Community/Public Supply Wells (by Owner and/or Operation) in the
South Caddo Parish Areas of Interest (Keithville, South Shreveport-Ellerbe Rd.)

Please note that the below listing is only for groundwater wells registered for public supply in the south Caddo Parish Areas of Interest, as noted by owner and/or operating system. If you reside in one of the Areas of Interest and receive water from any of the below sources or providers, you must adhere to the water use restrictions in the Ground Water Emergency Order.

Likewise, all domestic/home supply wells in the south Caddo Parish Areas of Interest are subject to this Order unless they are pulling water from the Red River Alluvial aquifer.

The Office of Conservation maintains a list of registered domestic wells in Caddo Parish. Prior to the mid-1980s, however, wells did not have to be registered with the state, and it is certain that many domestic/home supply wells are not registered.

If property owners would like to check on their well registration, or register an un-registered well at no cost, please contact the Ground Water Resources Program at (225) 342-8244 or southcaddo@la.gov.
