prior inspections that I had made. Also, In Chrystal Lake by the # 1026 YellowRock Prod. Well it looked Like a Oil sheen on the Lake on further investgation I believe that the sheen is organic from the Spring Polynation. Westlake took water sample's of the water with the Sheen. Spoke with Josh & stated that Westlake could do inhouse testing of these sample's on TDS, Hydrocarbon's and Chlorides. NO Odor.. And didn't feel like a Small Brine water oily substance. No fluid on pad so I past leak on top of Wellhead. can't tell if it's still bubbling .. 248.3 gpm No Changes Nothing still bubbling still bubbling still bubbing 188 94 Tubing Pressure (if applicable) 191 455 Casing Pressure (if applicable) Bubbling? yes yes
