1 GENERAL INFORMATION

1.1 Purpose

This Request for Proposals (RFP) is issued by the Coastal Protection and Restoration Authority (herein referred to as the CPRA or the State) for the purpose of entering into a contract with a firm which will provide qualified personnel to assess CPRA's current financial environment as it relates to project management and accounting, recommend and implement modifications to existing financial management practices and systems for the CPRA, and serve as the liaison/consultant for conversion to the State of Louisiana's new accounting system, LaGov.

CPRA is seeking proposers to respond to the Scope of Work statement entitled "Financial Services Assistance."

1.2 Background

After Hurricanes Katrina and Rita in 2005, the Coastal Protection and Restoration Authority Board was created by the Louisiana Legislature as the single state entity with authority to articulate a clear statement of priorities and to focus development and implementation efforts to achieve comprehensive coastal protection for Louisiana. In July 2008, an implementation office of approximately 155 staff, originally known as the Office of Coastal Protection and Restoration and now referred to as the Coastal Protection Restoration Authority, was established.

Since 2008, CPRA has been tasked with a multi-billion dollar work load, which includes hurricane protection and restoration projects across the coast. Most notable are the \$14.6 B Hurricane Protection System for the Greater New Orleans area; the \$497 M Coastal Impact Assistance Program; and the \$8 B Louisiana Coastal Area program. Additionally, CPRA serves as lead Trustee for the Natural Resource Damage Assessment that is a result of the 2010 Deepwater Horizon event.

With the approval of the Master Plan 2012 Update and in anticipation of additional project funding from the Deepwater Horizon Natural Resource Damage Assessment, RESTORE Act, Gulf of Mexico Energy Securities Act (GOMESA) or other sources, we have been evaluating how we can improve our implementation processes and structure.

CPRA utilizes the Department of Natural Resources (DNR) for accounting, budgeting, contracting, grants management, information technology and human resources services. The CPRA has been utilizing a financial and project management tracking system that was inherited from the DNR, and it has been modified to some degree. CPRA currently utilizes several different systems including: the state's accounting system ISIS; the state's contract tracking system CFMS; a time keeping system developed by DNR; a project management system, Primavera P6; and various other manual Excel spreadsheets for reporting/tracking information. Preliminary analysis of CPRA's financial management systems indicate that while current practices were sufficient at one time, it is evident that as additional revenue streams and projects are incorporated into the program, significant efficiencies and accountability could be gained by implementing a comprehensive project-based financial system to sufficiently and succinctly provide required financial and project information.

The State's Division of Administration has slated DNR and CPRA to be the next agencies to convert to the new statewide accounting system, LaGov, which is an Enterprise Resource Planning system. The LaGov system has components and capabilities that will allow CPRA to have a comprehensive financial/project management system. LaGov implementation is scheduled to start July 1, 2013 and be operational by July 1, 2014.

1.3 Scope of Services

Attachment 1 details the scope of services and deliverables/desired results that the State requires of the Contractor.

15. INDEMNIFICATION AND LIMITATION OF LIABILITY

Neither party shall be liable for any delay or failure in performance beyond its control resulting from acts of God or force majeure. The parties shall use reasonable efforts to eliminate or minimize the effect of such events upon performance of their respective duties under Contract.
