Highlights_

Louisiana's natural gas average spot price is rising slowly. The average gas price bottomed out at \$1.96 per MMBTU in April 2012, and by October 2012, the average price had risen to \$3.16 per MMBTU. The October 2012 average gas price was almost 17% higher than the September 2012 average price, but it was 11% lower than the October 2011 average price. The increase in gas prices is attributed to projected cooler weather for the fall and winter compared to last year. Power plants are burning record amounts of gas instead of coal. The switch from coal to gas is caused by the lowest seasonal gas prices in a decade and a decline in E&P drilling rigs looking for natural gas, which will ease the glut of natural gas in storage. The US Energy Information Administration is projecting that gas prices will be above \$3.50 per MMBTU by January 2013.

Note from the Editors

Louisiana Energy Facts is published monthly by the Louisiana Department of Natural Resources, Technology Assessment Division as a public service to individuals interested in Louisiana energy activities. Content includes recent oil, gas and other energy statistics and a brief analysis of current trends.

Louisiana Energy Facts articles provide insight and information on subjects of special interest to our readers, and may announce relevant, forthcoming publications.

These documents are available on the Louisiana Department of Natural Resources, Technology Assessment Division home page: <u>http://www.dnr.louisiana.gov/tad</u>. From the menu, select **Newsletters**. Our current online holdings include issues dating from 1998 through the present. If the issue you are seeking is unavailable, please contact us.

To request a subscription *or* update your mailing address, contact us with your information. Please specify print or electronic subscription. We value your feedback. Please send your comments and suggestions for improving and enhancing the newsletter to: techasmt@la.gov.
