

Mr. Rice,

As a small Business owner I am writing this letter concerning The SOA'S + Flaring GAS. Flaring gas is not a great concern as we pull vacuum and sell what we can.

However, the SOA'S are a different matter. The new changes would be extremely destructive to our business. My brother & I are the only employees, our production is border line broke. We can plug one or two old wells a year, depending on the price of oil.

In summary, we oppose these new changes.

I hope you will take the little Glory to our concern.

Thanks,

Michael A. Beck
